# SKIN AGEING

Our skin is normally subjected to a constant stream of nervous and hormonal stimuli that are essential to maintain its vitality and youthful appearance, and to regulate the many functions it has to perform.

These hormonal stimuli diminish in the course of time, with important aesthetic consequences. Facial features become less harmonious, skin tissue becomes fatigued, losing texture and elasticity, and wrinkles become more evident. These age-related physiological manifestations are known as Chrono-ageing.

TODAY WE CAN FACE THESE PROBLEMS WITH **SKIN BIO-STIMULATION**, AN EMERGING TREND IN MODERN AESTHETIC MEDICINE THAT HELPS THE SKIN REACT TO THE DEEP INTERNAL CHANGES RELATED TO CHRONO-AGEING.

# SKIN AGEING AND BIO-STIMULATION TREATMENTS

## SKIN BIO-STIMULATION IN THE AESTHETIC MEDICINE

**Skin Bio-stimulation** is a rejuvenating technique directly introducing in our skin different substances such as vitamins, hyaluronic acid precursors, aminoacids, anti-oxydants by using microinjections conducted with very fine needle.

The final objective of this technique is stimulating the formation of new hyaluronic acid and reinforcing all the skin structure, especially during the pre and post menopause period.

## HISTOMER INTRODUCES THE SKIN BIO-STIMULATION IN THE PROFESSIONAL AESTHETIC CHANNEL

Today Histomer grants the ultimate skin bio-stimulation non invasive treatments, with fast and visible results, easily comparable with aesthetic medicine micro injection.
