AMBASSADOR OF ITALY TO THE KINGDOM OF SAUDI ARABIA

Dear Visitor,

I wish to warmly welcome you to the 2024 Big 5 Saudi fair and in particular to the Italian Pavilions, located respectively in the areas dedicated to i) Stone & Surface, ii) Heating, Ventilation & Air Conditioning (HVAC) and iii) Construct. Italy has traditionally been one of the most represented countries at Big 5 Saudi, which attracts thousands of international companies from all over the world. This year nearly 100 Italian companies will attend this globally-recognized construction fair, exposing state-of-the-art technologies and very high quality products.

The Italian industry is well-placed in many construction products, notably marbles, granites and natural stones, as well as machineries and complete plants to quarry and process natural stones. With respect to the HVAC sector, our companies are well-known for their historical tradition of design, style and technological innovation. In the field of construction, a growing number of Italian SMEs are working hand in hand with hundreds of Saudi business partners on a wide array of projects, thus contributing every day to the Kingdom's impressive urban, housing and

construction projects.

Over time, Italy has indeed become a key partner for Saudi Arabia's strategic investments under Vision 2030. Top Italian companies stand as major implementers of milestone initiatives, such as the development of the Diriyah Gate in Riyadh, Red Sea Global project, Al Ula's Master Plan and ultimately the smart-city of NEOM.

Saudi Arabia is therefore Italy's main economic partner in the Middle East and North Africa region and construction projects are among the most promising and steadily-growing areas of business. Building on past experience and sound knowledge of the Saudi market, Italian companies are willing to further contribute to upcoming projects in the Kingdom, as laid out in the Vision Realization Program for Housing. The Embassy of Italy in Riyadh, the Consulate General in Jeddah and the Italian Trade Promotion Agency in Riyadh stand therefore ready to support Saudi businesses in dealing with their Italian counterparts with a view to achieving mutually and long-standing beneficial results.

Enjoy your visit at the 2024 Big 5 Saudi fair!

ROBERTO CANTONE
**Ambassador of Italy to the
Kingdom of Saudi Arabia**

A handwritten signature in black ink, which appears to read 'Roberto Cantone'. The signature is fluid and cursive, written over a thin horizontal line.

DIRECTOR ITALIAN TRADE AGENCY

Dear Visitor,

I am very glad to welcome you on behalf of the Italian Trade Agency to the Italian Pavilions at the Big 5 Saudi Exhibition - Stone & Surface Pavilion, where you can meet 57 Italian companies dedicated to the stone industry, HVAC R Expo Saudi Pavilion, where you have the chance to meet with over 21 exhibitors, representing high quality products and technologies and third Pavilion – where you can meet 19 Italian companies dedicated to construction, road and earthmoving machinery, mining Machinery, quarry, construction site, machines and lifting equipment e movement.

Italian industry is leader worldwide in many products in the construction sector – and in particular, regarding the Big 5 Saudi, in marbles, granites and natural stones, machinery, complete plants, tools and complementary products to quarry and processing natural stones, and in HVAC sector - and is well known for its skills in satisfying the specific needs of its clients and partners, thanks to a historical tradition of craftsmanship, style, innovation and research.

The Italian Trade Agency - that has organized the

participation of the Italian companies at the Big 5 Saudi in collaboration with the two important manufacturers associations Confindustria Marmomacchine, UNACEA and ANIMA Confindustria Meccanica Varia, with a network of offices in more than seventy countries, is the government agency that supports the business development of Italian companies abroad and promotes their collaboration with foreign partners.

You are therefore welcome to our Pavilions, and please don't hesitate to ask for the assistance of our staff, who will be glad to introduce you to the Italian companies and support you in finding an Italian partner matching your business needs.

Romano Baruzzi
Director
Italian Trade Agency
Riyadh Office

ITA - ITALIAN TRADE AGENCY

L'ICE-Agenzia per la promozione all'estero e l'internazionalizzazione delle imprese italiane è l'organismo attraverso cui il Governo favorisce il consolidamento e lo sviluppo economico-commerciale delle nostre imprese sui mercati esteri.

Agisce, inoltre, quale soggetto incaricato di promuovere l'attrazione degli investimenti esteri in Italia. Con una organizzazione dinamica motivata e moderna e una diffusa rete di uffici all'estero, l'ICE svolge attività di informazione, assistenza, consulenza, promozione e formazione alle piccole e medie imprese italiane.

Grazie all'utilizzo dei più moderni strumenti di promozione e di comunicazione multicanale, agisce per affermare le eccellenze del Made in Italy nel mondo.

