# Intercomp S.p.A.

**35 years** of hardware design and production

**35 years** of challenges and successes

**35 years** of energy and passion

Since **1983** we have created custom-made hardware solutions, both standard and customized.

We started producing electronic boards and computers. Today, as at that time, **we shape our customers' ideas.**

## 5 DIVISIONS

### DIGITAL SIGNAGE

INDUSTRIAL AUTOMATION

TECHNOLOGIES FOR HEALTHCARE

DIGITAL OFFICE

SMART PARKING

## CORPORATE

Total area

Production capacity

R&D laboratory

Production line

Total employees

**9,000 square meters**

**70,000 systems/year**

**15 designers**

**30 specialized operators**

**70 people**

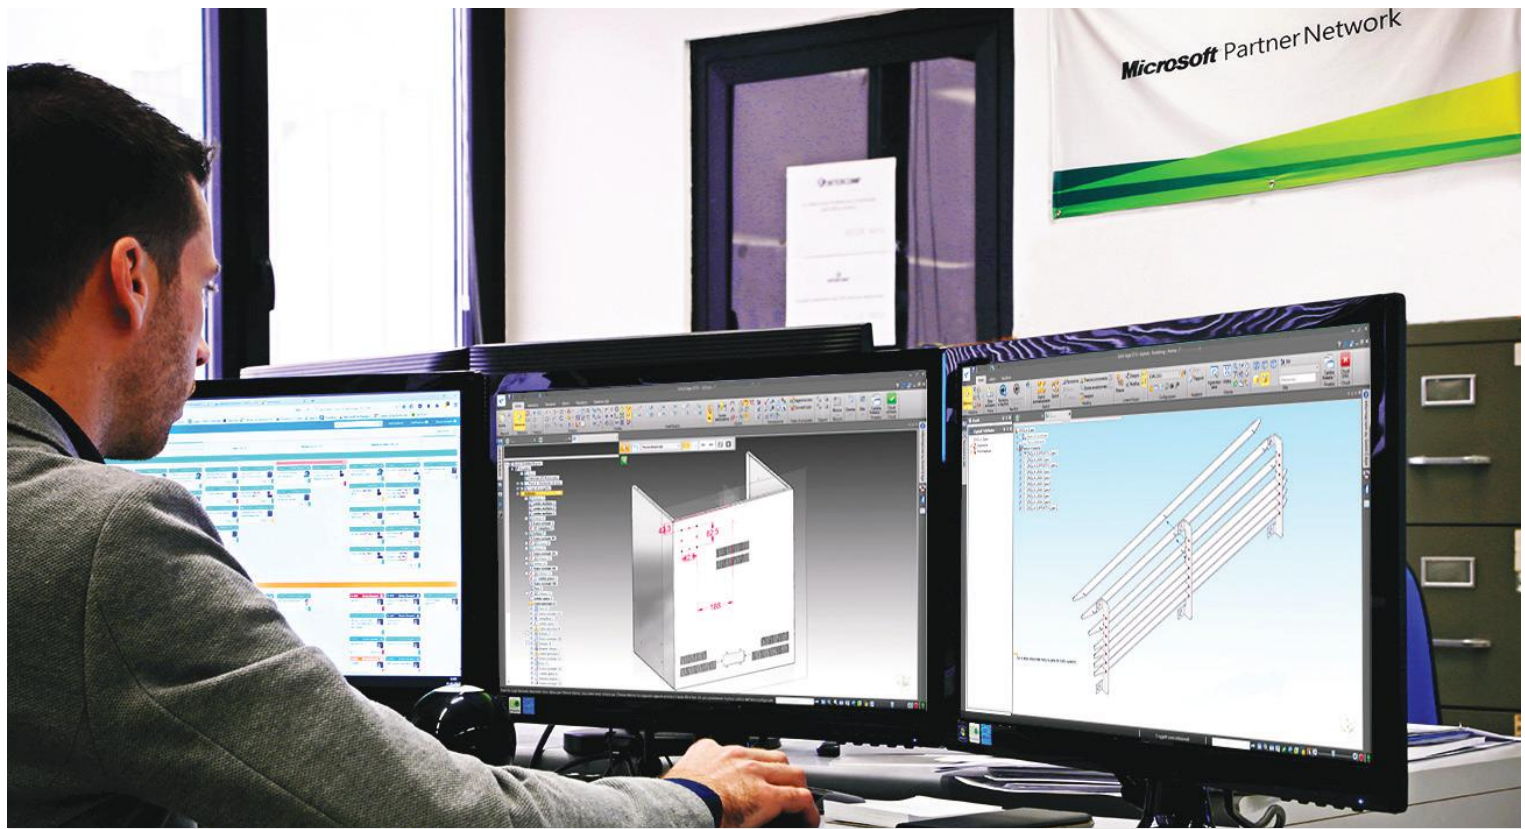

# Digital signage and digital kiosks

*Digital signage is revolutionizing the ways through which individuals relate to information. New devices, new forms of communication and new skills are needed.*

- ▶ Through our experience we have identified at least **five criteria** that make a **device really effective** and able to bring **positive and tangible improvements** within the context in which it is installed.
- **POSITIONING**: the strategic choice of the ideal **position** within the environment can guarantee complete **access** to the user and at the same time maintain a harmonious visual impact.
- **INTERACTIVITY**: the involvement of the customer/user is achieved through the choice of **interesting and tailor-made contents** and the use of **versatile devices** able to perform multiple operations in a simple and fast way.
- **RELIABILITY**: the solutions must be designed to **withstand stress situations** and **make available the services** for which they were purchased, even in **outdoor** environments in case of products with these predispositions.
- **UPDATE**: to have the most **advanced** solutions possible it is necessary to consider carefully two parameters: the **scalability** and the **expandability**, which allow to use always efficient and modern products.
- **AESTHETICS**: this is a parameter to be held in high consideration because, together with the **pleasantness of use**, it helps to increase the **visibility** and **attractiveness** of the context in which the device is installed.

# Hardware planning

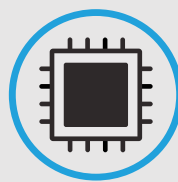

Intercomp can count on a **highly qualified planning department**, composed of **different areas** with **specialized employees** in **mechanical** engineering, **electronic** design and **software** development.

