4 - 7 December 2023 - Sheikh Rashid Hall
Stand n. Rashid B196 - Dubai World Trade Center, Dubai

Sustainability is SustainabITALY

According to United Nations estimates, from now until 2050 more than two-thirds of the global population will live in cities. Even right now, 60% of total energy consumption and 70% of emissions are connected to “urban consumption”. That is why the quality of the constructed is one of the decisive factors in the struggle against climate change. Today authentically natural stone can be at the service of creating a low-environmental-impact urban ecosystem that is comfortable, durable, hospitable and beautiful.

In sustainable building and green building, natural stone plays a primary role as a material making it possible to create and design an authentic urban ecosystem of great environmental quality in which natural matrixes, semi-natural matrixes and human intervention can dialogue functionally and positively.

The main guarantees that natural stone offers are:

- **Maximization of energy savings in building management:** thanks to the different minerals they contain, using authentically natural stones can help reduce energy consumption for heating and cooling buildings, with a consequent reduction in CO2 emissions.
- **Extension of existent buildings' lifecycles:** authentically natural stones are “eternal” if used in ways consonant with weather conditions and their performance characteristics and if given simple maintenance using modern methods of surface treatment and restoration. Their use makes it possible to preserve resources, conserve cultural assets and reduce waste.
- **The ability to recoup/recycle at end-of-life:** discards of authentically natural stone deriving from demolition and construction generate secondary raw materials of excellent quality and can be reused as ornamental coverings after simple surface treatment, to produce both aggregates and stabilizers for the building world.
- **Respect for biodiversity:** paving for pedestrian paths for open spaces and gardens made with natural stone can protect and create specific tracts of biodiversity. Utilizing stone for urban roofing guarantees high environmental quality.

With an international market comprising more than 140 countries, whose major buyers are the United States, Germany, Switzerland, the United Kingdom, France, the United Arab Emirates and China, the stone sector is an ideal testimonial to the synthesis of the Made in Italy, which concerns premium, world-renowned materials and the Italian way of working them, fruit of ancient traditions and the most advanced and innovative applied technology.

Sustainability is the new demand to which the entire sector of authentically natural stone is able respond and for this reason we are presenting Italy at ME Stones 2023 with the motto: **Sustainability is Sustainab-ITALY!**

ITALIAN NATURAL STONE

Arvex is an Italian company specializing in mosaic, tile and stone. We develop our collections for interiors and exteriors with the aim of finding the perfect combination of competitive prices and high-quality products, all in a unique style.

We cooperate with distributors and architects from all over the world, and also have a stock program stored in our Italian warehouse. Our team is focused on customer satisfaction and attention to detail, leading to strong business relationships worldwide.

Our newest collections:

The terrazzo collection, made of 45 colors for which we have slabs in stock that can be cut into tiles.

Bianco di Ostuni and Pietra leccese limestones.

The outdoor collection, made of double-layer pavers and several Italian marbles suitable for outdoor application.

Basaltina Srl is a 100% Italian company founded by Giuseppe Tecchi in 1925. The quarry located in Bagnoregio, in the heart of Italy, is one of the most important in the country. Here, we extract and work a natural lava stone, used since Roman times, and actually marketed worldwide with the registered trademark Basaltina®.

Our brand Basaltina® is synonymous of Made in Italy excellence, combining craftsmanship and industrial refinement. Internationally renowned architects and designers sign-off their projects using the products know by the brand Basaltina. The stone comes in two different types: Classico and Selcino. Basaltina® type Classico features unmistakable horizontal stratification, and is the symbol of elegance, Basaltina® type Selcino has random porosity, thus epitomizes the sleek minimalism of the modern world.

Both types are sold in slabs and cut-to-size/ tiles with different sizes and finishes. Basaltina Srl has obtained national and international certifications on its products that prove its primary physical-mechanical features: resistance to both extremely high and extremely low temperatures and resistance to both compression and abrasion.

CAMELEON: NARI BLACK
QUARRY (SOUTH-AFRICA)

Brachot is a leading specialist in natural stone and blended materials, offering landscape and surface materials. Brachot developed from a wholesaler in natural stone slabs to an international player with quarries, production sites and distribution centres in various countries, like in Italy amongst others. Brachot's own range is complemented by products from renowned international quarries and suppliers.

Cameleon, a Brachot Family Member, is the South African manufacturer of building and monumental granite slabs with a range of products to suite every requirement.

