

What is WebSite X5

WebSite X5 is a software that guides you through each step of creating professional websites, online stores, and blogs, without needing to code. Follow the program's 5 steps, take advantage of the Drag & Drop editor, use template and object presets and the artificial intelligence-based text generation assistant to easily create responsive sites that are compatible with all browsers and the latest mobile devices.

WebSite X5 is yours forever, with no monthly fees. The license includes hosting, you can work on 2 PCs and it allows you to create as many sites as you like. Plus, since the software is installed on your PC, you can work anywhere, any time, even without an Internet connection.

- 1 SET UP YOUR PROJECT**
 Select the type of website you'd like to create and activate the features you'll need: shopping cart, blog, secure pages, etc.
- 2 CUSTOMIZE YOUR TEMPLATE**
 Adjust your design: define the structure and content of your template with the internal editor.
- 3 ORGANIZE YOUR SITE**
 Add all the pages you need. A navigation menu will be created according to the site map, which is active from the very first click.
- 4 CREATE THE PAGES**
 Text, photo galleries, videos, forms, social media buttons, etc. Drag & Drop makes it easy.
- 5 GO ONLINE USING THE WEB HOSTING INCLUDED**
 Take advantage of WebSite X5 Hosting, the new web space included in the license, to publish your website via the internal FTP engine. The web hosting service includes domain, web space and e-mail addresses.
