

GENERAL CATALOGUE

COMPANY PROFILE

Etatron D.S. are Italian manufactures of chemical dosing pumps and controllers for 40 years.

The company designs and manufactures a wide range of pumps and control units that address most chemical dosing and monitoring applications. The Company has an in house team of engineers that offer bespoke solutions for chemical handling and control.

Our manufacturing facility in Rome provides for each aspect of manufacturing, assembly and test for our entire product range, each unit is subjected to rigorous test procedures and is supplied with an accessory kit and operating and maintenance manual as a standard specification. Etatron manufactures more than 100,000 units, making us one of the largest European manufacturer of solenoid metering pumps, exporting product worldwide through our network of branch offices and distributors. The products are manufactured under ISO9001:2015 with certain ranges CSA certified, all products are CE and EAC marked and are supplied with a standard 1 year of warranty against manufacturing defects.

A wide range of material options are available to include PP, PVDF, PVC, STST, HASTELLOY our customer support team, who have comprehensive industry knowledge, are at hand to consider specific applications and make recommendations from our product range to ensure full compatibility, you are safe with direct manufacturer support.

Etatron is an environmentally aware manufacturer, considering all international standards in respect to material supply, manufacturing and recycling. We conform fully with the WEEE and RoHS directives, we actively design our products with reuse in mind at the end of their lifecycle.

Whether your requirements are for a basic manually adjustable chemical dosing pump or for a process controller linked to proportionally controlled dosing units Etatron have a solution.

Having now supplied equipment into most operating sectors Potable Water Treatment, Effluent Water Treatment, Leisure, Industry and Horticulture, references are available to verify our abilities.

eONE & eONEB SERIES

The new range of Etatron DS Dosing Pumps, the eOne series, makes an important breakthrough in the market.

Main Features (except for eOne “BASIC”):

1. “clever” control of power depending on the effective dosing conditions
 - a. Flow rate control depending on pressure variation of the installation
 - b. Energy saving
 - c. Low heating of the device
 - d. Low wear of mechanical and electrical components
2. High injection frequency (up to 300 pulses/min)
3. Multitension power supply, 100...250Vac (50/60Hz)
4. **UNDERLOAD** function – suction alarm, for low (end) chemical level, blocking suction valve or damaged suction tube
5. **OVERLOAD** function – dosing alarm, for over pressure inside the pump head, for excessiv operating pressure inside the dosing pipeline, for blocking delivery valve...
6. Diaphragm: PTFE
7. External casing: Reinforced PP and chemical resistant.
8. Pump head made of PP or PVDF, polymer highly resistant, with ceramic ball valves, with all sealings in FPM or TFE/P, which is a new elastomer compatible with a wide variety of chemicals

Basic

“Analogue electromagnetic dosing pump with constant flow”

General Features

- Manual flow rate adjustment by a knob
- Dual scale adjustment: 0 – 20% and 0 – 100%.
- Proportional mode 1:1 by water-meter pulse-sender signal
- Manual air bleed pump head
- Level probe input
- Flow rate: from 2 to 5 l/h
- Maximum pressure: up to 10 bar
- Stroke rate: up to 180 impulses/min

MA

“Analogue electromagnetic dosing pump with constant flow”

eOne Ma is an electronic dosing pump with a “CLEVER” control of power, depending on the effective dosing conditions

General Features

- Flow rate control depending on pressure variation of the installation
- Energy saving
- Low heating of the device
- Low wear of mechanical and electrical components
- Manual flow rate adjustment by a knob
- Dual scale adjustment: 0 – 20% and 0 – 100%.
- Proportional mode 1:1 by water-meter pulse-sender signal
- Manual air bleed pump head. Automatic air bleed available on request
- Level probe input
- Flow rate: from 1 to 30 l/h
- Maximum pressure: up to 20 bar
- Stroke rate: from 180 to 300 impulses/min

MF

“Multifunction Microprocessor Solenoid Dosing Pump”

eOne MF is an electronic dosing pump with a “CLEVER” control of power, depending on the effective dosing conditions

General Features

- Manual air bleed pump head. Automatic air bleed available on request
- Manual flow rate regulation 0÷100%, 0÷300% impulses/min
- Proportional dosing modes (1 x n; 1 : n; 1 x n M; ml x I; L x I; ml x m3; PPM)
- Flow rate control depending on pressure variation of the installation
- Energy saving
- Low heating of the device
- Low wear of mechanical and electrical components
- Daily and weekly timer (16 programmes/day)
- Relay output
- 4-20 mA control
- Flow sensor input
- Stroke rate: from 180 to 300 impulses/min

Plus

“Multi-function Microprocessor Solenoid Dosing Pump With pH, Rx or Cl (ppm) and proportional control”

eOne PLUS is an electronic dosing pump with a “CLEVER” control of power, depending on the effective dosing conditions

General Features

- Flow rate control depending on pressure variation of the installation
- Energy saving
- Low heating of the device
- Low wear of mechanical and electrical components
- High injection frequency up to 300 pulses/min
- Manual flow rate regulation 0÷100%, 0÷300 impulses/min
- Maximum pressure: up to 20 bar
- Manual air bleed pump head. Automatic air bleed available on request
- Flow rate: from 1 to 30 l/h
- Stroke rate: from 180 to 300 impulses/min
- Proportional dosing modes (1 x n; 1 : n; 1 x n M; ml x I; L x I; ml x m3; PPM)
- Measure ranges: 0.00– 14.00 pH; -1000 /+1400 mV Redox; 0÷2, 0÷10, 0÷20, 0÷200 ppm
- Daily and weekly timer (16 programmes/day)
- Relay output
- ON/OFF mode or proportional mode
- DIRECT or REVERSE intervention
- PT100 temperature probe input
- 4-20 mA control
- Flow sensor input
- Hysteresis
- Level probe input

PKX SERIES

PKX metering pumps series are an ideal solution for small dosing with an exceptional price/quality ratio; the mounting bracket (included) simplifies the installation on a wall or on horizontal basin.

Common Features:

- Flow rate up to 7 L/H
- Operating pressure up to 7 bar
- Max stroke rate: 120 impulses/min
- Manual air bleed pump head
- IP65 protection degree
- Wall or foot mounting plastic bracket (included)
- STD Power Supply: 230 Vac 50-60 Hz
- PTFE diaphragm
- Available with removable power cable
- Extra silent version available upon request
- Pump head options include PVDF with ceramic balls and Auto-bleeding
- CE (standard) and CSA certified (on request)

MA/A

“Analogue Solenoid Dosing Pump”

Compact Solenoid dosing pump with configurable foot or wall mount bracket

General Features

- Manual flow rate adjustment from 0 – 100%
- Level probe input (available for PKX MA/AL only)
- Optional power supply: 120 Vac 50-60 Hz / 12Vdc / 24Vac-Vdc
- Flashing LED under working conditions
- PP reinforced housing
- PP pump head with Lip valves

PKX 01 040 01	0702

FT/A

“Proportional Solenoid Dosing Pump”

Compact Solenoid dosing pump with configurable foot or wall mount bracket

General Features

- Proportional dosing mode (Free Tension Contact)
- Volumetric Proportional (F type): 1:1 (1 dose per pulse)
- Volumetric with timer (T type): 1 pulse the pump will dose for a period of time (from 0 to 60 sec) adjustable from 0 to 100%
- Level probe input
- PP reinforced housing
- PP pump head with Lip valves

DLX & DLXB SERIES

The high reliability and the price competitiveness make the DLX series the best proposal in dosing systems market. On request, DLXB (foot mounted) series can be supplied with a stroke length control, which enables - by a knob - to adjust the dosing volume between 20-100%.

Common Features:

- Anti-acid plastic casing
- IP65 protection degree
- Up to 20 l/h and 20 bar
- Wall (DLX) and Foot mounted (DLXB):
- Standard pump head: PP or PVDF body, PTFE diaphragm, ceramic balls, FPM sealings*
- Power Supply: 220-240V - 120V (on request)
- Strokes frequency: 120 strokes/min (from 1l/h to 15l/h) - 150 strokes/m (20 l/h)
- CE (standard) and CSA certified (on request)

*different configurations available upon request

CE
(standard)

MA/AD

“Analogue dosing pump with manual flow rate regulation”

The DLX MA/AD model consists of series of metering pumps enabling manual regulation by knob.

