**INTEGRATED SYSTEMS FOR HOLISTIC WELL-BEING**

He was born the object of desire for your well-being ...

## MULTI-SENSORY HYDROVISION PYRAMID

It is also available the new HVJ Jacuzzi  
Hidorvision Version

The Hydrovision Pyramid is the first wet and dry patented SPA integrating ten alternative holistic therapies in just one single product:

1. Aromatherapy
2. Music therapy
3. Chromotherapy
4. Crystal Therapy
5. Massage therapy
6. Infrared therapy
7. Halotherapy
8. Hydrotherapy
9. Videotherapy
10. Pyramidtherapy with Orgometrotherapy applied

All the above therapies have been realized and integrated into specific sequences in bioresonance by a staff of doctors, luminaries, composers and experts, each in his own field, (there are many referrals but we may mention Prof.

Rescaldina for Chromotherapy, Prof. Laza for aromatherapy and Mr. Eberspacher for music therapy) in order to offer the effectiveness of each program, to fruition, namely:

1. relax
2. sleep
3. energy
4. meditation

With a simple click of the remote, or through the dedicated app, you may live a multi-sensory evocative path able to stimulate the senses as well as meridians and chakras involved in treatments.

The duration of treatment is 30 minutes long and may be enjoyed alone or with operator. We recommend typically 15 minutes of wet spa (jacuzzi) and then 15 minutes of dry spa (cot mass exhibition stand ).

## MARKET

The main target are:

1. Home spa (indoor and outdoor e.g. in penthouse, poolside, garden)
2. Professional Spa
3. Spas and massages
4. Welfare in the company (Corporate Wellness)
5. High-profile hotels
6. Clinics, Hospitals and nursing homes (medical protocols currently under development with the Hospital of Arezzo)
7. Nautical supplies (yachts and luxury boats on the fly bridge in place of the traditional hydromassage)

The wellness diffuser we produce, was patented as industrial invention and utility model; and is built with the most technologically advanced components. It is the first patented spa machinery to integrate into a single specific application

frequencies of light, biorifragrances across the spectrum of a pure crystal, acoustic bioresonance, and sequences of 12 aromas controlled and electronically synchronized to awake your physical well-being and improve sleep, relaxation, meditation and energy.

## PRODUCT STRUCTURE

The external structure is made of aluminium, with base in non slip granular sand of Ghiza Valley, and the coating is available in opal or mirrored glass, marbled or according to specific requests.

The AUREA version used for our Pyramids has the following Internal sizes: 230 \* 230 \* 240 (150h pyramid + 90 ventilation base in accordance with L. 626 on hygiene at work); the Hydrovision version has the following sizes: 230\*230\*300.

Gradually all scholars of the phenomenon realized how energy was concentrated in a corresponding point in the middle of the pyramid, roughly in the same position as the King's Chamber of the original one.

Many attempted were made to repeat the experiments but they didn't get always satisfactory results, then scholars came to the conclusion that it was not important to repeat the same things but go ahead with experiments using the same shape and the same measures (to scale) of the Cheops pyramid.

Currently the energy pyramid is used for Reiki treatments, crystal therapy, meditations and massages for which there is the need to "amplify" the physical-energetic effect through pyramid therapy.

Multisensory pyramid resumes in proportion the original size of Cheops Pyramid, where energy was concentrated in a corresponding point in the middle of the pyramid, roughly in the same position as the King's Chamber of the original one.

All energy pyramids are tailored according to customer specifications, and upon request they may be shipped disassembled, or it is possible to have installation on site.

Multi-sensory pyramid has aluminium fairing which constitutes the W. Reich's capacitor; it also respects the aurea section of the pyramid of Cheops, the height of the head is just at a third of the vertex: in this point, in true Egyptian pyramids, was placed the "bath of purification".