The company boasts a **high technological know-how**, acquired over many years of activity, combined with a great **passion for technology** and the ability to **transform ideas into** highly innovative and reliable **solutions**.

## Mechanical planning

Combining creativity, technique and customer's needs, the process considers all hardware's features dealing with the achievement of the **maximum synergy between the product and its user**.

## Electronic planning

It represents the **foundation** on which the functions of the devices are based. For this reason, it needs **continuous updates, constant scientific researches** and a **great collaboration** with the software development area.

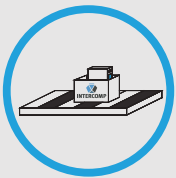

## Software development

Working in total synergy with all research and development areas, allows each electronic device **to have life, communicating** in an effective way **both with other machines and the users**.

# 8-step production

Intercomp can count on a **highly qualified production department**, consisting of 2,100 **square meters** of production lines capable of producing up to **70,000** systems a year.

①

## Incoming inspection and in&out traceability

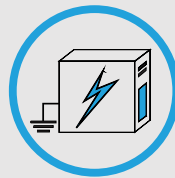

**Verification** of the quality of all incoming **materials** and assignment of identification **numbers** for **traceability**

②

## Production

The **specialized operators** assemble the components on antistatic platforms with automatic advancement

③

## Security tests

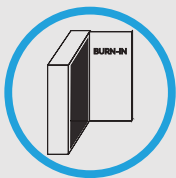

**Isolation** between cabinet and electricity grid and **continuity** between cabinet and ground contact

④

## Burn-in entry

**Continuous stress test for 48 hours** with thermal variations, switching on and off

⑤

## Burn-in exit

Only devices that **pass the tests** continue to the next stage

⑥

## Final test

**Compliance** according to the technical supply and **testing** specifications

⑦

## Packaging

Labelling, **insertion** of manuals, licenses for use, accessories and **final inspection**

⑧

## Logistics

Customized **order management** service even with different deadlines

# Milano multimedia stand

**Milano multimedia indoor stand** is a very **elegant** and **large format** device, able to **adapt** to different contexts and functions, for a long-life period.