General Features

- Double Manual regulation by knob
- Selectable regulation range: 0-20% or 0-100%
- Level sensor input (on request)

VFT/MBB

“Volumetric digital solenoid dosing pump”

DLX VFT/MBB model consists of a series of metering pumps performing a proportional dosing via a contact water meter

General Features

- 7 segments display
- Operating functions:
 - Digital Manual flow rate adjustment from 0÷100%
 - Proportional dosing functions by reed water meter: 1xn; 1xn (m) 1:n;
- Manual air bleed pump head; from 5 to 15l/h automatic air bleed available on request
- Relay Output
- Level switch connector

MF/M

“Multifunction Digital solenoid dosing pump”

DLX MF/M model consists of a series of multifunction dosing pumps with a microprocessor and a liquid crystal display enabling an accurate injection pulses choice

General Features

- Manual air bleed pump head; from 5 to 15l/h automatic air bleed available on request
- Daily and weekly timer programming (8 programmes/day)
- Operating functions:
 - ON/OFF proportional operating modes,
 - Proportional dosing functions by reed water meter: 1xn; 1xn (m) 1:n; PPM
 - Adjustable 0/4-20mA control
- Flow Sensor input (Alarm)
- Relay Output
- Level probe input
- Clock and Buzzer

pH-Rx-Cl/M

“Integrated Instrumental dosing pump”

DLX pH-Rx-Cl/M model consists of a series of microcontroller dosing pumps with pH, Rx (mV), free Chlorine control and regulation built-in instrument

General Features

- Backlight LCD display
- ON/OFF or proportional operating modes
- pH – RX – Cl inputs. Measuring ranges: 0÷14pH; -1000 ÷ +1400mV; 0÷2ppm; 0÷20ppm; 0÷200ppm; 0÷2000ppm
- Manual air bleed pump head; from 5 to 15l/h automatic air bleed available on request
- Manual/Automatic Temperature compensation 0÷100°C
- Basic and Full Menu
- Hysteresis
- Delay Setpoint setting
- Relay output
- 4 ÷ 20 mA output
- Level probe input
- Proximity switch input
- Alarm setting

pH-Rx/MBB

“Integrated Instrumental dosing pump”

DLX pH-Rx/MBB model consists of a series of microcontroller dosing pumps with pH or Rx (mV), control and regulation built-in instrument.

General Features

- Backlight LCD display
- Manual air bleed pump head; from 5 to 15l/h automatic air bleed available on request
- pH and RX inputs. Measuring ranges: 0÷14pH; -1000 ÷ +1400mV;
- Manual (only) Temperature compensation 0÷100°C
- ON/OFF or proportional operating modes
- Hysteresis
- Switching-on delay
- Level probe input
- Alarms setting

Overall Dimensions

DLX

DLXB

PP-FPM kit

ALL DLX are supplied with a PP-FPM installation kit, made up of 2m discharge PE tube (4x6mm), 2m suction + 2m bleeding PVC crystal tube (4x6mm), PP foot-filter, PP injection valve. Other configurations are available upon request.

1 - 15 l - SCO 00300 02

PVDF-FPM kit

ALL DLX are supplied with a PVDF-FPM installation kit, made up of 2m discharge PE tube (4x6mm), 2m suction + 2m bleeding PVC crystal tube (4x6mm), PVDF foot-filter, PVDF injection valve. Other configurations are available upon request.

1 - 15 l - SCO 00300 01

PP-FPM kit

FPM kit supplied with pumps up to 20 l/h: 2 m discharge polyethylene tube (4x6mm), 2+2m suction + bleeding PVC crystal tube (4x6mm). FPM kit supplied with pumps from 30 to 80 l/h: 2 m discharge polyethylene tube (10x14mm), 2m suction PVC crystal tube (10x14mm).

20 l - 20 bar - 20610 02

Stroke Length Adjustment

The Stroke Length Adjustment mechanism is available for DLXB foot mounting version only. It allows the user regulate the plunger's stroke length from 20 to 100% by pressing and turning the knob up to the stroke length adjustment required. This way is possible to adjust the quantity of product delivered for each injection, performing a more accurate dosing.

BT SERIES

BT series metering pumps are in aluminum box and wall mounting

Common Features:

- Flow rate up to 80 l/h
- Operating pressure up to 20 bar
- Standard pump head: PP or PVDF body, PTFE diaphragm, ceramic balls, FPM sealings*
- 30 – 80 l/h pumps are supplied with PVC pump heads and accessories with fittings for 10×14 tubing
- The casing is in aluminium protected with two coats of epoxy paint
- Manual air bleed pump head; from 5 to 15l/h automatic air bleed available on request
- Control panel protection assured by a transparent polycarbonate cover with gasket
- Level probe input
- IP65 protection degree
- Wall mounted
- Power Supply: 230 Vac 50-60 Hz
- On request power supply: 240 Vac 50-60 Hz; 110 Vac 50-60 Hz
- Strokes frequency: 160 impulses/minute maximum (5-20 L/H models only) - 180 impulses/minute maximum (30-80 L/H models only)
- CE (standard) and CSA certified (on request)

*different configurations available upon request

eTWIN PDE SERIES

The eTwin is a compact, easy-to-use equipment consisting of two dosing pumps and two parameters controllers designed to measure pH, Redox and Chlorine plus the temperature. Mainly conceived for pool's industry, the dosing pumps are available either in peristaltic and solenoid versions.

On request the device could be equipped with complete calibration kit, including sensors and mounting accessories.

Common Features:

- Over dosing alarm
- Power supply: 230V 50-60Hz*;
- PP or PVDF Pump head
- O-Ring: Viton®
- Valves: Ceramic
- Supplied with complete installation kit: Suction hose: PVC Cristal®; Discharge hose: Poliethylene
- level control, alarm output relay
- three relay selectable from the user, set-point (measures + temperature) or timer
- antacid plastic box, backlighted graphic display, wall mounting, IP65 protection degree, complete of installation kit (injection valves, foot filters, suction/delivery tubes).

CE
(standard)

pH/pH “Dosing and Regulation System for two parameters”

General Features

- Backlighted graphic display, 5 keys keypad
- 3 relays completely selectable: on timer mode (weekly/daily) or as an additional set-point (including the temperature)
- 3 programming menus: set-point, calibration, settings
- Measurement range: pH 0 ÷ 14; Temperature 0 – 100 °C (PT100)
- Inputs: level probes; flow sensor; PT100 probe; proximity switch
- Manual dosing (ON-OFF) 0 ÷ 120 pulses/minute
- Proportional dosing by self-regulation of the stroke frequency
- Flow rate up to 5 l/h and pressure up to 6 bar
- Hysteresis
- Activation delay when switched on
- 1 additional relay dedicated to alarm signals
- 4-20mA output fully programmable

EXTRACTABLE INJECTION LANCE

This product allows the injection of the additive to a maximum distance of 20 cm from the attachment point on the main pipe, 1/2" GM connection, for 4x6 tube, maximum flow rate 20 l/h, pressure max. 10 bar. Dosing at certain distance from the inner wall of metal tubes reduces the risk of corrosion. Valve body inspectable also on the field.

(10 bar) PVDF with Valve - Connection - 1/2"

SIGNAL SPLITTER

Signal Splitter to connect two proportional dosing pumps to one water meter.

Signal Splitter
SCA 00171 12

INJECTION VALVE

Injection valve for 4x6 mm tubes. Connection Kit Gc1/2", Gc 3/8" and M10, for 4x6, 6x8 and 10x14 tube with PVDF spring.

PP - CER (from 1 to 140 l/h)	
FPM (Viton®) 1 piece	SVA 00300 02
FPM (Viton®) 10 pieces	KVA 00300 02

pH (buffer solution 4-7) ePool-eTwin-eOne	SCO 00030 05
pH (buffer solution 4-7-9) DLX/BT	SCO 00035 01
Rx (buffer solution 650 mV) ePool-eTwin-eOne	SCO 00030 02
Rx (buffer solution 650 mV) DLX/BT	SCO 00035 02

FLOATING LEVEL SWITCH

Floating level switch complete with plastic support to be linked to the foot filter provided with the pumps. Foot filter weight allows to adjust the floating switch to the desired height inside the chemical tank.

Floating level switch complete with plastic support	
with connector	SSO 00004 02
without connector (eOne)	SSO 01035 02

FOOT FILTERS

Foot filter with ceramic ball valve supplied with pump accessories with connection 4x6, 6x8 and 10x14 tube. Included with plastic support for floating level switch.

