### ADVISE FOR YOUR CUSTOMER

**MORNING:**  
Apply the Lipolytic Fluid to the Phosphatidylcholine of the Extra Performance Line every morning with a light massage.

**EVENING:**  
Apply the Cellulite Cream - Fat Reducing Cream every evening and perform a deep massage from the bottom to the other.

Once a week, during the shower, perform an exfoliation with the Salt & Sugar Basic Line Scrub.

**1. PREPARATION**  
Prepare the massage table with a plastic foil.

**2. SEA SALT SCRUB**  
Carry out a scrub with fast and deep circular movements only on the cellulite areas to reactivate the blood circulation. Remove with a wet sponge.

**3. CELLULITE - ADIPE ACTIVE CONCENTRATE**  
Distribute the contents of a Cellupro Advance ampoule at the critical points with a light friction massage.

**4. FLUIDO 3 ACTION**  
Massage the Phosphatidylcholine Fluid over the whole previously treated part and massage with kneading maneuvers until completely absorbed.

**5. CELLULITE GEL MASK**  
Spread with a brush or spatula the Cellulite Gel Mask - Reducing Fat evenly on the cellulite and fat areas and massage until absorbed.

**6. PLASTIC FOIL**  
Close with the plastic foil and leave on for 20/30 minutes.

**7. LIGHT MASSAGE**  
Lift the plastic foil and absorb the residues of the Gel Mask with a light massage.

**8. CREAM MASSAGE**  
Complete with a Reducing Modeling massage using the Cellulite - Reducing Fat Cream.

# CELLUPRO ADVANCE

## CELLULITE - FAT INTENSIVE BODY SYSTEM

The Cellupro Advance line offers an innovative specific system for **cellulite blemishes characterized by fatty deposits, fluid retention and tissue atony**. Remodels and tones the body promoting a deep draining and lipolytic action. In addition to typically draining and anti cellulite active ingredients such as Caffeine, Bromelain, Horse Chestnut, Centella Asiatica, Green Tea, Ginger and White Thyme, was included in the formulation a phytocomplex extracted from the **Drosera Ramentacea, a carnivorous plant belonging to the Droseraceae family, mainly distributed in Australia, Africa and South America, with extremely powerful lipolytic and reducing lipo characteristics that give it an effective action on fat deposits and subcutaneous fat**. In addition, the introduction of the new Fluid 3 Action based phosphatidylcholine allow to obtain both an ultra enhanced penetration of all substances, thanks to the carriers properties of this molecule, that an increase of its contrast function on localized fat and cellulite. Its composition, free of algae extracts, allows the new Cellupro Advance treatment to be applied on subjects with thyroid problems and with highlighted capillaries. Finally, thanks to the absence of Parabens, Petrolates and Paraffins, it is also ideal for sensitive and hyper-reactive skin.

## ACTIVE CONCENTRATE CELLULITE - FAT

COD. 52020\_ML 12 FIALOIDI ML 15

Cellupro Advance active concentrates represent a new cosmetic approach, the composition of which has been rigorously studied and worked to act in every single phase of cellulite formation. They act on all aspects of this blemish to reactivate microcirculation, favor the elimination of excess fluids, counteract "orange peel" skin and weaken the fibrous cells of the nodules. Thanks to the interaction of the draining and detoxifying active ingredients in synergy with the exclusive Carnivorous Plant extract, they also simultaneously and intensively reduce the fatty tissue and accumulations of fat, allowing to work with excellent results on the abdomen, waist, hips, buttocks and knees.

## 3 ACTION FLUID WITH PHOSPHATILICOLIN

COD. 52021\_ML 400

Inserted in the CELLUPRO ADVANCE system, Fluid 3 Action has a triple effect that will further enhance the results of the treatment. In fact the Phosphatidylcholine, in addition to emulsifying the subcutaneous fat, favoring its elimination, it visibly reduces the volume of adipocytes, counteracting the typical irregularities of the orange peel skin and enhances the penetration of the active substances contained in the previously applied Active Concentrate and the products that will be added. later. Thanks to its versatility it can also be a valid support for the enhancement of the other body systems of the Capri Beauty Line.

## CELLULITE - SLIMMING FAT GEL MASK

COD. 52022\_ML 500

An original and ultra-enhanced formula, created specifically to promote a reduction in the volume of fat cells, eliminate excess fluids, counteract the stagnation of liquids and act simultaneously as a powerful lipo-reducer. Thanks to its special complex of ingredients and its programmed release system, it is able to release active ingredients over large areas without "skin saturation" effect. The synergy of its formula, consisting of Bromelain, Caffeine, Carnivorous Plant Extract, Carnitine, Butcher's Broom, Green Tea, White Thyme, Ginger and Escin, allows to reactivate the microcirculation, favor the drainage and the expulsion of toxins, counteract "orange peel" skin and weaken the fibrous cells of the nodules, with a loss of centimeters from the first sessions.

## CELLULITE - SLIMMING FAT CREAM

COD. 52023\_ML 500

COD. 52026\_ML 250 (F.TO RIVENDITA)

Designed for the final phase of Cellupro Advance treatment, the Cellulite - Fat Reducing Cream, promotes the reduction of fat deposits thanks to the interaction of the new phytocomplex of the Carnivorous Plant derived from the Drosera Ramentacea, in synergy with the other functional draining, detoxifying and reactivating substances. Its special texture allows a prolonged massage and a complete absorption of the active ingredients contained in it. Promotes the increase of skin tone, accelerates the lipolysis mechanism and reactivates the functionality of the skin microcirculation, facilitating the removal of toxins infiltrated into the tissues. Free of Parabens, Petrolates and Paraffins, it can be used on all skin types, even on the most sensitive and reactive ones.

Cod. 52026

## ACTIVE PRINCIPLES

The phytocomplex extracted from **DROSERA RAMENTACEA**, a carnivorous plant belonging to the Droseraceae family, is able to modulate the metabolism of adipocytes by acting as a slimming, remodeling and anti-cellulite active ingredient. It is able to prevent the accumulation of fat and reduce the size of adipocytes thanks to its lipolytic effect. It acts effectively as an active slimming and remodeling ingredient and reduces cellulite and related pain.

**FOSFATIDILCOLINA** is able to solubilize the fat contained in the adipocytes, reducing the volume of the adipose panniculus. The dissolved fat is subsequently reabsorbed and eliminated through the major lymphatic expulsion pathways. It is also a very interesting molecule as a carrier of other active ingredients, of which it promotes skin penetration up to the inside of the cell membrane, where the function of the active ingredients manifests itself more effectively.

**CENTELLA ASIATICA:** Allows the drainage of liquids and improves lymphatic circulation.

**ESCINA:** Promotes capillary resistance to permeability, gives support to veins and helps drain.

**CAFFEINE:** Stimulates the metabolism of fats by facilitating the demobilization of fat deposits.

**BROMELINE:** Counteracts the formation of edemas and eliminates toxins.

**GINGER:** Works on reactivating the circulation, reducing localized swelling.

**RUSCO:** Thanks to its vasoprotective and anti-inflammatory properties, it counteracts venous insufficiency, pain and heaviness in the legs.

**IVY:** Improves the elasticity of the skin, reduces the fatty tissues and performs a soothing action.

**WHITE THYME:** It is able to drain excess liquids that cause water retention, swelling and imperfections of cellulite.