We have our own Nari Black quarry and a state-of-the-art production site from which we export blocks and slabs worldwide.

Larvik Granite, a Brachot Family Member, is one of the youngest and most successful quarry owners in Norway. Situated in the towns of Larvik and Egersund, our main products are from the Larvikite range, also known as Labrador. Larvik Granite fully owns 6 quarries where different colours of the world-famous natural stone Labradorite are quarried: Blue Pearl, Emerald Pearl, Blue Antique and Silver Pearl.

ELITE STONE GROUP

Stand No. Rashid B193

Premium quality
Italian marble Producer

Elite Stone Group is an Italian ultra-luxury natural stone brand specialized in extraction and production of high-quality stone coming from the own quarries as well from the most exclusive quarries in Italy and all over the world. The main focus of the group is raw material production from blocks to slabs, while unique high-end projects are developed and produced by ES Atelier.

The uniqueness of ES Group consists in specialization in high-end product and internal full circle of production - from the quarry to slabs, cut-to-size, stone engineering and installation of marble for luxury sector, all rigorously made in Italy by our skilled specialists while our rigid control system assures to our clientele guaranteed top quality of product marked ES.

Over the years ES Group has established itself as reliable and high-quality partner for many VIP projects all over the world and today is synonym of ultra-luxury, natural stone beauty and reference point for evaluation of stone. In fact, only in warehouses of ES you can find the most beautiful qualities of exclusive stone.

Our production takes place entirely in Italy and represents the combination of the Group's know-how and expertise in stone production, the use of the best avant-garde processing techniques on the market and the savoir-faire of Italian marble craftsmen, treated accordingly to the best Italian art.

ES group consists of three branches that cover different services:

- Elite Stone - slab division, the largest collection of white Italian marble, exotic onyxes, and unique colored marbles;
- ES Atelier, our high-end project and contract division based in Italy.
- ES group recently opened its own showroom in Dubai, calling it with the name of its best seller - Calacatta Marble. The showroom contains most beautiful collection of Italian marble entirely produced by ES in Italy and today is the unique direct Italian marble producer with its own slabs showroom in UAE.

MARCOLINI MARMI

@marcolinimarmi

Marini Marmi was founded in 1897 by Giuseppe Marini. Headquarter, factory, "Ceppo di Gré®" and "Nuvolato di Gré" quarry are located in Castro on Lake Iseo. Since 1993 the cultivation is run underground.

In the past few years, we have received important international architectural awards, including "World Building of the year 2008" for Bocconi University, a project By the Grafton Architects

From our quarry we extract, process two exclusive natural stones, Ceppo di Gré® and Nuvolato di Gré.

Ceppo di Gré® is a Monogenic dolomitic Breccia employed for both interior and exterior project. It can be used for interior, exterior, urban design and interior design. Ceppo di Gré® is frost and weathering resistant. In the texture honed is also certified anti-slip.

Nuvolato di Gré, for interior design, is a "Breccia dolomitica", veined and brecciated, with a very fine gray grain in light and dark shades with white calcite veining.

MARINI® 1897

Natural beauty is our raw material.

More than thirty-five years of experience selecting, choosing, and transforming marble and natural stone would be nothing without the heart that animates our passion for craftsmanship and well-made products.

We are a group of marble professionals whose work concept is to put the most precious element in the world at the centre of every project, always: the beauty of natural stone.

Our passion for this ancient work is renewed every day: a work which is handed down from generation to generation and is to be taken everywhere: from our land to the cities, the homes and the hearts of all the people who choose us.

Ghirardi is Italy's first and only stone contractor specialising in high-profile natural stone projects.

Thanks to the integrated system of skills, professionalism and problem-solving ability developed over the years (the company has been in business since 1938 and is led by the third generation of entrepreneurs), Marmi Ghirardi is able to create high-profile architectural and artistic projects in natural stone at every stage.

In addition to design consultancy and executive planning, the company has developed the G1938 - Italian Stone Maestro brand, which interprets Italian style in terms of elegance and quality of materials and aims to position Ghirardi in a precise market segment, that of high-end, very high value luxury.

Marmo Elite is an Italian company specialized in luxury stones, such as Brazilian Blue Sodalite, Onyxes, White Italian Marbles and Quartzites.

For more than 30 years Gian Luca Budri, founder and CEO of the company has been travelling around the world looking for new materials and establishing strong relationships with quarry owners.