PP - check valve (from 1 to 140 l/h)	
FPM (Viton®) 1 piece	SFT 00300 02
FPM (Viton®) 10 pieces	KFT 00300 02
EPDM (Dutral®) 1 piece	SFT 00300 12
EPDM (Dutral®) 10 pieces	KFT 00300 12

PVDF - check valve (from 1 to 140 l/h)	
FPM (Viton®) 1 piece	SFT 00300 01
FPM (Viton®) 10 pieces	KFT 00300 01
EPDM (Dutral®) 1 piece	SFT 00300 11
EPDM (Dutral®) 10 pieces	KFT 00300 11
TFE/P - 1 piece	SFT 00300 21
TFE/P 10 pieces	KFT 00300 21

CONVERSION KIT

Conversion kit for integrated level sensor

Conversion kit	
PVDF without connector (eOne)	KFT 00006 01
PVDF with connector	KFT 00006 11

FOOT FILTER WITH LEVEL SWITCH

Foot Filter with ceramic ball valve, complete with level sensor

PP body, FPM seals, with connector	SFT 01300 02
PP body, EPDM seals, with connector	SFT 01300 12
PVDF body, FPM seals, with connector	SFT 01300 01
PVDF body, EPDM seals, with connector	SFT 01300 11
PVDF body, TFE seals, with connector	SFT 01300 21
PVDF body, TFE seals, without connector (eOne)	SFT 01300 23

PVC REDUCTION NIPPLE

Reduction nipple 1/2" GM to 3/8" GF.

PVC Reduction nipple	
Kit 10 pieces	KRA 00058 01

SUPPORT BRACKET

Stainless steel support bracket for wall or foot mounting for DLXB; HD; BT; BTB; pump series. Polyethylene (PE) support bracket for foot mounted DLX; eOne.

Support	
DLXB - BTB (2mm)	DSU 00050 01
DLXB - BTB (3mm)	DSU 00050 02
HD-BT	403 2033
DLX - eOne	ASU 00065 01

CONNECTORS DLX KIT

Level, meter connectors, service output and relay for DLX.

Connector Kit		
DLX Level and meter connectors	10 pieces	KCN 00012 01
DLX Service output or relay	5 pieces	KCN 00013 01

FLOW SENSOR

Flow Sensor with PVDF PTFE stir bar for eOne dosing pumps with flow rates up to 30 l/h and for BT MA/M, BT MF, DLX(B) MF/M with flow rates up to 20 l/h. Connections for tube 4x6 and 6x8.
Flow sensor with PVC PTFE stir bar for dosing pumps BT MA/M and BT MF, 30 - 50 - 80 l/h.

Flow sensor	
PVDF - TFE/P per eOne	SSN 00012 01
PVDF - TFE/P - DLX/BT with connector	SSN 00012 21
PVC - FPM 30 - 50 - 80 l/h	SSN 00010 01

RELIEF VALVE

Overflow valve, PVC body, PTFE diaphragm. Manual adjustment of opening back pressure. Threaded connections 3/8 "G.F.

Hose nipples kit (2 pump head nipples + 2 hose nuts +2 o-rings).

Relief valve (250 l/h)	
PVC-PTFE-EPDM (Dutral®)	AVA 00101 01
Hose nipples kit	
4x6 PP - FPM	KRA 00053 01
4x6 PVDF - FPM	KRA 00053 11
10x14 PP - FPM	KRA 00054 01

PULSATION DAMPENER

Pulsation dampener, PVC configuration, FPM and EPDM diaphragm, 3/8" gas connection, max pressure 10 bar, volume 0,05 L.

Pulsation dampener	
FPM Membrane	APL 00003 01
EPDM Membrane	APL 00003 02

CALIBRATION CYLINDER

100ml plastic graduated calibration cylinder with bypass PP-PVC

4x6	SCG 00004 01
6x8	SCG 00004 02

CARBOY BUND

High-density polyethylene bund for standard carboys. Provides containment and safety with a maximum capacity of 40L. Can be supplied with a dosing pump mounted to create a dosing unit.

ACA 00024 01	

SOLAR PANEL DOSING SYSTEM

Dosing system for water treatment plants located in areas where electrical power supply is not available (mountain water sources, remotes area, etc.). The solar panel dosing unit is made up of the following components: solar panel - control unit 12/24Vdc - battery 12Vdc.

Version	Flow rate l/h (US Gal/h)	Pressure bar (psi)
0205	2 (0.53)	5 (72)
0303	3 (0.78)	3 (43)
0502	5 (1.32)	2 (29)

Description	
100 W	KPQ 0000 801
145 W	KPQ 0000 601

100 W	
Battery 100 Ah	ABQ 0000 301
Control unit 10 A	ACQ 0000 301
Solar Panel 80 W	APQ 0000 401

145 W	
Battery 120 Ah	ABQ 0000 201
Control unit 20 A	ACQ 0000 202
Solar Panel 150 W	APQ 0000 301

ST-D

“Membrane motor-driven dosing pumps”

The metering pumps **ST-D series** are driven by an electric motor, the dosage takes place thanks to a PTFE membrane. The **ST-D series** pumps make their robustness and reliability their main characteristic.

General Features

- Frequency: from 60 to 120 strokes/min at 50Hz - from 72 to 144 strokes/min at 60Hz
- Die-cast aluminum housing protected by epoxy/antiacid paint
- Max Flow Rate: 123 l/h at 50Hz - 148 l/h at 60Hz
- Standard Power Supply: 230-400V phases 50/60Hz
- Max Pressure: 14 bar
- Motor: 0.18 kW
- Pump head: PP, PVC, SS316 or PVDF
- Valves: balls in ceramic or SS316L
- Ball seats FPM, EPDM or NBR
- Valve seats in PVC or PVDF
- Membrane in PTFE
- IP55 protection degree
- F insulation class

On request

ST-D pumps series can be equipped with

Motorizations:

- Without motor • UL/CSA motor certification • Single-phase motor • Self-ventilated motor
- ATEX motor • Tropicalized motor

Hydraulic:

- NPT hydraulic connections • Larger dimensions valves

Regulation and control by an external signal:

- Electric actuator (automatic adjustment of piston “run” by a 4-20mA signal) • Inverter (automatic adjustment of motor speed by a 4-20mA signal)

D

“Diaphragm motor-driven dosing pumps”

The metering pumps **D series** are driven by an electric motor, the dosage takes place thanks to a NBR/PTFE (material in contact with the liquid) diaphragm. The **D series** pumps make their robustness and reliability their main characteristic.

General Features

- Valves: Single ball with SS316L pump head - Double balls with PVC pump head
- Frequency: 60, 103 and 120 strokes/min at 50Hz - 72 and 122 strokes/min at 60Hz
- Diaphragm in NBR/PTFE - PTFE material in contact with the chemical
- Die-cast aluminum housing protected by epoxy/antiacid paint
- Max Flow rate: 535 l/h at 50Hz - 574 l/h at 60Hz
- Standard Power Supply: 230-400V 3phases 50Hz
- Motor: 0.25 or 0.37 kW
- Pump Head: PVC, SS316L or PVDF
- Max Pressure: 12 bar
- Balls: ceramic or SS316L
- Ball seats FPM, EPDM or NBR
- Valves seats in PVC or PVDF
- IP55 protection degree
- Insulation class: F

On request

D pumps series can be equipped with

Motorizations:

- Without motor • UL/CSA motor certification • Single-phase motor • Self-ventilated motor • ATEX motor
- Tropicalized motor

Hydraulic:

- NPT hydraulic connections • Larger dimensions valves

Regulation and control by an external signal:

- Electric actuator (automatic adjustment of piston “run” by a 4-20mA signal) • Inverter (automatic adjustment of motor speed by a 4-20mA signal)

P

“Plunger Piston Motor-driven pumps”

The metering pumps P series are driven by an electric motor, the dosage takes place thanks to a piston. The P series pumps make their robustness and reliability their main characteristic

General Features

- Valves: PVC pump head – double ball valves, except for piston Ø95 with single ball - SS316L – Single ball, except for piston Ø16 and Ø30 with double balls
- Frequency: 60, 103 and 120 strokes/min at 50Hz - 72 and 122 strokes/min at 60Hz
- Die-cast aluminum housing protected by epoxy/antiacid paint
- Max Flow Rate: 1027 l/h at 50Hz - 1004 l/h at 60Hz
- Max Pressure: 25 bar
- Standard power supply: 230-400V 3phase 50Hz
- Motor: 0.25, 0.37, 0.55 or 0.75 kW
- Pump head: PVC, SS316L or PVDF
- Balls: ceramic or SS316L
- Ball seats: FPM, EPDM or NBR
- Valves seats: PVC or PVDF
- Piston in SS316 or Ceramic
- Piston seals NBR, FPM or EPDM
- Protection degree:

On request

ST-D pumps series can be equipped with

Motorizations:

- Without motor • UL/CSA motor certification • Single-phase motor
- Self-ventilated motor • ATEX motor
- Tropicalized motor

Hydraulic:

- NPT hydraulic connections • Larger dimensions valves

Regulation and control by an external signal:

- Electric actuator (automatic adjustment of piston “run” by a 4-20mA signal) • Inverter (automatic adjustment of motor speed by a 4-20mA signal)

*On request: prices explosion proof protection, zone 21 (DUST)

4 - 20mA o 0 - 10VDC flow rate automatic control

Add to the pump price list - Note: The flow rate diagram of the motor driven dosing pumps provided of this actuator, is usually the one shown in Fig. 1. The automatic adjustment can only be used on pumps with stroke: 9,3 - 10 - 12,3 - 13 - 14,5 - 15 - 20. Otherwise if the pump as 4 mm stroke, the flow rate diagram is like the one shown in Fig. 2. If the control signal were 0 ÷ 10Vdc the two diagrams are absolutely similar. Only the logic of operation is shown in these diagrams. Therefore it should be considered a tolerance of $\pm 5\%$ on the absolute values. the unit requires a 24Vdc and 24 Vac power supply.

