

Opera ERP

The complete, modular management software for theatres, opera houses, orchestras, festivals and arts & cultural organisations.

Opera ERP is the management software designed to run every stage of an artistic and cultural activity: from planning a new season to the day-to-day management of resources, materials and staff. Born in **2007 at the initiative of the Teatro Regio in Turin**, it is a **web-based** platform available both **SaaS and on-premise**, accessible from any device through a browser. It is not a generic ERP adapted to the sector, but a vertical solution built for the complexity of the performing arts.

Key features

Production & season

Planning of productions, rehearsals, performances and shifts in a coordinated, trackable way.

Resources & materials

Catalogue every item with a code, location, status and owner; transport and loans for tours.

Space management

Shared calendar to book rooms and avoid overlaps between departments.

Staff & contracts

HR module for artistic and technical staff, attendance, shifts and contracts.

Administration

Management control, administration and budgeting integrated in the same environment.

CRM, ticketing & reports

CRM, digital ticketing, automated communications and dashboards updated in real time.

Who it's for: Opera Houses, Theatres, Orchestras, Ballet Companies, Festivals, Arts & Cultural Organisations.

About Labinf Sistemi

A company with over **forty years of experience** in digitalising business processes, based in Chivasso (Turin, Italy). It designs complete, integrated IT solutions for private companies, public bodies, opera houses, theatres and orchestras. Opera ERP is developed **together with professionals from the sector**, with teams dedicated to production, staff, management control and customer service.

Quality certified to ISO 9001:2015

Why choose Opera ERP

- ✓ **Vertical, not adapted.** Designed from the start for theatres, opera houses and the performing arts.
- ✓ **SaaS or on-premise.** Choose the option that best fits your security and management needs.
- ✓ **Everything in one platform.** Production, resources, spaces, staff and administration always in sync.
- ✓ **Experience since 2007.** Developed alongside theatres, starting with the Teatro Regio in Turin.
- ✓ **Accessible anywhere.** Web-based, no installation required: work from any device and browser.
- ✓ **Specialist support.** Dedicated teams for production, staff, administration and assistance.
