Scheda Prodotto N°Z02 rev. 0

Benches certified according to **EN 13150 / EN 61010-1**

Modular professional furniture for chemical analysis laboratories, hospitals, educational laboratories and where modularity is required together with functionality and robustness.

Supporting structure made of steel profile section mm 30x30x3 and mm 50x20x2, "C" shape painted with epoxy powders with passage in a 3-stages thermal tunnel.

Adjustable stabilising feet .

Technical compartment for the passage of utilities.

Modular and sectional (60,90,120,150,180), of great adaptability, particularly functional and of high strength as shown by the tests carried out by certified laboratories.

Modular and sectional self-supporting, multi-level partitions, panelled or with open compartments, give the possibility to create defined work areas by a wide range of accessories and replaceable panels for a wide vertical and horizontal modularity. Vertical uprights available for the utilities ducts.

The benches can be equipped with electrical boards and technical taps for gases and fluids.

Under top can be furnished with cabinets mounted on wheels and it is possible to integrate refrigerators, glass-washers, safety cabinets for flammables or for acids and bases, under-sinks.

The wide range of worktops allow you to customize the furniture for any specific need:

Plastic laminate worktop

Worktop in stratified laminate (phenolic resin)

Polypropylene top

Porcelain steel top

Monolithic gres top

Epoxy resin top

INOX steel top

CORIAN top

Possibility to insert sinks of various sizes to create washing benches.