Control signal response if the pumps has stroke length: 9,3 mm, 10mm, 12,3 mm, 13 mm, 14,5 mm 15mm e 20mm.

Control signal response if the pumps has 4mm stroke leng (ST-D pump series).

ACCESSORIES

INVERTER

INVERTER for panel mounting • 4 – 20 mA input

230 V – 50 Hz single phase power supply / three phase output – from 0,18 to 0,37 kW motor power (add self-ventilated motor when inverter is used).

AIV 00004 01

230 V – 50 Hz single phase power supply / three phase output – from 0,55 to 0,75 kW motor power (add self-ventilated motor when inverter is used).

AIV 00005 01

ePool

“Peristaltic Pump with built in pH or Rx controller”

The ePool series of peristaltic dosing pumps are perfect for the domestic swimming pools, SPA and wellness centers. These pumps operate on the suction-compression created by rotors on a Santoprene® tube.

General Features

- Possibility to measure two different types of electrochemical variables: pH or Rx
- ON/OFF or proportional activation mode respect to the measure value
- Proportional dosing mode
- Flow rate up to 3 l/h
- Pressure up to 3 bar
- pH measurement range: from 3 to 11 pH
- RX measurement range: from +100 to +999 mV
- Power supply: 230V 50-60Hz
- Maximum power consumption: 15W
- Set point selection
- Type of intervention (direct or inverse)
- Hysteresis
- Delay time of the pump activation
- Over dosing alarm, indicates an overdose situation
- Relay output for signalled alarm status
- Level switch input (included)
- Display: blue/white 16 digits

NEW

PK-Pool

“Peristaltic Pump with built in pH or Rx controller”

The PK Pool series of peristaltic dosing pumps are perfect for the domestic swimming pools, SPA and wellness centres. Mainly designed to be “ready to install” and “user-friendly” for the user.

General Features

- Flow rate 1,5 l/h
- Max Pressure 1,5 bar
- pH measurement range: from 0 to 14 pH
- Rx measurement range: from +0 to +1000 mV
- Power supply: 230V 50-60Hz
- Maximum power consumption: 15W
- Set point selection
- Type of intervention (Acid or Alkaline)
- proportional activation mode respect to the measure value
- Display backlighted
- Supplied with complete installation kit:
 - pH probe or Rx probe with 5 m cable
 - Saddle clamp
 - PP probe holder ½”
 - Buffer solutions: pH 7 & 9
 - Injection valve (PVC/FPM)
 - Foot filter (PP/FPM)
 - 2m suction & 2m discharge tubing
 - Mounting Bracket, to install the pump indifferently on a wall (vertical) or on a tank (horizontal)

eTWIN SERIES

The eTwin is a compact, easy-to-use equipment consisting of two dosing pumps and two parameters controllers designed to measure pH, Redox and Chlorine plus the temperature. Mainly conceived for pool's industry, the dosing pumps are available either in peristaltic and solenoid versions.

On request the device could be equipped with complete calibration kit, including sensors and mounting accessories.

Common Features:

- Over dosing alarm
- set-point with working mode ON-OFF, proportional, hysteresis regulation, delay time for pump activation depending on the set-point value
- Power supply: 230V 50-60Hz*;
- Supplied with complete installation kit: Suction hose: PVC Cristal®; Discharge hose: Poliethylene
- level control, alarm output relay
- three relay selectable from the user, set-point (measures + temperature) or timer
- antacid plastic box, backlighted graphic display, wall mounting, IP65 protection degree, complete of installation kit (injection valves, foot filters, suction/delivery tubes).

CE
(standard)

pH/pH “Dosing and Regulation System for two parameters”

General Features

- Microprocessor controller
- Flow rate up to 3 l/h
- Working pressure up to 1,5 bar
- pH range: 0÷14 pH
- Set point selection
- Direct or Inverse intervention
- Timer mode: daily/weekly
- Level probe input
- Flow sensor input
- Proximity switch
- Pt100 probe (0÷100°C)
- Output: 4÷20 mA
- Relay dedicated to alarm signals

Laundry Control System

The Laundry-S is an automatic system able to manage the supply of detergents and additives in liquid dosage systems for industrial laundries, coming to simultaneously manage up to 4 washing machines, automatically controlling 7 dosing devices, which may be of the peristaltic type, electromagnetic or electromechanical.

General Features

- 230V
- Control up to 7 feeders and 4 different washing machines
- 10 to 128 instructions for each of the 4 washers
- Auto recovery after power failure
- Easy and simple programming
- Input Level control
- alarm output end products
- Programmable phases delay
- Priming and pumps calibration functions.

TECHNICAL DETAILS OF THE CONTROLLER

- N. 7 outputs for peristaltic dosing pumps
- 5 outputs for solenoid valves (one input)
- 1 alarm output
- 1 RS485 port for connection to SATELLITE device
- 1 input for Controller powering
- 1 level control input.

TECHNICAL DETAILS OF THE SATELLITE

- 1 RS485 port for connecting to controller unit and to an additional satellite unit (up to a maximum of 4)
- N. 6 inputs to be connected to the washing machine to detect the status of the program in progress
- 1 output for machine safety block

The complete system consists of:

- Controller Unit up to 40 programs for each plant; the programs are contained inside the internal memory of the controller and can be written directly on the controller or through a special pc software, in this case you need a portable memory, with USB connector - Satellite Unit (one for each washing machine with a maximum of 4) - Master solenoid-valve (water inlet) - Manifold Solenoid metering up to seven seats with non-return valves - Dosing equipments (with a maximum of 7) - solenoid or pneumatic valves for the dosing management in the various washing machines for a maximum of 4 - USB memory for configuration via software (optional).

eControl

“Measure and control instruments”

eControl series controllers are designed to be used in all applications where continuous measurement of the chemical parameters of the water is required. They are made with the use of microcontrollers and have a galvanically isolated measurement stage. The versions are available with single or double measuring channels, independently configurable

General Features

- Controllers with 1 or 2 measure channels
- Measures available: pH, Redox 8mV, Cloro (ppm) and Temperature (C°)
- Timer mode
- Temperature compensation, automatic (by PT100 probe) or manual
- 4-20 mA output, one for each measure
- 2 setpoint with each measure, ON/OFF or proportional working mode
- Hysteresis adjustable on setpoint value; delay time on relay activation
- Alarm MIN e MAX with the measure value
- Overdosing alarm (excessive dosing time)
- Alarm relay, NO or NC (selectable from the user)
- Graphic display backlighted
- Terminal block easy to access by the removal front cover
- Wall mounting version (IP65 protection degree) supplied with mounting bracket
- Input for level probe and level sensor

eControl	
1 measure 100/250V	CXB 70001 01
2 measures 100/250V	CXB 70002 01

Available also the version with box DIN (6 modules) and Rack (72x144), only for the version pH/Rx

eControl Din

AG-S/Control Oxygen

The "AG S/Control" series, based on microprocessor technology, ensures a cost effective solution for the measurement and control of dissolved oxygen. Backlit graphic display, 2 set-points for ON-OFF/Proportional interventions, 2 galvanic separate programmable 4-20 mA outputs, maximum dosing alarm, relay output alarm, relay output for probes cleaning.

AG-S/Control	
OXYGEN	CXB 00097 01

ET-OXY1 Electrode

Electrode for the measurement of dissolved oxygen, INOX body, 0-20 ppm measurement range, maximum temperature 60°C, pressure range 0-4 bar, membrane with Platinum/Silver electrodes, automatic temperature compensation, 12 mm body diameter, PG13,5 screw connector, 5m cable.

ASO 00039 01

AG-S/Control Turbidity

The "AG S/Control" series, based on microprocessor technology, ensures a cost effective solution for the measurement and control of turbidity. Backlit graphic display, 2 set-points for ON-OFF/Proportional interventions, 2 galvanic separate programmable 4-20 mA outputs, maximum dosing alarm, relay output alarm, relay output for probes cleaning.

