

FORMULA 201

# A new skin with no more defects

Formula 201 is a revolutionary treatment that acts at the root of major skin problems.

Formula 201 gently eliminates old skin and promotes the rebirth of a new, flawless, compact and bright skin.

The Formula 201 treatments consist of:  
I) a **professional program** carried out at Histomer aesthetic centres by highly qualified personnel;  
II) a **home care maintenance program** specifically studied and tailored according to the particular clients' needs.  
During the professional program a **complete exfoliation of the upper layers of the skin** is produced, followed by a phase of **immediate regeneration of the skin**, provided by the specific products in the home care program.

## PROFESSIONAL PROGRAM

### Rejuvenating Treatment & Whitening Treatment

#### Assisted Dermal Regeneration Treatments.

With Formula 201 treatments, the expert hands of your beautician will guide you on a course of deep skin regeneration, a true dermal rebirth. A unique process consisting of three different but intimately connected actions.

##### 1<sup>st</sup> action

Consists in **eliminating** the old skin → Exfoliating action by the Alpha Hydroxy Acid chemical peeling.

##### 2<sup>nd</sup> action

Consists in the **rebirth** of a new skin → Plant stem cells bio-stimulant action.

##### 3<sup>rd</sup> action

Consists in **reviving** your face eliminating the initial imperfections → Corrective action by the specific bio-complexes (ODA-C and Argirelifting).

#### Rejuvenating Treatment

It is a true and proper cutaneous dermo-regeneration treatment aimed at reducing also evident facial imperfections, **such as expression wrinkles, loss of skin firmness and elasticity, dark spots and pigmentation.**

**Rejuvenating Treatment** comprises the combination of **Alpha-Hydroxy Acids** (selected for their ability to stimulate cell renewal), **Gardenia Jasminoides Stem Cells** (guaranteeing a major tone and firmness to the skin) and **Argirelifting Complex** (an innovative combination of active ingredients stimulating an action of stretching and filling of expression wrinkles).

#### Whitening Treatment

Provides concrete and lasting results by acting in a non-invasive manner on the skin of the face. Designed to effectively reduce skin chromatic-type imperfections, such as **dark spots and pigmentation**, also acting on wrinkles and loss of elasticity.

**Whitening Treatment** is the result of the combination of **Alpha-Hydroxy Acids**, **Buddleja Davidii Stem Cells** (which stimulate the skin to achieve greater complexion uniformity), and **ODA-C Complex**, a revolutionary combination of active ingredients with a complexion illuminating action coupled with lightening of dark spots of different origin and nature.

## HOME CARE PROGRAM

### Essential for consolidating results

The constant care of your skin becomes an essential factor to continue on that virtuous path of dermal rebirth that the professional Formula 201 treatments will permit you to undertake and will lead you to revive your face with a new illumination.

**Rejuvenating Day Cream**  
50 ml

Day cream that fights all the major signs of skin aging.

**Rejuvenating Night Concentrate**  
30 ml

Night cream for the biological resetting of treated skin. Concentrated formula for an intensive night action.

**Whitening Day Cream**  
50 ml

Removes dark spots and pigmentation, rendering the skin more firm and elastic.

**Whitening Night Concentrate**  
30 ml

Night cream for the biological resetting of treated skin. Concentrated formula for an intensive night action.