For this reason, we love to call ourselves Beauty Hunters. Now you can appreciate all these natural beauties in our showroom in Domegliara – Verona, where more than 100 materials are showcased.

Thanks to our HD photo-scanner you can also have a complete outlook of the slabs available from home, checking our website. Moreover, we are specialized in manufacturing lightweight stone panels, combining thin marble slabs with lighter supports, such as aluminum honeycomb or polypropylene.

Extra Stones

Innovation, craftsmanship and eco-sustainability: these keywords define MGI, a solid Italian company group that has reached the brilliant threshold of 75 years among the leaders in the Italian stone industry.

A long history that led MGI to be qualified as a solid entrepreneurial reality specialized in the worldwide supply of the best materials for high-end interior design projects.

Through the years MGI has acquired several quarries and today is quarry owner for a top-range of exclusive Italian marbles:

- Statuario Caldia®
- Calacatta Caldia®
- Cal'dor®
- Bianco Carrara Lapys Grey®
- Perlato Sicilia Cofano®
- Riviera Beige®
- Botticino Classico®
- Verde Issorie®.

The direct selection of the raw material at the source ensures large quantities and high quality, two crucial issues for large-scale projects. MGI Group performs all phases of marble processing, from the extraction to the finished product, according to the ISO protocols and with a careful eye toward the environmental impact.

PETREA SRL quarries, produces and commercialises the Luserna Stone (Pietra di Luserna).

Our Stone is a grey Gneiss who comes from the western Italian Alps. Well known for its versatile function, Luserna stone is an incredible resistant stone that can face salt, freeze and sun. As demonstration of its unicity there is the fact it has been chosen among hundred of stone for the Abu Dhabi Louvre exterior paving, where Salt, Sea and thermal excursion tests any material.

Luserna stone has also a wide range of finishing and usage. It can be splitted and used as a grey porphyry for making paving, wall blocks or very rustical tiles.

Or it can be sawn, and then flamed or brushed. To be used for cut to size, tiles or ventilated facades. Super resistant and super modern, due to its uniform grey: the resistance of granite with a sandstone aspect.

The Frediani family started operating since the thirties, with grandfather Ernesto, in stone field.

In the sixties second generation started the first laboratory in Villalba di Guidonia and then moved to Tivoli. In the nineties brothers Gilberto and Mauro took over the laboratory in Tivoli, buying latest generation machines and choosing skilled workers, succeeded in increasing and improving family business.

Activity is carried on inside two laboratories, one for stone slabs working, as hammering, sandblasting, polishing, smoothing, brushing, cement or putty or resins both transparent and coloured grouting, on one's own account as well as for the account of a third part, and the second one for production of finished products: floors, coatings, thresholds, covers, bathroom tops or kitchen floors, solid works, engravings, inlays, frames.

We commercializes blocks and slabs of any kind of stone material.

Silvestri Marmi was born in the early 2000s, in Carrara, close to the marble quarries of the Apuan Alps of Massa-Carrara. It is a young company but by no means inexperienced. Thanks to the constant commitment of its founder Davide Silvestri and his collaborators in Italy and abroad, it is able to satisfy market demands all over the world.

The company deals with the transformation and sale of various materials, Marble, Stone, Granite, Travertine and Onyx, starting from testing them directly from the quarries, and following the entire manufacturing process up to the finished product. The customer is constantly updated on the various processing phases.

Silvestri Marmi manages to guarantee a very high level of quality, both for the selection of materials, the logistics service, the speed of preparation as well as the shipping of goods.

We can create any type of public or private project, both with the use of local marble and with the use of various types of exotic materials.

STOCCHERO ATTILIO E C. SRL

Stand No. Rashid C194

Stone
Products

Stocchero Attilio e C. S.R.L. has been a well-established company as slabs manufacturer in the Italian marble industry, with the purpose to continue to invest in researching innovative processes.

The company was born in 1983 by the founder Stocchero Attilio. From that moment begins the gradual and continuous growth of the company.

In the 2000s, the North European, German and United States markets expanded making necessary to invest in new machinery and equipment.

In just two years, from 2015 to 2017, the dream of building two salons dedicated entirely to the display of slabs is realized, bringing to light STONE LIVE 1 and STONE LIVE 2, spaces where the customer can admire all the products.

In recent years the company has pioneered investments in Industry 4.0 with innovative machinery which allow it to process about 1,100,000 MQ of slabs annually and effectively satisfy an increasingly demanding market.

