CARING FOR LITTLE ONES, EVERY STEP OF THE WAY

COLINOX

IN CASE OF METEORISM, AEROPHAGY AND FLATULENT COLICS

Oral Drops

Colinox is a Food Supplement containing Fennel and rich in Bacillus Coagulans (50 BN/g). These substances perform important physiological actions in the body, more specifically:

- Fennel contributes to the normal digestive function and regulates the gastrointestinal motility and gas elimination.
- Bacillus Coagulans (50 BN/g) contributes to the balance of the intestinal flora.

Taking Colinox is useful in cases of reduced dietary intake and/or increased need for the substances contained in it, to support the body in reconstituting the balance of the intestinal microbiota, whose alteration can induce the development of meteorism, aerophagia, and gaseous colics.

Food Supplement

Shelf Life: 24 months

MOQ: 6.100 units

CuE

FOR THE TREATMENT OF THE IRRITATIONS OF THE OUTER EAR CANAL

Otologic Solution

CUE Otologic Solution is a Medical Device with mechanical action. With its lubricant, emollient, protective and soothing properties, is indicated both in adults and children for preventing and helping the treatment of the irritations and inflammations of the outer ear canal like mycosis, eczema, dermatitis, external otitis ("swimmer's ear").

- Lubricant
- Emollient
- Protective
- Soothing

The oily extracts and the vegetable glycerol contained in CUE help, thanks to their emollient and protective action, to prevent the otitis and the inflammation of the outer ear canal, making the product highly recommended, for example, when practicing water sports in both the sea and the swimming pool.

Transparent Solution for medical examination

Medical Device Class IIa

Shelf Life: 36 months

MOQ: 12.000

EMOFIX

THE HAEMOSTATIC BARRIER AGAINST BLEEDING EPISODES

Haemostatic Barrier Ointment

Emofix is an haemostatic ointment with barrier function indicated for the containment and prevention of cutaneous and mucosal haemorrhagic episodes such as, for example, essential, even slight, or traumatic epistaxis, small skin wounds, etc.

- Performs an action of mechanical barrier;
- Directly intervenes on the haemostatic process;
- Supports the healing of minor injuries.

With:

- SATURATED FATTY ACIDS: create a barrier effect to quickly stop the bleeding;
- CALCIUM, MAGNESIUM, POTASSIUM, COLLAGEN and PHOSPHATIDYLCHOLINE: support the healing process.

With nasal applicator for easy and practical use!

Medical Device Class III

Shelf Life: 36 months

MOQ: 16.000

TREATMENT OF GER AND GERD IN INFANTS AND CHILDREN

Pediatric Anti-Reflux Syrup

GastroKids is a Medical Device indicated for the treatment of gastroesophageal and/or laryngopharyngeal reflux in infants and children.

- Reduces the symptoms related to Gastroesophageal Reflux (regurgitation, cough, pyrosis, esophagitis, dysphonia).
- With Magnesium Alginate, which forms a mechanical barrier against the retrograding of the gastric contents.
- Adjuvant in the re-epithelization processes of the gastroesophageal and/or laryngopharyngeal mucosa.
- Reduces the time of permanence of the gastric content in the stomach.
- Gluten and Lactose free.

Medical Device Class IIa
Shelf Life: 30 months
MOQ: 12.300

GripSTOP

NO MORE STUFFY NOSE

Protective and Unplugging Drops

GRIP STOP is a Medical Device with mechanical action, indicated for the treatment of the symptoms associated with cold inflammatory conditions, also of bacterial origin, of the nasal cavities.

GRIP STOP helps re-establish the normal nasal respiration and tubal ventilation, in adults and children.

- For nasal obstruction, also due to common cold.
- For patients with limited possibility of using other products for nasal congestion.
- Useful also in case of pregnancy and during breast feeding.

A natural decongestant against the COLD of all the family

IMMUNOPIRINA

THE BOOSTER TO COMBAT THE FLU Liquid Food Supplement

IMMUNOPIRINA is a Food Supplement of Vitamin C, B-group Vitamins and Vitamin D3, which contains Elderberry and Chamomile extracts and is rich in Beta-Glucans. These substances play important physiological actions in the body, such as:

- Elderberry fruit juice regulates the sweating process, increases the fluidity of bronchial secretions and improves the functionality of the upper respiratory tract. It strengthens the body's natural defences.
- Chamomile extract (flowers) regulates the sweating process, improves the functionality of the mucous membranes of the respiratory system and facilitates relaxation (sleep).
- Vitamins B6, B12, C and D contribute to the normal function of the immune system.
- Vitamins B5, B6, B12 and C contribute to the reduction of fatigue and tiredness.
- Yeast Beta-glucans are micronutrients extracted from *Saccharomyces cerevisiae*.

