

From the land of musicians truly musical equipment !

Fraschini theater in Pavia city, Lombardy, Italy

# Recreating reality

Our only objective is to be able to recreate the emotion and perfect realism of true, live music, back in your living room.

# "Mittleuropean" music class

- For over thirtyfive years we have dedicated our minds and souls to the design and manufacturing of superior quality audio products for those who can feel the deep, inner emotion of true musical performance.
- Tube/valve class "A" preamplifier with parallel shunt power supply – Lector-audio original design
- hybrid tube+mosfet power amplifier direct coupled stage
- hybrid tube+mosfet integrated amplifier
- Tube/valve CD-player and digital to analog converter
- CD-player - transport /high resolution DAC
- Our products belong to a class of their own

# Musicality first mission

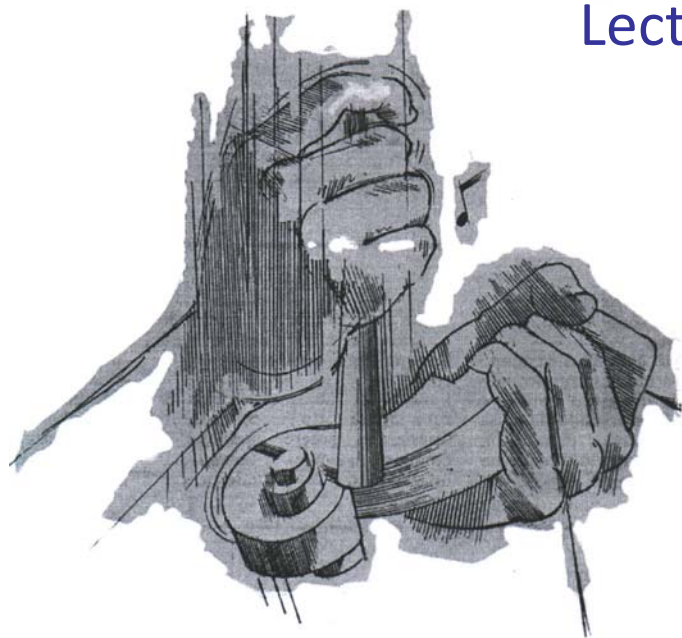

2004  
"Golden ear"  
award

CDP-707 analog music from digital technology

# Our key ingredients: sound, music and technology

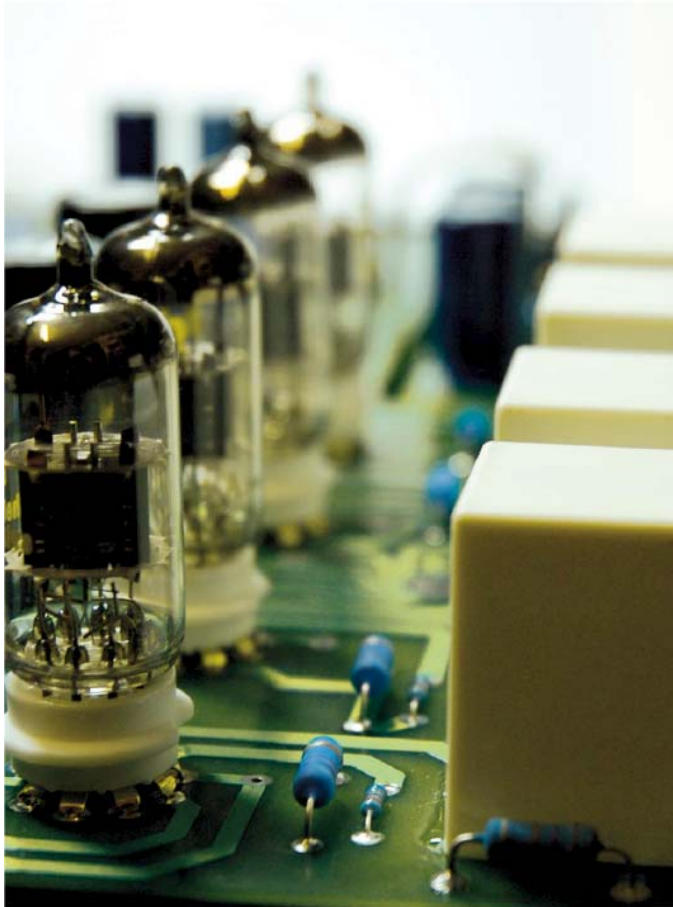

Lector-audio has been pioneering the invention  
of tube+mosfet Hybrid Technology.

Genuine real tube/valve  
cd player & DAC  
with no solid state devices  
from dac to output !

All our products are entirely handcrafted.  
They are designed and produced in Italy.  
Since 1982.

# Why vacuum tubes instead of silicon?

We need a bit of a technical explanation, unfortunately:

- Tubes work with second order harmonics which sound “nice” to human ears
- Semiconductors tend to generate third order harmonics which sound “out of tune” to sensible ears....

# Broad portfolio with unparalleled performance

Tube-mosfet integrated amplifier

Real tube stereo preamplifier

Real tube cd-player

Real tube digital analog converter

Tube-mosfet power amplifier

Cd-player transport hi-resolution

# Prestigious acknowledgements

the absolute sound<sup>®</sup>  
editor's choice award 2005
