

# TECHNICAL DATA SHEET

## BIANCO CARRARA C - C/D

Primary name	Bianco Carrara C - C/D
Type of stone	Marble
Country of origin	Italy
Quarry location	Carrara (MS) - Tuscany
Geological formation	Jurassic
Color range	White - Grey
Description	Thin veins from grey to black on a white background. The transition between the qualities known as "C" and "CD" is distinguished by a gradual increase in the veining and a grayer background. Particularly appreciated for its fine grain.
Average Block size	250 x 120 x 120 cm
Average Fabricated Slab size	250 x 120 cm
Available in Thin Tile	Yes
Maximum Thin Tile size	61 x 61 x 1 cm

TECHNICAL INFORMATION	ENGLISH VALUE	ASTM ** Test Method
Absorption by weight, %	0.1	C97
Density, lbs/ft <sup>3</sup> , (kg/m <sup>3</sup> )	169.41	C97
Compressive strenght, psi, (MPa)	10,930	C170
Abrasion resistance, hardness	14.24	C241
Flexural strength, psi, (MPa)	2,799	C880

MIA Classification for Soundness A (Marble Only)

Other trade names /

Color plate and information supplied by: Marmi e Graniti d'Italia Sicilmarmi Spa, Massa, Italy

Technical details provide a frame of reference only. Because stone is a product of nature, testing to determine specific physical should be repeated for each major project.

Control Number II - 01
