# Carmon

*Carmon, founded in 1969, manufactures **high-precision tooling**, drawing from the deeply rooted Italian expertise in this very specialized field. and stands out for competence and reliability. Constant study of materials and application, as well as a careful attention for the manufacturing equipment, have assured the flexibility required to make the brand growing, also internationally, with a comprehensive offer for both standard and customized products. An efficient after-sales department and a just-in-time service allow any order to be processed within 24 hours.*

# Ergus

*Ergus was founded in 1993 and has been the first to introduce in the market the inverter **welding machines**. The significance of the solution, immediately appreciated in the field, brings to rapidly create a comprehensive line and, later on, **plasma cutters**, which will then become the company's flagship. Thorough expertise and knowhow, together with the well-known reliability of the machines, many OEMs start relying on the company to build their customized lines. This newfound flexibility is the booster that launches the company globally.*

*In 2018 Carmon widens further its activities, by taking over Ergus - historical brand in the field of professional welding machines, plasma cutters and inverters – with whom shares not only the markets but also the values.*

*In this variety of scenarios and meeting of synergies Carmon and Ergus continue striving to evolve, being careful to preserve the technical **Made in Italy heritage.***

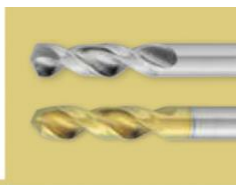

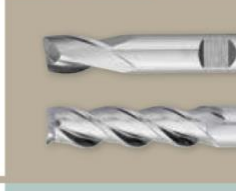

*Through our expertise we provide our customers with a **distinguished service**, and a product that makes the industry more efficient. We work hard, every day, to improve and create transparent and qualified relationships.*

***We want to be a trustworthy staple in an ever-changing industrial panorama.***