AG-S/Control	
TURBIDITY 0-20 NTU	CXB 00091 01
0-200 NTU	CXB 00091 11

OUTFLOW Electrode

Outflow electrode for the detection of turbidity, operating according to the method NTU by a photodiode which reveals the quantity of reflected light, range 0-1000 NTU, maximum pressure 1 bar, recommended constant flow 1-15 l/h, PVC body, 1/2" nipple connector – tube with diameter 10x14 mm

ASO 00069 01

Probe and electrodes supplied upon request

eSELECT M SERIES

The eSelect M is a multi-function measuring instrument featuring one (M1), two (M2) or three (M3) measurement parameters suitable for measuring the pH, Rx (Redox), Free CHLORINE (Residual), Total CHLORINE and Conductivity.

The eSelect M range, along with high quality performances and advanced functions, offers several characteristics that make it versatile and easy to use.

Common Features:

- PH and Rx can be selected on the same model by simply programming and using the related probe;
- Free or Total Chlorine measure may be chosen on the basis of the type of sensor used and the relative measuring range: - ion-selective membrane sensors with measure ranges 0-2 Cl ppm; 0-20 Cl ppm; 0-20 Cl ppm (Total); - open type amperometric cell (model CLC) with measure range 0-10 Cl ppm
- Timed AUX outputs programming; Adjustable timer mode; switch-on time programming.
- Suitable for software EtaCloud connection; optional accessory: connectivity kit
- Available boxes: wall mounting (IP65)
- Backlighted graphic display (128x64)
- Start-up delay
- Alarm relay, NO or NC programmable from the user
- Automatic temperature compensation, (by PT100 probe or NTC) or manual

M1 CD Cool

“Instruments to measure and control the electric conductivity”

eSelect-M1 CD Cool is an electrical conductivity measurement and control instrument, specifically designed for cooling towers. The programming menu contains functions specifically designed for this application, while a wide graphic display and a user-friendly navigation menu make it a very simple product for the end users.

General Features

- Automatic monitoring of dosing pumps and solenoid valve by the conductivity measure or by the timer;
- Measure: electric conductivity and temperature (C°)
- Two 4-20mA output, programmable by the user
- 4 setpoint outputs, ON/OFF or PWM (Pulse Width Modulation) working mode;
- Adjustable Hysteresis on the setpoint value; delay time on relay activation
- MAX and MIN alarm on the value measure
- Overdosing Alarm (excessive dosing time)
- Timer built-in for start/stop control of the instrument
- Alarm relay
- Accurated dosing of the chemicals, inhibitor and two biocides;
- Four operative modes for inhibitor dosing;
- Biocides dosing cycles programmable by timer or clock;
- Flow sensor input
- Level probe input

Discharge solenoid valve control, both with conductivity value and in timer mode.

Inhibitor dosing control, directly according to the water discharge (solenoid valve closing) or via internal timer, with the possibility of the proportional dosing via water-meter pulse-sender

Biocide dosing control, with the possibility of controlling two dosing pumps for the biocide with two dosing programs; timed programming with 99 programs for each biocidal product; possibility of blocking pumps during water discharge (solenoid valve open)

M1

“Measure and control instruments”

eSelect-M1 series is a family of controllers with one channel measure (+ temperature). The wide graphic display and the user-friendly navigation make it a very simple product for the end-user. Predisposed for Eatcloud connection, thanks to the **“Connection Kit”** (not included with the controller) the **eSelect-M1** can be managed in a remote way.

General Features

- Available measures: pH, Redox (mV), Free Chlorine (ppm), Total Chlorine (ppm),
- Conductivity and temperature (C°)
- Chlorine measure (ppm) by selective membrane sensor or amperometric cell Platinum-Copper
- 2 setpoint, ON/OFF mode or PWM (Pulse Width Modulation);
- Version pH or Redox, selectable from the user
- Timer mode, connected to auxiliary relay
- N.2 4-20mA outputs, programmable from the user
- Adjustable hysteresis on setpoint value; delay time on activation relay
- Alarm MAX and MIN mode on measure value
- Overdosing Alarm (excessive dosing time)
- Timer built-in to manage start/stop of the controller
- Input for level sensor or flow sensor

M2

“Measure and control instruments”

eSelect-M2 series is a family of controllers using two measurement channels (+ temperature). The wide graphic display and the user-friendly navigation make it a very simple and intuitive product for end-users. Predisposed for Eatcloud connection, thanks to the **“Connection Kit”** (not included with the controller), the **eSelect-M2** can be managed remotely.

General Features

- Measures: pH, Redox (mV), Free Chlorine (ppm), Total Chlorine (ppm), Conductivity and temperature (C°)
- Version pH or Redox, selectable from the user
- Standard versions: pH(Rx)-pH(Rx); pH(Rx)-CL; pH(Rx)-CD
- Timer mode, connected to auxiliary relay
- N.2 4-20mA outputs, programmable from the user
- Chlorine measure (ppm) by selective membrane sensor or amperometric cell Platinum-Copper
- 2 setpoint for each measure, ON/OFF mode or PWM (Pulse Width Modulation);
- Adjustable hysteresis on setpoint value; delay time on activation relay
- Alarm MAX and MIN mode on each measure
- Overdosing Alarm (excessive dosing time) for each measure
- Timer built-in to manage start/stop of the controller
- N.2 inputs for level sensor
- Flow sensor input

M3

“Measure and control instruments”

eSelect-M3 series is a family of controllers with three channels measures (+ temperature). The wide graphic display and the user-friendly navigation make it a very simple product for the end-user. Predisposed for Eatacloud connection, thanks to the **“Connection Kit”** (not included with the controller) the **eSelect-M3** can be managed in a remote way.

General Features

- Measures: pH, Redox (mV), Free Chlorine (ppm) and temperature (C°)
- Standard version: pH – Rx – CL
- Timer mode, connected to auxiliary relay
- N.3 4-20mA outputs, programmable from the user
- Chlorine measure (ppm) by selective membrane sensor or amperometric cell Platinum-Copper
- 2 setpoint for each measure, ON/OFF mode or PWM(Pulse Width Modulation);
- Adjustable hysteresis on setpoint value; delay time on activation relay
- Alarm MAX and MIN mode on each measure
- Overdosing Alarm (excessive dosing time) for each measure
- Timer built-in to manage start/stop of the controller
- N.3 inputs for level sensor
- Flow sensor input

pH-Rx-CL	
CXB 50 451 01	100/240V

ETA CLOUD

The **EtaCloud** software supports remote control of all the operating and programming parameters of the eSelect-M. The user, via smartphone, tablet or PC, can perform all monitoring and control operations from the device connected to the Internet, exactly as if he is facing the controller. The software sends - via email - alarms and status changes to the operator, thus enabling remote technical service.

The connection with **EtaCloud** takes place thanks to the **Connectivity Kit** (not included with the instrument), which consists of an RS485/USB cable, an external module and a 5V power supply.

Overall Dimensions

Connectivity kit

Eatacloud connection is possible through the connectivity kit (to be purchased separately).

The kit is made up of an external black module, RS485/USB cable (to be connected to the controller) and a power supply. LAN cable is required to be connected to the router or extender.

KST 00001 01

NEW

eSelect M TOUCH “Measure and control Instruments”

eSelect-M TOUCH series is a family of controllers with four channels measures (+ temperature). The wide 7” touch display and the user-friendly navigation make it a very simple product for the end-user. Predisposed for Eatacloud connection, thanks to the “**Connection Kit**” (not included with the controller) the eSelect-M TOUCH can be managed remotely.

General Features

- Measures: pH, Redox (mV), Free Chlorine (ppm) Total
- Chlorine (ppm) and temperature (C°)
- Standard version: pH – Rx – CL- CL tot.
- N.1 4-20mA outputs, programmable from the user, for each measure
- Chlorine measure (ppm) by selective membrane sensor or amperometric cell Platinum-Copper
- 1 setpoint for each measure, ON/OFF mode or PWM (Pulse Width Modulation); (2 set points only for the first measure)
- Adjustable hysteresis on setpoint value; delay time on activation relay
- Alarm MAX and MIN mode on each measure
- Overdosing Alarm (excessive dosing time) for each measure
- Alarm relay, NO
- LCD Touch Display (800x480 pixel)
- Timer built-in to manage start/stop of the controller
- Start-up delay
- N.1 inputs for level probe for each measure
- Flow sensor input
- 3 Time-programmable AUX outputs
- Possibility to enter Administrator Password

CONTROL AND REGULATING SYSTEMS

pH-Rx Control Unit

Control and regulating system for pH and Redox, made of eSELECT-M2 controller, block valves, connection for tube 10x14 mm, water filter with washable net cartridge 150 microns, methacrylate probe holder, pH electrode with plastic body with cable 1 mt (Tmax=60° C Pmax=6 bar) working range 0÷14 pH, Redox electrode with plastic body with cable 1 mt (Tmax=60° C Pmax=6 bar) working range ± 1.000 mV, 4 buffer solution 55ml bottles (pH 4, 7, 9 and Redox 650 mV), 2 manual pumps wiring connection available in the central box trunking. Suitable for software EtaCloud connection; optional accessory: connectivity kit.

