# CHABARIM

100% volcanic mineral powder  
*Extracted from Italian quarries*

## ABSORBENT PROPERTIES

## ABSORBENT PROPERTIES

It helps reduce moisture in foodstuffs, contributing not only to preventing insect attacks but also to improving food preservation.

## TRIPLE EFFECT: MECHANICAL, NATURAL

When insects come into contact with the mineral, the microparticles damage their cuticle, causing death by suffocation, laceration, and osmotic dehydration.

## ENVIRONMENTALLY SAFE

Does not release hazardous chemical residues, making it ideal for treating cereals, dried fruits, and other foodstuffs intended for consumption. Suitable for livestock and poultry farms.

## EASY OF APPLICATION

Used to treat warehouses and storage silos for foods such as cereals, legumes, rice, and dried fruits. It creates a protective barrier that reduces the risk of infestations without compromising product quality.

## LONG-TERM ACTION

Once applied, it acts effectively over an extended period, reducing the need for frequent applications compared to other insecticides.

## SUSTAINABILITY

Chabarim is a naturally abundant resource. The use of natural Italian zeolite for insect control helps promote more sustainable practices.

*Certified for use in biological farming  
(EU reg. 2018/848)*

*Registered as a fortifying in the agricultural sector  
(ministerial decree n. 18354/2009)*

*Used as a raw material for animal feed in  
zootechnical environment (EC reg. 767/2009)*

*Product certified for conformity Italia association  
biological farming (010/MT2021)*
