

Clorofilla

Green – reduced environmental impact

Brief description

Green, low environmental impact
Plant-based waterform
Clima Canapa fabric with fresh effect
Dual-firmness mattress
High ergonomic performance
Layered for progressive compression with 9 differentiated zones
High adaptability to body shapes
Physiologically correct sleeping position
Suitable for articulated bed bases
Anti-mites
Removable cover
Hygienic
Climate-controlled
Breathable and ventilated
Technology NFC
Medical device

Rigid cardboard packaging

Certificates of quality

Upon request

WASHABLE Cover

Load-Bearing capacity index

composition

description of materials

- 1 Composition of **Clima Canapa** fabric with **fresh effect: natural hemp**. Anti-mites. Breathable. Jacquard knitting.
- 2 Heat-accumulating winter padding made of **pure virgin wool** from shearing.
- 3 Reticulate three-dimensional **High-tech** padding – breathable, elastic and resistant to compression.
- 4 Padded cover internal lining.
- 5 Protection lining of waterform monoblock.
- 6 Layer of **RISORSA S Waterform**, a **bio-based, eco-sustainable, plant-derived material sourced from renewable resources**. Medium-high support, superior comfort, excellent ergonomic performance, and breathable. Resistant to deformation. **Certified according to Oeko-Tex and CertiPUR** standards, ensuring no harmful substances. **Density 35 kg/mc**. Designed with **9-zone differentiated channeling**. Thickness **cm 4,5**. **No glue used** between layers
- 7 Layer of **TERRA Waterform**, a **bio-based, eco-sustainable, plant-derived material sourced from renewable resources**. High support. Breathable. Ensures long-lasting shape retention, durability and sustained support over time. **Certified according to Oeko-Tex and CertiPUR** standards, ensuring no harmful substances. Load-bearing density of **35 kg/mc**. Wave-shaped processing with differentiated zones. Thickness **9 cm**. **No glue used** between layers.
- 8 Layer of **RISORSA P Waterform**, a **bio-based, eco-sustainable, plant-derived material sourced from renewable resources**. High support, superior comfort, excellent ergonomic performance, and breathable. Resistant to deformation. **Certified according to Oeko-Tex and CertiPUR** standards, ensuring no harmful substances. Load-bearing density of **35 kg/mc**. Engineered with **9-zone differentiated ventilation channels**. Thickness: **4,5cm**. **No glue used** between layers.
- 9 Protection lining of waterform monoblock
- 10 Padded cover internal lining.
- 11 Reticulate three-dimensional **High-tech** padding – breathable, elastic and resistant to compression.
- 12 Heat- diffusing summer padding made of **pure staple cotton**.
- 13 Composition of **Clima Canapa** fabric with **fresh effect: natural hemp**. Anti-mites. Breathable. Jacquard knitting.

Waterform made from bio-based, eco sustainable, plant-based materials.

Handle with ventilation holes

Eco-friendly core with low environmental impact, made from plant-based materials

CLOROFILLA removable cover

height: 24 cm