Panel dimensions 400 x 600 x 0.80 mm

P Cl-F Control Unit

“with flow control and adjustment system”

Control and regulating system for free chlorine, made of eSELECT-M1 controller, block valves, connection for tube 10x14 mm, water filter with washable net cartridge 150 microns, methacrylate probe holder with proximity switch and adjustment flow system, manual sampling, free inorganic and organic chlorine probe, (0 – 20) ppm measuring range, probe shows low pH dependence (pH working range 4- 12 pH), chlorine measuring is not affected by isocyanuric acid, surfactants/floculants presence, the probe is automatic temperature-compensated, 0,7 mt probe cable, 1 manual pump wiring connection available in the central box trunking. The unit required a constant flow rate between 30 and 40 l/h, do not exceed the maximum operating pressure of 1 bar (free discharge at probe holder outlet) while water temperature cannot overcome 45°C. The probe has integrated temperature compensation. Suitable for software EtaCloud connection; optional accessory: connectivity kit.

pH-Cl-F P Control Unit

“with flow control and adjustment system”

Control and regulating system for free chlorine and pH, made of eSELECT-M2 controller, block valves, connection for tube 10x14 mm, water filter with washable net cartridge 150 microns, methacrylate probe holder with proximity switch and adjustment flow system, manual sampling, free inorganic and organic chlorine probe, (0 – 20) ppm measuring range, probe shows low pH dependence (pH working range 4-12 pH), chlorine measuring is not affected by isocyanuric acid, surfactants/floculants presence, the probe is automatic temperature-compensated, 0,7 mt probe cable, pH electrode with plastic body with cable 1 mt (Tmax=60° C Pmax=6 bar) working range 0÷14 pH, 3 buffer solution 55ml bottles (pH 4, 7 and 9), 2 manual pumps wiring connection available in the central box trunking. The unit required a constant flow rate between 30 and 40l/h, do not exceed the maximum operating pressure of 1 bar (free discharge at probe holder outlet) while water temperature cannot overcome 45°C. The probe has integrated temperature compensation. Suitable for software EtaCloud connection; optional accessory: connectivity kit.

NEW

ETA CLOUD

The **EtaCloud** software supports remote control of all the operating and programming parameters of the eSelect-M. The user, via smartphone, tablet or PC, can perform all monitoring and control operations from the device connected to the Internet, exactly as if he is facing the controller. The software sends - via email - alarms and status changes to the operator, thus enabling remote technical service.

The connection with **EtaCloud** takes place thanks to the **Connectivity Kit** (not included with the instrument), which consists of an RS485/USB cable, an external module and a 5V power supply.

Connectivity kit

Etacloud connection is possible through the connectivity kit (to be purchased separately). The kit is made up of an external black module, RS485/USB cable (to be connected to the controller) and a power supply. LAN cable is required to be connected to the router or extender.

KST 00001 01

ePhoton

Photometric controller with microprocessor technology. Wall mounting, electronic size IP65 protection degree. Backlighted graphic Display. Internal data logger with 4MB memory Flash da 4MB for data storage. Free Chlorine and combined Chlorine: measure range 0.00÷5.00 ppm, resolution ±0.01 ppm Cl₂; accuracy ±2%, repeatability 98%. Selectable analysis time: 3...999 minutes pH measure: measure range 0.00÷14.00 pH, resolution ±0.01pH. accuracy ±1% Rx measure: measure range -1500...+1500 mV, resolution ±1 mV. accuracy ±1% Temperature measure (PT1000 sensor): measure range 0.0 ÷ 50.0°C, resolution ±0.1°C. accuracy ± 0.2°C, repeatability 99%.

General Features

- Set point Chlorine and Set point pH: Nr. 2 Relay outputs ON and OFF selectable, proportional in PWM mode, max 5A - 250V, timed output, priority clock output during the 24H.
- Set point Redox and Set point combined Chlorine: Nr. 1 Relay output ON and OFF selectable, proportional in PWM mode, max 5A - 250V, timed output
- Relay output for anti-algae/flocculant with clock selectable control during the 24H, max 5A, 230V
- General alarm relay, max 5A - 250V (water absence, reactive absence, Time-Out set point Chlorine/pH, measure cell dirty or damaged, led faulty)
- Digital input for set-point inhibition
- working temperature 5 ÷ 45 C. working humidity 10 ÷ 95%
- RS485 connection (MODBUS RTU protocol)
- power supply 85-265Vac / 50-60Hz.

ePhoton EL pH-Cl₂/T

Photometric, fibre optic, multi-parameter microprocessor control unit. Wall mounting with degree of protection of the electronic section IP65. Backlit graphic display. Measurement of free chlorine 0.00÷5.00 ppm, resolution ± 0.01 ppm Cl₂. Accuracy ± 2%, repeatability 98%. Programmable analysis time from 2 to 300 minutes pH measurement: Measuring range 0.00÷14.00 pH, resolution ± 0.01 pH. Accuracy ±1% Measurement Temperature (NTC sensor). Measuring range 0.0 ÷ 50.0°C, Resolution ± 0.1°C. Accuracy ± 0.2°C, repeatability 99%.

General Features

- Chlorine/ pH set point: No. 3 ON/OFF relay outputs (2 for Cl₂ - 1 for Ph . Max load 3A - 230V.
- Relay Cumulative alarm, max load 3A - 230V (lack of water through static flow sensor, lack of reactive Time-Out set point chlorine/pH, dirty/foul cell, burnt-out led).
- Working temperature 5 ÷ 55 °C. Operating humidity 10 ÷ 95%.
- Provision for display repetition via radio and PC - GPRS connection for web connection web
- - Hydraulic circuit under pressure
- - Power supply 85-265Vac / 50-60Hz.

PORTABLE INSTRUMENTS

POOLTESTER AF 105 LOVIBOND

Test for water analysis of Free Chlorine (with DPD method) and pH measured simultaneously in two independent cells. Measurement range: Cl 0.1-3.0mg/l, pH 6.8 – 8.2.

Reagent for manual tester. DPD method for measurement of Free Chlorine and Bromine in water.

Blister pack for manual tester containing 30 tablets for Free Chlorine (DPD1) and 30 tablets for pH level.

Reagent for manual tester for determination of pH level.

Reagent for manual tester to determine the value of Free Chlorine (DPD1 method) and Total Chlorine (DPD1+DPD3 method).

MIXERS

AGV SERIES

Swift mixers with rigid coupling by motors 4–6–8 poles equipped with a support Radial bearing and seal ring. These mixers are particularly suitable for mixing or dissolution of products with low viscosity in little – medium tanks. Maximum rating of kW 5 white single or double staffing boxes. 3-ph motors. Materials SS 304L (standard).

motor power	Shaft Length	Rotor diameter
0.18 kW	600 mm	100 mm
0.25 kW	600 mm	110 mm
0.37 kW	800 mm	120 mm
0.55 kW	900 mm	140 mm
0.75 kW	1000 mm	150 mm
1.1 kW	1250 mm	160 mm
1.5 kW	1500 mm	170 mm

AGR-V SERIES

Slow mixers specific for flocculant/neutralizer or for flocculant solution preparation. The shaft of the mixer is directly key coupled with the hollow of the Worm gear box, supplied with shaft and impeller 4 blades 45°. 3- ph motors, upon request 1-ph motors for power supply lower then 0,37 kW. Materials SS 304L (standard).

motor power	Shaft Length	Rotor diameter	RPM
0.18 kW	700 mm	200 mm	140
0.25 kW	800 mm	300 mm	90
0.37 kW	1000 mm	350 mm	90

1.1 kW	1500 mm	550 mm	90
1.5 kW	1500 mm	700 mm	70

AF SERIES

Motor driven high speed mixers for small tanks (200 lt) capacity, with shaft bearings sealed by a “V” ring to protect from external vapours. Motor 4 pole, 1400 rpm. Mixer support flange made of PP mounted directly on the tank. Shaft and impeller in stainless steel 316L or PP covering a steel core. Impeller flow cone type.

FLOW METER

The electromagnetic induction flow meters consist of a measuring stub for circular section pipes, available in Flanged, Wafer, Threaded or Clamp versions for the food industry.

The measuring tube is made of AISI 316 stainless steel internally coated in plastic material (hard or soft rubber, PTFE, EFTE, Rilsan, PFA, PVDF), with 4 standard measuring electrodes in AISI 316 Ti stainless steel or other materials for specification required (Hastelloy, Titanium, Tantalum).

