

*RUB RAILS FOR PROTECTION BUILT TO PERFECTION*

**Tessilmare** is a renowned Italian company in the marine sector.

Since 1947 we are producing and creating top level fender profiles, sun-tops, upholstery accessories, and marine fabrics.

Thanks to our know-how and continuous research on the best raw materials, we are especially appreciated for the **high-quality standards** and for our **practical solutions**.

This **strong** but **light** at the same time **PVC** fender profile is suitable for pier and dock protection as well as yachts, military and work boats.

BUMPER is a patented product and has a powerful three-piece structure.

This three-piece structure presents many air gaps that are a key element for the **absorption of impacts**. Thanks to this design the profile is lighter in comparison to similar solutions, and it can resist to shocks over years without losing the color.

- **Sizes:** 100 mm, 125 mm, 150 mm, 160 mm
- **Colors:** Black, Grey, White
- **Raw material:** high quality PVC for marine use

## Installation:

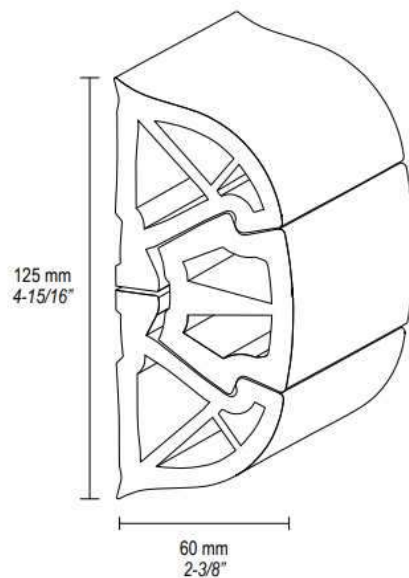

Two pieces together compose the base that is fixed to the hull thanks to a pre-drilled Stainless-Steel bar.

The third piece is the insert that is pressure fitted on top covering the S/S bar and completing the profile structure.
