

LEADER IN THE RESEARCH AND
MANUFACTURE OF MEDICAL DEVICES

ENT SOLUTIONS YOU CAN TRUST. RELIABILITY, QUALITY AND EXPERTISE FOR ALL AGES

FOR THE TREATMENT OF THE IRRITATIONS OF THE OUTER EAR CANAL

Otologic Solution

CUE Otologic Solution is a Medical Device with mechanical action. With its lubricant, emollient, protective and soothing properties, is indicated both in adults and children for preventing and helping the treatment of the irritations and inflammations of the outer ear canal like mycosis, eczema, dermatitis, external otitis ("swimmer's ear").

- Lubricant.
- Emollient.
- Protective.
- Soothing .

The oily extracts and the vegetable glycerol contained in CUE help, thanks to their emollient and protective action, to prevent the otitis and the inflammation of the outer ear canal, making the product highly recommended, for example, when practicing water sports in both the sea and the swimming pool.

Transparent Solution for medical examination

Presentation: 15 ml bottle

Medical Device Class IIa

Shelf Life: 36 months

MOQ: 12.000

FOR THE THERAPEUTIC MANAGEMENT AND THE PREVENTION OF CERUMEN PLUG

Ear Drops

CUE CAP is an otologic solution to soften and facilitate the removal of the cerumen from the external auditory canal. It is also indicated before ENT visits or prior to local drug treatments, and to keep clean the ear canal of hearing aid wearers.

With PROPOLIS and ALLANTOIN:

- Anti-inflammatory
- Soothing

With PROPYLENE GLYCOL and GLYCOLS:

- Solvent capacity

An effective prevention of cerumen impaction.

Medical Device Class IIa

Shelf Life: 30 months

MOQ: 5.000

THE HAEMOSTATIC BARRIER AGAINST BLEEDING EPISODES

Haemostatic Barrier Ointment

Emofix is an haemostatic ointment with barrier function indicated for the containment and prevention of cutaneous and mucosal haemorrhagic episodes such as, for example, essential, even slight, or traumatic epistaxis, small skin wounds, etc.

- Performs an action of mechanical barrier.
- Directly intervenes on the haemostatic process.
- Supports the healing of minor injuries.

With:

- SATURATED FATTY ACIDS: create a barrier effect to quickly stop the bleeding;
- CALCIUM, MAGNESIUM, POTASSIUM, COLLAGEN and PHOSPHATIDYLCHOLINE: support the healing process.

With nasal applicator for easy and practical use!

Medical Device Class III

Shelf Life: 36 months

MOQ: 16.000

GripSTOP

NO MORE STUFFY NOSE

Protective and Unplugging Spray and Drops

GRIP STOP is a Medical Device with mechanical action, indicated for the treatment of the symptoms associated with cold inflammatory conditions, also of bacterial origin, of the nasal cavities.

GRIP STOP helps re-establish the normal nasal respiration and tubal ventilation, in adults and children.

- For nasal obstruction, also due to common cold.
- For patients with limited possibility of using other products for nasal congestion.
- Useful also in case of pregnancy and during breast feeding.

A natural decongestant against the COLD of all the family

Shelf Life: 30 months

MOQ: 12.400

narivent

A NEW DIRECTION IN THE TREATMENT OF INFLAMMATION

Antiedemigen Nasal Spray

Narivent Anti-Edema Nasal Spray is an osmotically acting Medical Device with anti-edema and phlogolitic effect, indicated:

- for the reduction of nasal obstruction in patients affected by nasal turbinate hypertrophy and by specific (allergic rhinitis) or non-specific vasomotor rhinitis;
- for the treatment of edema associated with acute and chronic rhino-sinusal and adenoid inflammatory conditions;
- for the treatment and prevention of post-surgical relapse of nasal polyps;
- for the pre and post-surgery treatment of rhino-sinusal pathologies.

A natural antinflammatory without side effects

Presentation: 20 ml bottle
Medical Device Class IIa
Shelf Life: 30 months
MOQ: 16.500 units

Panaviral

NO ROOM FOR VIRUSES AND BACTERIA

Nasal Spray and Nasal Drops

Panaviral is a Medical Device with chelating (sequestering) and lubricating action on the nasal cavities, in adults and children. Thanks to the synergic action of its components (Lactoferrin, dipotassium glycyrrhizinate, carboxymethyl beta-glucan, vitamin C and vitamin D), sanitizes and protects the nasal cavities from external agents, even of viral or bacterial origin thus:

- helping to prevent the ability to spread of viruses and bacteria and to reduce cold symptoms;
- playing a defending role in improving the innate antiviral immunity of the nasal mucosa;
- offering the best preventive strategy against penetration and colonization of viruses and bacteria in the nose.

MOQ: 12.400 units
Medical Device Class I
Shelf Life: 24 months

RINOPANTEINA

LUBRICATION OF NASAL MUCOSA

Nasal Drops, Nasal Ointment and Nasal Spray

Rinopanteina ointment and drops are Medical Devices which lubricate and maintain the hydration of the nasal mucosa, helping the re-epithelization process.

Rinopanteina Ointment and Drops are indicated:

- after a surgical operation, to reduce the formation of crusts;
- in case of dry and/or atrophic nasal mucosa caused by particular environmental conditions, nasal sprays, aerosol therapy or temporary pathologies (i.e. rhinitis medicamentosa or allergic rhinitis, ozena);
- in order to reduce the consequences of epistaxis also when caused by a traumatic event;
- in order to facilitate endoscopic examinations and/or tamponade maneuvers.

The ointment is also useful for prevention and treatment of cold-induced chapped skin around the nose.

Rinopanteina Nasal Spray is indicated in case of dry and/or atrophic nasal mucosa caused by particular environmental conditions, nasal sprays, aerosol therapy or temporary pathologies (i.e. rhinitis medicamentosa or allergic rhinitis, ozena).

MOQ: 34.000 units

RINOPANTEINA PLUS

RESTORATION OF NASAL MUCOSA

Nasal Spray

Rinopanteina Spray Plus Nasal Spray is a Medical Device that lubricates and maintains the hydration and the elasticity of the nasal mucosa, helping the re-epithelization process.

Cross-linked Hyaluronic Acid (0,1%) and D-Panthenol (1%) guarantee greater hydration and viscoelasticity of the nasal mucus. Biotin, Vitamin A and Vitamin E contribute to the normal trophism of the mucous membranes. It is indicated:

- in case of dry and/or atrophic nasal mucosa caused by particular environmental conditions or treatments (dust, irritating substances, decongestant nasal sprays, oxygen therapy, etc.);
- to support the treatment of the sinonasal diseases (rhinosinusitis, allergic rhinitis, rhinitis medicamentosa, chronic atrophic rhinitis, etc.).