The meter is protected externally by a cylindrical cover with flanges, standard EN1092-1 PN10 ÷ 100, in carbon steel painted with epoxy treatment. All versions > DN20 are standard equipped with two additional electrodes for grounding the liquid and checking the presence of air or empty pipe. Standard executions DN4 ÷ DN600 with variations according to the internal coatings.

FLOW CONVERTER

The flow converter in combination with the electromagnetic induction measuring sensors has microprocessor electronics housed in a painted aluminium case, available in compact execution, mounted on the measuring tube, or for independent mounting.

2-line x 16-character alphanumeric backlit LCD display, multilingual for instantaneous and totalized measurement programming and display, rotatable through 350 °

Digital outputs: 2 with pulses for totalization (max 400 Hz) and status threshold, configurable, Analog output: 4-20 mA configurable and optional HART

Communication (Option): RS485 Modbus

Power supply: 110-230 VAC (Optional 24 VAC / DC), Protection: IP65 standard optional IP67 or IP68 for the meter in a separate version

Extra price for separate version

Shield cable (min 10 meters)

Pulse Output + 4-20 mA + RS485 Modbus

DOSING SYSTEMS

DOSING UNITS AND SKIDS

Etatron DS manufactures dosing units and skids in order to provide the customer with systems for dosing chemical products/reagents in the various processes in industrial or water treatment plants; the systems are designed directly by our qualified staff or on the indication and/or according to the customer's technical specifications.

Our systems are designed to meet the needs of the various sectors:
Primary water treatment, Industrial water, and wastewater treatment, Oil and gas, Automatic systems for the preparation and dosage of polyelectrolyte, Coagulant and flocculant preparation, Storage and dosage of reagents, Cooling circuits, Boilers...

Depending on your needs, the systems can include the following equipment:
Storage tanks, Level controls, Dosing pumps, Electric stirrers, Multiparametric controllers (pH, ORP, Conductivity, Chlorine...), Flowmeters.

The dosing skids are made with specific materials, chemically compatible with chemical products dosed.

For eSelect M	SPS 00012 05

DOUBLE PROBE HOLDER

Probes holder for amperometric ion-selective probes and either pH or Rx or temperature probes. • Manual sampling • Max pressure 5 bar (73 psi)

double probe holder	
For AG-Select – eSelect - DLX(B)/BT pH-Rx-Cl/M - eControl - BT pH-Rx-Cl/M - eOne Plus - eTwin. Flow rate adjustment and 2 wires proximity switch - Plexiglass/PP - max temperature 45°C (113° F).	SPS 00020 01
For eSelect M - Proximity switch - Plexiglass/PVDF/PP - max temperature 70°C (158° F).	SPS 00020 05

TRIPLE PROBE HOLDER

Probes holder for pH, Rx, amperometric ion-selective and temperature probes. Flow rate adjustment and 2 wires proximity switch • Plexiglass/PP • Max pressure 5 bar (73 psi), max temperature 45°C (113° F).

triple probe holder	
For AG-Select – eSelect – eControl - DLX(B) pH-Rx-Cl/M – BT(B) pH-Rx-Cl/M - eOne Plus - eTwin Flow rate adjustment and 2 wires proximity switch - Plexiglass/PP - max temperature 45°C (113° F).	SPS 00018 01
For eSelect M - 3 wires proximity switch - Plexiglass/PP - max temperature 45°C (113° F).	SPS 00018 05

PROXIMITY SWITCHES

Proximity sensor for probe holders and for Hychlor chlorine amperometric cell.

proximity switches	
2-wire N.O. - AG-Select – eSelect – eControl - DLX(B) pH-Rx-Cl/M – BT(B) pH-Rx-Cl/M - eOne Plus	ASO 00007 12
2-wire N.C. - DLX(B) pH-Rx/MBB – BT(B) pH-Rx/MBB - ePool	ASO 00007 03
3-wire - STRUMENTI SERIE R, B, MULTICONTROL	ASO 00007 01
3-wire - per/for eSelect M	ASO 00007 04

INLINE PP ELECTRODE HOLDER

Inline electrode holder 1/2" conical fitting in PP, for pH and Rx electrodes. Max pressure 5 bar (73 psi).

inline PP electrode holder	
	DPS 00023 01
with O-ring 3062	KPS 00023 01

INLINE PVC ELECTRODE HOLDER

Inline electrode holder for pressure up to 5 bar (73 psi) and temperature up to 45° C. GM 1/2" fitting in PVC, for pH and Rx electrodes. Other materials upon request.

In line electrode holder	
PVC	2143 001

CLAMP SADDLE

Clamp Saddle for electrode holder. For 3/8" injection valve, use KRA 00058 01 nipple page 21.

clamp saddle	
½" GF - DN50	AFA 00006 02
½" GF - DN63	AFA 00008 02

INLINE SS ELECTRODE HOLDER

In line SS electrode holder C. GM 1/2", PG13,5 threaded connection.

in line SS electrode holder	
1/2" GM connection	DPS 00016 01

SUBMERSIBLE ELECTRODE HOLDER

PVC submersible tubular electrode holder. Length 50 cm. For pH and Rx (ORP) electrodes.

submersible electrode holder	
0,45 m	2143 002
1 m	2143 003
1,5 m	2143 004
2 m	2143 015
upon request	
PP support bracket	SFL 00105 01

PT100 TEMPERATURE PROBE

PT100 Temperature Probe 1/2" connection in PVC, tap type, 5mt cable - 16.4 feet. Tmax 45°C, Pmax 5 bar.

PT100 temperature probe	
PVC 1/2" connection	ASO 00003 02

TEMPERATURE PROBE

PT100 temperature probe, measuring range 0÷100°C, for electrode holder, cable length 5 mt.

temperature probe	
acciaio - stainless steel	ASO 00026 01
vetro - glass	ASO 00025 01

pH PLASTIC BODY ELECTRODE

pH electrode with polycarbonate body to be used. Measuring range 0÷14 pH. Other electrodes types or other cables length upon request.

pH plastic body electrode	
6 m - 19,7 ft cable - 4 bar 60° C	AEL 00019 03
1 m - 3,3 ft cable - 4 bar 60° C	AEL 00019 02
with screwable connector - no cable supplied - 5,5 bar 80° C	AEL 00077 01

Rx PLASTIC BODY ELECTRODE

Redox (ORP) electrode with polycarbonate body to be used. Measuring range: ± 1.000 mV. Other electrodes types or other cables length upon request.

Rx plastic body electrode	
6 m - 19,7 ft cable - 4 bar 60° C	AEL 00020 03
1 m - 3,3 ft cable - 4 bar 60° C	AEL 00020 02
with screwable connector - no cable supplied - 5,5 bar 60° C	AEL 00040 01

GLASS BODY ELECTRODE

Glass body pH or Rx electrodes. Measuring range: pH: 0÷14 pH - Rx: ± 1.000 mV. Other electrodes types upon request.

glass body electrode whit cable		
5,5 bar - 80°C - pH - 5 m - 16,4 ft	AEL 00022 03	
5,5 bar - 80°C - Rx - 5 m - 16,4 ft	AEL 00023 03	
5,5 bar - 80°C - pH - 1 m - 1,6 ft	AEL 00022 02	
5,5 bar - 80°C - Rx - 1 m - 1,6 ft	AEL 00023 02

12880 μ S/cm	ASZ 00 010 01

IMPEDANCE ADAPTOR

Impedance Adaptor for pH-Rx electrodes, allows user to install electrodes at long distance (up to 200mtr) from the controller without problems of interference on the signal transmission, item supplied in watertight connection box (IP65). The adaptor is powered by an internal battery with several years' operating life.

1 ACS 006

ELECTRODES HOLDER

Electrodes cell which can be used for a maximum of two probes. Available in PVC and polycarbonate. Supplied with support bracket and brass interconnection valve. Max pressure 5 bar (73 psi), max temperature 45°C (113° F). Available with flow sensor.

