

The Main Settling tanks can hold up to approx. 6000 Litres of Neat Oil and is accessible through the removable top plates. Each tank is divided into smaller sections of baffles and both are united via a transfer tube. There is a 37 KW Motor drives a Gear-pump, for the hydraulic circuit

Saporiti have design and manufactured machine tools with passion since 1946. Our products are continuously up dated and improved to keep our machines at the top level in quality, features, accuracy and performances

We have satisfied end used all around the world.

SAPORITI FL 500 DRILLING-BORING (HONING) MACHINE

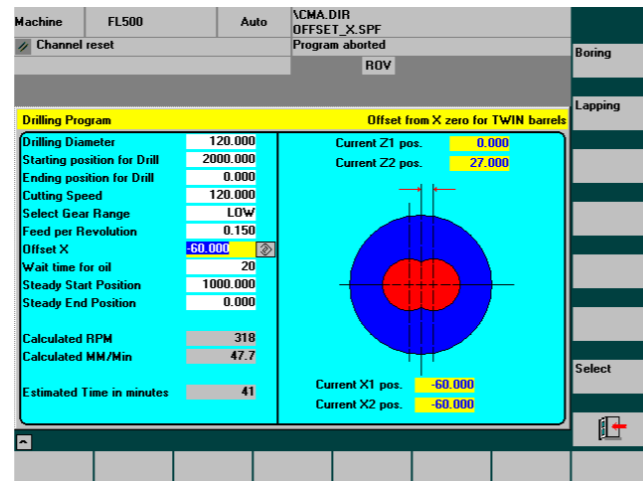

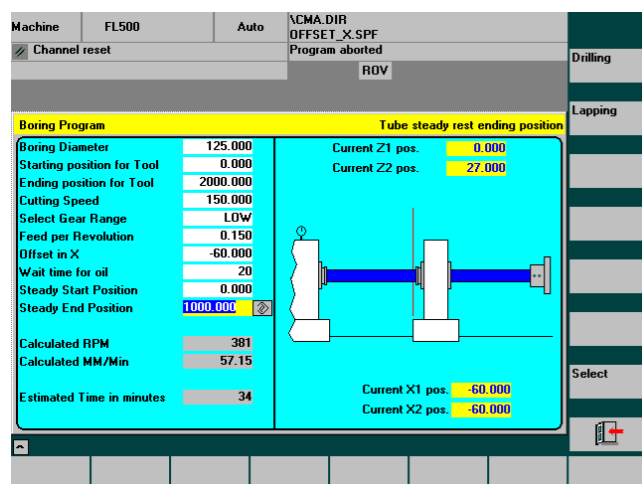

With today's technology in drilling and pull boring, counter rotating machines are no longer needed.

The machine works on the principal of a clamped workpiece and rotary tools thus allowing the drilling and boring of non roto-symmetrical workpieces as in twin-screw barrels.

WWW.SAPORITI.IT

The machine use CNC Siemens 840 D.
 SAPORITI has studied customized software with mask especially studied for the solid drilling, boring and honing of barrels and twin-screws barrels

The high precision is guaranteed by the INA roller guide blocks which run on hardened and ground guideways integrated into the bed structure .
 The machines has accuracy certificate

There are six controlled axis, four linear, Z1 longitudinal length of the machine, Z2 longitudinal of steady rest (lapping head optional), X1 transversal first carriage, X2 transversal second carriage and one rotary, S1 rotation drilling tool.

Main features:

Different drilling length available up to mm 5000.
 Center height mm 520. Max. piece diameter mm 500.
 Total length of electrowelded steel up to bed mm12500.

The tooling which can be used on this machine are BTA or STS type. The machine allow also the working by pull boring.
