

Arcari

MADE IN ITALY

**Manufacturing Partner
for interior design**

Technical support and artisan production of
excellence for professionals

Arcari Arredamenti s.r.l.

Reliability, Professionalism, Excellence

Since 1976, Arcari Arredamenti has been translating designers' visions into prestigious creations. Our history began in carpentry and has evolved into a production platform dedicated to those seeking reliability and total control over the product.

Arcari Arredamenti is not just a supplier, but a partner that offers decades of experience to ensure the perfect outcome of every high-end residential or contract project.

Arcari's approach to design is tailor-made. Starting from Arcari's collections and modular systems, as a basis of certified quality, it is possible to develop completely customised design solutions.

Services for designers

Arcari's added value is its **preliminary consultation**:

- **Feasibility analysis:** Each project is analysed by Arcari's technical department to assess its structural and aesthetic consistency.
- **Technical alternatives:** Arcari's decades of experience in carpentry allow it to propose technical and structural solutions that optimise the design concept.
- **Guaranteed results:** We only accept production challenges when we are certain of achieving flawless results, seeking solutions that guarantee maximum quality over time.
- **Technical support:** Arcari is not a passive supplier. Constant dialogue between designers and production ensures that every detail is resolved before the product is delivered to the construction site.

The Arcari process

- **Brief and engineering:** Concepts received from external designers are transformed into working drawings and technical details.
- **Material selection:** In addition to various types of solid wood in different finishes, Arcari offers the possibility of developing sample finishes and additions with different natural and synthetic materials (stone, metal, glass, fabric).
- **Production and pre-assembly:** Each element produced is pre-assembled in the carpentry workshop to check alignment and tolerances before shipment.
- **Specialised installation:** Arcari's specialised technicians take care of on-site assembly, ensuring that the quality of production is reflected in the assembled product.

Sustainability

Arcari Arredamenti uses only paints with natural and plant-based components that are safe for the environment and for humans, such as natural waxes and linseed oil.

Our VOC (Volatile Organic Compound) emissions are lower than the limits imposed by current legislation.

Our products are CARB2 certified, guaranteeing the highest safety standards and minimal formaldehyde emissions.

Our blockboard panels are E1 certified for low formaldehyde emissions, as verified by CATAS laboratories in accordance with EN 717-2.

Our wood comes exclusively from responsibly managed forests.

Arcari Arredamenti uses low environmental impact solutions in all stages of manufacturing:

- recycling production waste for heating
- using certified recycled cardboard for packaging
- using raw materials from renewable sources

Arcari products retain their aesthetic and functional qualities over time, maintain their value, and become heirlooms to be passed down.

Quality

Arcari Arredamenti applies the most rigorous quality standards throughout the entire production process, from design to material selection, from product manufacturing to delivery.

100% Made In Italy

Since 2014, Arcari has been a 100% Made in Italy certified brand, compliant with the requirements of the IT01 system, 100% Original Italian Quality.

This recognition attests to the commitment to creating products that represent the best of Italian manufacturing tradition, is synonymous with excellence in every detail, and represents a responsibility and a source of pride.

Materials

Every Arcari product is the result of continuous research into the best materials.

The careful selection of fine woods, metals, and innovative finishes guarantees beauty and durability over time.

Our materials come from certified suppliers, with a preference for sustainable supply chains.

Choosing an Arcari product means choosing the result of constant and passionate work that starts with the raw material and ends with an exclusive piece.

Functionality' and Design

High-quality, solid, and invisible hardware with smooth movements and silent openings combines elegance and durability while respecting the product's design.

Artisanal Care

Every detail of Arcari furniture is carefully designed and crafted with precision. Each stage of production pays homage to tradition while looking toward the future. This dedication results in furniture that tells a story, where beauty is also an expression of timeless values.