To support the needs of the body in the early stages of fever

Food Supplement

Shelf Life: 24 months

MOQ: 14.600 units

narivent

A NEW DIRECTION IN THE TREATMENT OF INFLAMMATION

Antiedemigen Nasal Spray

Narivent Anti-Edema Nasal Spray is an osmotically acting Medical Device with anti-edema and phlogolitic effect, indicated:

- for the reduction of nasal obstruction in patients affected by nasal turbinate hypertrophy and by specific (allergic rhinitis) or non-specific vasomotor rhinitis;
- for the treatment of edema associated with acute and chronic rhino-sinusal and adenoid inflammatory conditions;
- for the treatment and prevention of post-surgical relapse of nasal polyps;
- for the pre and post-surgery treatment of rhino-sinusal pathologies.

A natural antinflammatory without side effects

Medical Device Class IIa

Shelf Life: 30 months

MOQ: 16.500 units

NoctiTuss

TO CALM COUGH AND PROTECT MUCOSA

Dry Cough Syrup

Noctituss dry Cough Syrup is a Medical Device containing a synergistic association of plant extracts (Mallow, Marshmallow and Hedge mustard) and honey, with mucoadhesive, emollient and soothing properties.

Indicated in the symptomatic treatment of dry/tickly cough, also reflux-induced, day and/or night, both in adults and children over 1 year.

- Creates a protective barrier.
- Promotes hydration.
- Exerts a soothing and lenitive effect on the oral and pharyngeal mucosa.
- Has an antioxidant and anti-inflammatory effect.

Also in case of reflux-induced cough

Presentation: 200 ml bottle

Medical Device Class IIa

Shelf Life: 24 months

MOQ: 10.600 units

ORÖGERMINA

YOU ALLY AGAINST UPPER RESPIRATORY INFECTIONS

Oral Spray

Orogermina Oral Spray is a Food Supplement with Vitamin B6 and Vitamin B12, enriched with Streptococcus Salivarius 24 SMBc and Streptococcus Oralis 89a, to provide an additional supply of these elements in case of deficiency and/or increased need to rebalance the normal oropharyngeal saprophytic bacterial flora, essential for the wellbeing of the entire organism:

- **Vitamins B6 and B12** contribute to the normal function of the immune system;
- **Streptococcus Salivarius 24 SMBc and Streptococcus Oralis 89a**, normal constituents of the pharyngeal microbiota, rebuild the physiological barrier of native saprophytes.

Panaviral

NO ROOM FOR VIRUSES AND BACTERIA

Nasal Drops

Panaviral is a Medical Device with chelating (sequestering) and lubricating action on the nasal cavities, in adults and children. Thanks to the synergic action of its components (Lactoferrin, dipotassium glycyrrhizinate, carboxymethyl beta-glucan, vitamin C and vitamin D), sanitizes and protects the nasal cavities from external agents, even of viral or bacterial origin thus:

- helping to prevent the ability to spread of viruses and bacteria and to reduce cold symptoms;
- playing a defending role in improving the innate antiviral immunity of the nasal mucosa;
- offering the best preventive strategy against penetration and colonization of viruses and bacteria in the nose.

MOQ: 12.400 units

RINOPANTEINA

LUBRICATION OF NASAL MUCOSA

Nasal Drops and Nasal Ointment

Rinopanteina is a Medical Device which lubricates and maintains the hydration of the nasal mucosa, helping the re-epithelization process.

It is indicated:

- after a surgical operation, to reduce the formation of crusts;
- in case of dry and/or atrophic nasal mucosa caused by particular environmental conditions, nasal sprays, aerosol therapy or temporary pathologies (i.e. rhinitis medicamentosa or allergic rhinitis, ozena);
- in order to reduce the consequences of epistaxis also when caused by a traumatic event;
- in order to facilitate endoscopic examinations and/or tamponade maneuvers.

The ointment is also useful for prevention and treatment of cold-induced chapped skin around the nose.