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

ANIMA CONFINDUSTRIA - FEDERATION OF ITALIAN ASSOCIATIONS OF MECHANICAL AND ENGINEERING INDUSTRIES

ANIMA Confindustria - Federation of Italian Associations of Mechanical and Engineering Industries, represents within Confindustria companies of mechanical sector (225.000 employees, 54,60 billion Euro production and 57.0% export share - estimates 2022). Established in 1914, ANIMA numbers 31 associations and 1,000 companies, highly qualified in their sectors.

Macrosectors and technologies represented:

- ENERGY GENERATION, CHEMICAL, OIL & GAS TECHNOLOGIES

Machinery and Plants

- BUILDING TECHNOLOGIES

Plants and Construction

- LOGISTICS TECHNOLOGIES

Systems and machinery for Lifting, Elevation and Handling

- FOOD TECHNOLOGIES

Plants, Technology and Products for Food Industry

- SAFETY, SECURITY & ENVIRONMENT

Environmental & Personal Protection, Firefighting & Safety

- INDUSTRY

Plants, Components and Products for Industry

ANIMA safeguards interests of the mechanical industry, represents and promotes member-companies and their products in Italy and abroad, supports members both in technical and economic issues.

The companies joining ANIMA are strongly committed to promoting the energy transition in their business and production processes. A working group dedicated to research and application of Hydrogen and Nuclear for Energy Production is also active within the Federation.

COLOROBRIA CONSULTING

🏠 Via Pietramarina, 53 - 50053 Sovigliana (Vinci) (FI)

✉ rinaldie@colorobbia.it

🌐 www.phoebetechology.com

☎ +39 337 1552094

phoebe®

Phoebe is air purification technology based on ceramic filters and photocatalysis activated by visible LED light. Photocatalysis is a natural process where the light activates the filter that destroys pollutants like VOC, NOx, bacteria, viruses, mold.

Usually photocatalysis works with UV lamps that are dangerous. Phoebe works with simple visible LED lights that makes our product safe by design and with a lower maintenance cost.

Phoebe is a green technology: the ceramic filter doesn't need to be

replaced, it only needs a regeneration with a simple thermal treatment once a year.

Phoebe can be applied both to AHU of HVAC, with modular filters that fit perfectly the section of the duct, or to stand alone devices.

Phoebe technology is patented and tested by certified laboratories.

COTRAKO

📍 Via Milano, 17 - 24040 Calvenzano (BG)

✉ info@cotrako.it

🌐 www.cotrako.it

☎ +39 0363 85077

Cotrako since 1982 produces and sells equipment for LPG, SNG and natural gas. World leader in the field of tanks level gauges, COTRAKO manufactures with innovative technologies to ensure an excellent level of quality and price.

Cotrako designs, constructs, sells and installs plants for vaporizations, pressure reduction and measuring units under ISO and PED H1 module quality standard. Technical and engineering departments, give opportunities to customized plants and fast delivery time.

FRATELLI PETTINAROLI

🏠 Via Pianelli, 38 - 28017 San Maurizio d'Opaglio (NO)

Since 1987 we engineer, develop and manufacture UV-C solutions for disinfection against virus, bacteria, pathogens, moulds and other harmful and contaminating agents. We develop any possible UV-C application for AIR disinfection, HVAC & Centralized Air disinfection, SURFACES disinfection, WATER disinfection, Grease and Odor removal and disinfection of Industrial Production Lines. Our solutions are Tested and Certified by Independent Labs and Certification bodies for their Efficiency and Compliance to International Standards. We currently have hundreds of successful applications in Healthcare facilities, Large Environments (e.g. Airports), Schools, Offices and Public Transportation vehicles. UV-C is also ideal in HVAC centralized air systems, to reduce maintenance costs by keeping the system clean from biofilms and moulds and reduce energy consumption by replacing high-resistance filters to clean the airflow. UV-C disinfection is a science-based technology and we provide a validated software calculation of the "UV-dose" needed to eliminate target harmful microorganism in a specific environment.

REMOTAIR

🏠 Frazione Tornello, 120 - 27040 Mezzanino (PV)

✉ info@remotair.com

🌐 www.remotair.com

☎ +39 0385 938020

Ventilation systems can easily become contaminated and spread pollutants indoors that pose great dangers to human health. For this reason, HVAC systems must be regularly inspected and, if necessary, sanitized. However, what happens if the system becomes contaminated again before the next inspection? In this case, the contamination will remain undetected, exposing building occupants to the risk of contracting bad diseases.

To address this problem, Alisea S.r.l., the leading Italian company in the HVAC hygiene sector, has invented Remotair, the first Artificial Intelligence-based solution for continuous monitoring of an HVAC system's operational health and cleanliness. REMOTAIR® patented technology alerts users of any critical event while also providing preventive diagnosis. Remotair can be particularly useful in countries like Saudi Arabia, that are exposed to frequent dust storms: sand penetrates all HVAC systems, even when high quality filters are installed.

SAER ELETTROPOMPE
