

THE NEW

CORTEL

A faithful companion for outdoor adventures, a reliable ally in the woods: Cortel is the new Prandi fixed-blade knife designed to cope with the wild nature, useful for various activities such as bushcraft, camping, hunting and fishing. Whether lighting a fire under the starry sky or tackling small outdoor challenges, its versatility makes it a valuable tool.

Cortel is available in Traditional and Classic versions to match the Prandi axe lines. The design of this knife combines aesthetics and functionality in one product. The blade is made of the best cutlery steel AISI 420MoV, hardened to 55-57 HRC. The handle is ergonomic, made of walnut wood.

For three generations, Prandi has been producing with passion high-quality cutting and splitting tools.

Its extensive know-how of the forging and sharpening processes enables the company, in 2024, to launch the first knife in the Prandi range onto the market.
