technical supports

1

Top covering

750 g/m² stretch fabric made of Tencel thread, a natural cellulose fibre which, once processed, is transformed into a high-performance yarn.

Due to its special characteristics it offers excellent thermoregulation, breathability and the ability to disperse excess moisture.

2

Internal structure

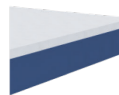

Structure made of 100% ultra-elastic high-density and highly breathable HydroAir, with natural extracts of soy and coconut, recognised for their emollient and dermoprotective properties.

5 cm upper layer made of 100% HydroAir in a cozy version.

The degree of support of the lower layer can be customised:

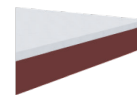

A. Blue layer for balanced support D40

B. Red layer for firm support D40

Cozy feeling D50
Balanced support D40

A.

Cozy feeling D50
Sustained support D40

B.

3

Bottom covering

300 g/m² hypoallergenic fibre padding that provides a good level of breathability and thermoregulation.

Highly breathable 320 g/m² Full D Flat fabric for perfect mattress ventilation.