PVC electrodes holder	
Electrodes not included	SPS 00015 01
PP electrodes holder	
Electrodes not included	SPS 00015 02
Outflow PVC electrodes holder with flow switch	
Electrodes not included	SPS 00025 01

FREE INORGANIC AND ORGANIC CHLORINE

Low pH dependence - Compatible with presence of Isocyanuric Acid, Surfactants/Flocculants - Automatic temperature compensation - pH working range: 4÷12 - Required constant flow rate: 30-40l/h - Max. working pressure: 1 bar - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 - 20) ppm	ASO 20001 01
(0 - 2) ppm	ASO 20001 02

cable for amperometric sensor	
0,7 m - DLX/BT/Controllers	SCV 20010 01
0,7 m - For DLXB	SCV 20010 11
0,7 m - eOne/eControl/eTwin/eControl Din-Rack	SCV 20013 01
2 m - eSelect M/eSelect SR	DCV 20013 01

TOTAL CHLORINE

Low pH dependence - Compatible with presence of Isocyanuric Acid, Surfactants/Flocculants - Automatic temperature compensation - pH working range: 4÷12 - Required constant flow rate: 30-40l/h - Max. working pressure: 1 bar Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 - 20) ppm	ASO 00016 03
(0 - 2) ppm	ASO 00016 04

FREE INORGANIC CHLORINE

Not compatible with presence of Isocyanuric Acid, Surfactants/Flocculants - Automatic temperature compensation - pH working range: 4÷8. Operative pH-level must remain constant - Required constant flow rate: 30-40l/h Max. working pressure: 1 bar - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 – 200) ppm	ASO 00016 05
(0 – 20) ppm	ASO 00016 01
(0 – 2) ppm	ASO 00016 02
(0 – 2) ppm - 1 bar - 70° C	ASO 00016 12

INORG. FREE CHLORINE FOR POTABLE WATER HIGH PRESSURE. OPEN CELL

High pH dependence - Not compatible with presence of Isocyanuric Acid, surfactants, flocculants, iron and manganese - Automatic temperature compensation - Required constant flow rate: 30-40l/h - Max. working pressure: 5 bar - Max. working temperature: 50°C - Requires dedicated probe holder on request. Cable not supplied.

sensors	
(0 – 10) ppm	ASO 00020 01

HYDROGEN PEROXIDE

Compatible with presence of Surfactants Automatic temperature compensation pH working range: 2÷11 - Required constant flow rate: 30-40l/h - Max. working pressure: 5 bar (with snap-ring) - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 – 200) ppm	ASO 00033 01

PERACETIC ACID

Tensides and conductivity acids are tolerated - Compatible with presence of Surfactants - Automatic temperature compensation - pH working range: 2÷6 Required constant flow rate: 30-40l/h Max. working pressure: 1 bar - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 – 200) ppm	ASO 00032 01

CHLORINE DIOXIDE

Not compatible with presence of Surfactants Automatic temperature compensation pH working range: 1÷14 Required constant flow rate: 30-40l/h - Max. working pressure: 1 bar - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 – 20) ppm	ASO 00031 01
(0 – 2) ppm	ASO 00031 02
(0 – 2) ppm - 8 bar - 70°C	ASO 00031 03

CHLORINE DIOXIDE WITH SURFACTANTS

Compatible with presence of Surfactants Automatic temperature compensation pH working range: 2÷12 - Required constant flow rate: 30-40l/h - Max. working pressure: 1 bar - Max. working temperature: 45°C. Cable not supplied.

sensors	
(0 – 20) ppm	ASO 00043 01
(0 – 2) ppm	ASO 00043 02

OZONE

Low pH dependence - Automatic temperature compensation - pH working range: 2-11 - required constant flow rate: 30-40l/h - Max. working pressure: 1 bar - Max. working temperature: 50°C. Analogic output signal 0-2.000mV. Cable not supplied.

sensors	
0,05 – 20.00 ppm	ASO 00055 01
0,05 – 2.00 ppm	ASO 00055 02

MEMBRANES

The membrane cap filled with electrolyte forms the measurement chamber in which the measuring part is dipped. A micro-porous membrane separates the measuring compartment from the sample to measure. The membranes are supplied with emory cloth.

membranes	
organic-inorganic free chlorine probe	AME 00003 01
inorganic chlorine	AME 00004 01
hydrogen peroxide/ Peracetic acid	AME 00009 01
chlorine dioxide	AME 00011 01
ozone	AME 00012 01

ELECTROLYTE GELS

Bottle of electrolyte gel filling membrane cap replacement (100 ml).

gel	
free organic chlorine probe, 100ml	ASZ 00022 01
free inorganic chlorine probe, 100ml	ASZ000 23 01

HYCHLOR

Sodium Hypochlorite probe able to work as electrode holder for pH, Rx, and Temperature with 2 wires flow sensor inclusive. It can be connected to any AG SELECT controller series with adaptor SCA0001101; 3 wires flow sensor suitable for R, B and Multicontroller instruments. It needs constant water flow rate between 40÷60 l/h. Measuring range 0÷2 mg/l Cl₂. Constant pH value comprised between 6÷8 pH. Valve for cleaning chemicals injection, easy cleaning balls access from top of the holder. Maximum working pressure 5 bar. Chlorine probe cable length: 2 mt – 6.5 feet.

hychlor		
For AG-Select 2 fili/wires – eSelect – eControl - DLX(B) pH-Rx-Cl/M – BT(B) pH-Rx-Cl/M - EONE PLUS	SPS 00 022 01	
3 wires serie R, B e MULTICONTROL	SPS 00 022 03	

SIGNAL ADAPTER

Signal adapter to connect controller's series AG-SELECT or metering pumps series DLX(B) - pH-Rx-Cl / F (MB) with copper / platinum amperometric probe (HYCHLOR).

signal adapter	
	SCA 00011 01

COPPER-PLATINUM ELECTRODES

Spare part for probe self-cleaning HYCHLOR, measuring part composed by copper-platinum electrodes, FPM OR. 3 mt - 9,8 feet cable.

copper-platinum electrodes	
	SEL 00050 01

GLASS SPHERES

Kit of 30 Pyrex glass spheres for self-cleaning HYCHLOR probe.

glass spheres	
Pyrex	KSF 00001 01

GRAPHITE CONDUCTIVITY PROBES

PTFE body, conductivity probes with graphite electrodes. The probe constant is $K = 0,6 \text{ cm}$, corresponds to $0 \div 100 \text{ mS}$ measure range. All probes can be supplied completed with Pt100 temperature integrated sensor (other upon request) for the measure compensation. These probes are suitable for all normal industrial and laboratory applications. They can be installed on submersible probe holder, electrode holder and on some inline probe holders. PTFE body, 12 mm diameter, 120 mm length, graphite measure electrodes, working temperature range $-5 \div 100^\circ\text{C}$, with 5m cable.

with temperature sensor

ASO C4111 00

CONDUCTIVITY PROBE

Conductivity cell $1/2''$ with graphite electrodes, protection cap, max pressure 5 bar, integrated temperature probe PT100, cable length 5m - 16.4 feet, cell constant $K=1 \text{ cm}$, measuring range $0 \div 40000 \mu\text{S}$.

cd integrated temperature probe

TERMS AND CONDITIONS OF SALE

- 1. PRICES** - Price quoted are exclusive of VAT, transport or special packing unless otherwise agreed.
- 2. DELIVERY** - Any time or date for delivery indicated by the Company, either in the quotation or in the order confirmation reply, shall be treated as approximate only. Whilst every effort shall be made to deliver the goods on time, the Company will not accept any liability for failure to deliver within the indicated date and shall not be liable for any loss or damages arising directly or indirectly from such failure except as otherwise agreed by the Company with a written document.
- 3. PAYMENT** - The terms of payment shall be stipulated at the time of the agreement or by the Company quotation of the Conditions of Sale; no rounding off, subtraction or discount can be accepted without the Company prior written consent. The Purchaser shall not be entitled to suspend or retain any part of the payment as counterclaims or for any dispute whatsoever, even if legitimate.
- 4. CLAIMS** - Purchaser claims concerning the quantity, type and models of the goods supplied must be submitted within eight days of receiving date; claims concerning quality or damaged goods will be considered by the Company only within eight days of noticing the claim or defect. The Company will make every effort to replace or repair the goods at earliest time possible.
- 5. WARRANTY** - The company provides a guarantee on its products for a limited period of 1 years, EX-FACTORY; this excludes all wearing items such as: valves, gaskets and seals, nipples, tube nuts, tubing, filters, injection valves, non return valves, glass components (electrodes). Furthermore the warranty does not cover goods damaged because of: a) Use of the equipment contrary to the Company instructions. b) Improper installation. c) Repair, alteration and improper taking apart of the equipment without the Company written authorization. d) Damages caused by natural events and/or unexpected circumstances (e.g. thunders, fire, freeze, etc).
- 6. RETURN OF GOODS** - The Company will not accept the return of goods without the prior approval and only after written consent of a Company authorized-person.
- 7. DISPUTES** - Any returned goods must always be accompanied by the customer's official letter headed, delivery note. Under no circumstances will the Company accept returned goods that do not comply to the above indications.

Any dispute arising with regards to the terms of the condition of sale shall be settled in the court of Rome under Italian law and commercial customs.

WARNING - All the products are manufactured according to regulation  - Standard electrical supply: 220/240 V / 50 - 60 Hz. Other power supplies upon request. Upon request CSA certification can be provided for some products (valid for USA/Canada). 

About this document: We have tried to make this document comprehensive and factual. We reserve the right to make changes at any time without notice, to prices, colours, materials, specifications, models and availability.

This document may have been updated since the time of printing. Contact ETATRON DS SPA for complete technical specifications.
