MANDELIC COMPLEX

SPECIALISTIC LINE
WITH MANDELIC ACID

MANDELIC COMPLEX

EXFOLIATION, WHITENING, ANTI-STAIN TREATMENT WITH MANDELIC ACID

The Mandelic Complex line is an exfoliating, brightening, anti spot treatment that enables the professional beauty industry to have exclusive use of aesthetic medicine, accompanying the excellent results with unrivaled functionality. The mandelic acid is an alpha hydroxy acid, derived from hydrolysis, an extract of bitter almonds that, for its characteristics, is used to combat significant skin blemishes including **photo aging, hyperpigmentation and acne**. The considerable interest that this product is attracting worldwide in cosmetic medicine stems from the fact that, even at high concentrations, it acts without causing burning and stinging, as so it is called a **soft peeling**. As for the results, the product is particularly active in the depigmentation of the spots and in the **repair and regeneration of aged skin**. It is very effective in acne inflammatory because of its antibiotic and antibacterial properties. Combined with other acids at a low concentration, it is also used for the treatment of **scars and stretch marks**. Moreover, not being photosensitizing, it is applicable in all periods of the year without summer contraindications.

WHY USE THE MANDELIC LINE COMPLEX

The specific activity and the wide range of indications resides in some characteristics of Mandelic which are:

- Security of use: the persistence of Mandelic Acid, for several minutes, does not produce more than just erythema (this may be left in place for 15-20 minutes).
- Uniformity of penetration
- Appreciable decrease in depth of fine wrinkles
- Evident brightening activities
- Strong antibacterial effect, valuable in the treatment of acne and seborrheic skin or postoperative mechanical dermabrasion or laser resurfacing.
- Easy handling, strong antibacterial action and as prevention of super infection.
- Possibility of doing treatments even in the summer..

After finishing the treatment it is important to advise the customer of a specific product for home care to enhance and retain the effects over time. The home line is enriched with products of mandelic acid base for all skin types and for any type of need.

The results are noticeable after the first two sessions. The application, the doses and the times, vary from person to person, it is advisory to get a history of photo type for the first application. Cycles of 8-12 sessions are sufficient to obtain good results.

WHEN USE THE LINE MANDELIC COMPLEX

- Treatment of acne vulgaris: the maximum indication of mandelic acid (due to its antibacterial properties, capable of reducing the proliferation of Propionibacterium acnes);
- Treatment of blackheads;
- Treatment of cutaneous dyschromias (e.g. on the skin spots) related to the photo aging;
- Treatment of melisma, chloasma, freckles;
- Improvement of signs and symptoms related to acne pustular / papulous;
- Skin re-compact treatment;
- Anti wrinkle treatment (remedy against superficial wrinkles);
- Alternative treatment against couperose (visibly improves the signs and symptoms of the disease);
- Pre and post laser therapy treatment, because it soothes the skin irritation;
- Deep moisturizing treatment (in combination with other substances, such as hyaluronic acid).

ASPECTS TECHNICAL / FUNCTIONAL OF THE LINE MANDELIC COMPLEX

In the Mandelic Complex line, the mandelic acid is often combined with other substances by the action brightening (to enhance the final effect), moisturizing, antioxidant and nourishing. Below are the cosmetic ingredients that support the action of mandelic:

- Glycolic Acid + mandelic acid: both molecules carry the same action exfoliating and depigmentation;
- Vitamins A / E + mandelic acid: the presence of vitamin A, and E acts in synergy with the mandelic acid by enhancing the anti-radical effect (antioxidant), very important for the treatment of mature skins;
- Hyaluronic Acid + mandelic acid: the combination of these two products provides excellent moisturizing and anti-aging effect (conferred by hyaluronic acid) combined with a powerful brightening and exfoliating (mandelic);
- Azelaic acid + mandelic acid: strengthening bacteriostatic and bactericidal activity against the bacteria involved in acne vulgaris appearance.

MANDELIC STOP NEUTRALIZING PEELING

COD. 54001_ML 400

Solution in gel based on sodium bicarbonate, it is a necessary product during the treatments with mandelic acid every time you want to get the interruption of acid. Neutralizes the action of peeling and restores optimal pH balance.