The **door positioned on the front side** allows to comfortably carry out **maintenance** and **control** operations, even if the device is **wall-mounted**.

- ▶ **Display**  
LCD with LED technology in three versions: 32", 40" and 55"
- ▶ **Touchscreen**  
Optional: **infrared (IR)** technology with **multi-touch**
- ▶ **Resolution**  
Full HD 1920 x 1080
- ▶ **Aspect ratio**  
16:9
- ▶ **Dimensions (L x H x D)**  
595 x 1860 x 113 mm (32") | 700 x 1950 x 113 mm (40") | 900 x 2021 x 125 mm (55")
- ▶ **Speakers**  
Integrated: 2 x 10 W

# Cortina multimedia stand

**Cortina multimedia outdoor stand** is a **cutting-edge** solution designed to combine **incredible functionality** with **modern design**.

It can **perfectly match** the city environment, becoming a **very evocative device** to convey a wide range of messages.

- ▶ **Display**  
LCD with LED technology in three versions: 46", 55" e 75" | Auto brightness **adjustment**
- ▶ **Touchscreen**  
Optional and available only for 46" e 55" versions: **infrared (IR)** technology
- ▶ **Resolution**  
Full HD 1920 x 1080
- ▶ **Aspect ratio**  
16:9
- ▶ **Dimensions (L x H x D)**  
744 x 2106 x 150 mm (46") | 851 x 2236 x 150 mm (55") | 1933.5 x 2359.3 x 318.2 mm (75")
- ▶ **Structure**  
Painted **steel** with possibility of **ground fixing**

SELF-SERVICE  
KIOSKS

# Torino 194 self-service kiosk

**Torino 194 self-service kiosk** is a device able to support different types of peripheral devices to meet specific needs.

It is a **practical** and **versatile** solution, adaptable to various needs and contexts thanks to the different **configuration possibilities**.

- ▶ **Display**  
19" LCD with LED technology
- ▶ **Touchscreen**  
Optional: **infrared (IR)** technology with **multi-touch**
- ▶ **Dimensions (L x H x D)**  
510 x 1434.8 x 636.7 mm (with keyboard and pedestal)
- ▶ **Printer**  
Optional: 80 mm **thermal** printer for different types of materials
- ▶ **Keyboard**  
Optional: **stainless steel** with **trackball** and vandal-proof protection
- ▶ **Readers**  
Optional: **barcode**, **RFID**, **magnetic stripe** and **chip** cards

## Skill 550 multimedia

**Skill 550 multimedia table** is a **large format** device able to create a **surprising visual impact** within the context in which it is installed.

It is a **very versatile** solution that allows users to interact easily, thanks to the possibility of **tilting the worktop**.

- **Display**  
55" LCD with LED technology
- **Touchscreen**  
Multi-touch technology
- **Resolution**  
Full HD 1920 x 1080
- **Aspect ratio**  
16:9
- **Dimensions (L x H x D)**  
1480 x 900 x 944 mm (worktop)
- **Structure**  
Motorized tilting worktop

# Customization 4.0

*From the idea of the customer until its realization: a determining factor for the success of those who choose our custom-made solutions.*

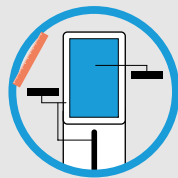

- Over the years we have shaped our design and production activities **to meet the different needs**.
- There are specific contexts with complex requirements that cannot be resolved in a standard way. For this reason, **structured solutions designed in each individual element** are required.
- It is a **highly qualified technological process** where our design and development empathize with customer's specific needs.
- Through this approach we guide our partners to choose the **most suitable solution for any critical environment**, which needs a product engineering development that **overcomes all technological limits**.