ITALIAN QUALITY, GLOBAL MARKET

OMAG SPA, founded in 1979 by Angelo Albani has reached its second generation continuing with the development of an international company combining the past, present and future. Omag Spa is one of the industry leaders in the production of machine tools for processing marble, natural stone, quartzites, glass and ceramics.

The recognized leadership in the sector is a position of merit due to a company concept that OMAG has set itself since the beginning of its industrial path. The level of specialization and experience achieved allow it to achieve projects beyond production standards to meet the personalized needs of its customers.

OMAG does not limit itself designing and building its own machine tools, but has concentrated satellite companies in its production area to cover competences in synergy with each other for global quality control. The seriousness, professionalism and support of competent and punctual after-sales assistance is a strong point for OMAG, an assurance for the customer

PEDRINI SPA AD UNICO SOCIO

Stand No. Rashid C190

Plants and machinery for
natural stone processing

With almost 60 years of experience in the stone field, Pedrini is an international leader in the manufacturing of machines for the processing of natural stone, designing and supplying complete plants.

The experience achieved through the continuous investments in technology, research and human resources have enabled Pedrini to be a valid reference point on the worldwide market. Pedrini has launched on the market many patented innovations such as the multiwire machine Jupiter for the industrial thin cutting, the new planetary calibrating machine Spectra, the new slabs polishing machine Galaxy and the Resin-line with microwave technology.

Moreover, Pedrini After-Sales department assures a great service, creating a real partnership with customers.

SIMEC SPA SOCIETÀ UNIPERSONALE

Stand No. Rashid B197

Machinery and plants for
natural stone processing

SIMEC is in the natural stone processing, ceramic and composite stone sectors, manufacturing complete machinery and plants which are appreciated all over the world for their quality, for more than fifty years.

With 28000 square metres of covered production areas, SIMEC can boast an added value of very high level guaranteed by exclusive use of its specialized staff in designing, constructing and assistance of the entire range of products.

Designing machines which are competitive in performance without disregarding the reliability of each single detail is the industrial philosophy that SIMEC applies in realizing all its products, from large plants to economical machines, achieving quality which has become by now a real reference point for the market

FASTENING SYSTEMS

Since 1976 Steinex is an international leader in the design, construction and distribution of natural stone and concrete splitting machines.

We are driven by values such as the continuous innovation of production technology increasing our customers competitiveness, the creation of tailor-made solutions to meet specific needs, maintaining strong after sale contact and support, a global presence with local assistance in the customer's own language.

The machinery manufactured by Steinex covers a wide range of applications and brands. Some of these include:

- Igloo: machinery for the production of wall stones and dimensional stone
- Sherpa: complete range of conveyors for transporting and managing stone
- Menhir: Range of machinery for splitting large blocks and slabs
- Wind Star: automatic lines for splitting sawn material
- Broadway: specialist machinery for the production of tiles.
- Machinery for sorting and selecting stone
- Tools

SUPER SELVA®
ABRASIVES AND DIAMONDS

Tenax was established in 1956 in the province of Verona from a small company producing mastic for the local and International market, and has developed over the years to become worldwide leader in production and trade of products designed for manufacturing and processing of natural stone. Now it has offices in Italy, Brazil, Usa, Spain, India, Turkey and China and, thanks to heavy investment in R&D and in modern laboratories, Tenax is now able to offer a range of products for natural stone, ceramic, quartz sectors.

The wide range includes: abrasives, gauges, dyes, mastics, colourless transparent resins, reinforcing nets, high adhesion systems, brushes and surface treatments.

The strengths that have allowed this development are:

- Experimentation and continuous research thanks to laboratories equipped with the most modern instruments which make it possible to create forefront products.
- The adoption of stringent quality control systems and excellent production standards.
- A commercial network based on customer assistance by means a widespread global network of technical personnel.

PAD ITALIA STAND A201

Waterjet Corporation was set up in Italy in 1991 and operates as a manufacturer of NC machine tools for high-pressure waterjet cutting of stone, glass, steel and other materials.

The intense search for new technological solutions led to the new hydro-finishing system called Hydrofinish: an eco-friendly technology able to decorate the surface of different materials (floorings, claddings, objects and furnishing) with just a high-pressure water jet without using any abrasive.

The degree of erosion produces various finishing effects on the surface and together with the chromatic variety of each material preserved during the process, this results in decorative effects that cannot be reproduced with other technologies. Our solutions stand out for cutting accuracy, reliability and strong customization.