Main components: 5.0 Spreader, whirlpool,

## PRODUCT STRUCTURE

Massaging infrared bed, sliding system wet/dry Spa and APP control(Android and iOS)

All products are certified and according to the law CE, in particular the product has been certified according to:

- a) Directive 89/336
- b) Directive 73/23
- c) 98/37/ce, low voltage Directive

It may therefore be considered as:

- a) lighting device, for all checks on the LED lighting (EN 60598-1 and EN 825) for the issuance of the LED and
- b) appliance, for heating part (EN 60335-2-101: 2002)60335-2-101:2002)

The wellness diffuser is also pursuant to Directive 2002/95/CE also known as RoHs directive which provides the prohibition and limitation of use of lead, mercury, cadmium, hexavalent chromium and certain other elements. In particular as for the content of mercury in fluorescent and neon lamps, they

are already RoHs certified and by law. As for the lead content, in particular related to soldering alloys at high temperature, it is lower than 85% as required by law.

Together with the community's directive it has to be highlighted the WEEE legislation on waste electrical and electronic equipment and it has to be indicated that all components of the wellness diffuser are in accordance with the criteria relating to collection, handling and recycling of electrical and electronic waste.

The shell coating are also environmentally friendly and recyclable and belong to the class 1; they have the highest level of security in relation to substances used and are self-extinguishing Moreover in case of combustion they do not discharge harmful gases.

Our technology has been installed in over twenty places between hospitals, Spas, Gyms, Hotels, businesses and Outdoor.

## PRODUCT STRUCTURE SIZES:

For logistics and international freight we have carried out a comprehensive case including all the components of the Pyramid; it measures approximately 130 \* 230 \* 150 (h), to which must be added the separate shipping of the hydromassage.

The AUREA version used for our Pyramids has the following Internal Measures:

230 \* 230 \* 150 h (150h pyramid + 90 ventilation base in accordance with L. 626 on hygiene at work);

the Hydrovision version has the following sizes:

230\*230\*300.

Installation is planned by our professional installers, who with electricians and internal referents, provide for the installation and verification of full working, and provide a comprehensive explanation about the use and the specific know-how to private or holistic operators.

It is also possible to train a distance local referents if the installation is performed by local staff. It is also available a complete manual explaining the operation of all components and Setup mode.

## ABOUT US

N.P.S srl is a company founded in 1999 for research and development in the field of Wellness, with offices and laboratories in Milan.

It constantly collaborates with public and private research centres in Italy and abroad making the product innovation its strength.

It has a deep know-how on wellness technologies which is continuously updated through their experiments.

## ORA IL LUSSO DIVENTA BENESSERE OLISTICO PERSONALIZZATO!

# TECHNICAL SHEET AND ENERGY CONSUMPTION

## Certificates, technical specifications and safety regulations:

This product has been certified according to:

- Directive 89/336,
- Directive 73/23,
- 98/37/ce, low voltage directive.

It may therefore be considered as:

lighting device for all checks on the LED lighting (EN 60598-1 and EN 825) for the issuance of the LED, appliance for heating part (EN 60335-1/2002).

To note that for installation in bathrooms, the reference legislation is law CEI 64-8/7 (annexed regulation on "life-saving" devices). Avoid mounting the Spreader in environments with the following features:

1. Relative humidity higher than 85%.

2. Strong vibrations or knocks,
3. Exhibitions in jets and water infiltration
4. Exposure to aggressive and polluting environments (e.g.: sulphurous and ammonia gases, saline mists) to avoid corrosion and/or oxidization .
5. Other magnetic interference and/or radio frequencies (avoid installing the machine near transmitting antennae) which may compromise the IR transponder.
6. Exposures of controls to direct sunlight and atmospheric agents in general and at least at temperatures above 35° C.

Rated voltage-frequency: 220...240V  
AC \_\_\_\_\_50...60Hz

Rated wattage: \_\_\_\_\_140W

Absorbed current : \_\_\_\_\_ < 1A

/ Lamp cap: \_\_\_\_\_Power with cord

Degree of protection (IP): \_\_\_\_\_IP 4X

Class: \_\_\_\_\_for the low side

tension \_\_\_\_\_

Rated ambient temperature: ta \_\_\_\_\_  
\_\_\_\_\_10...35°C

Minimum distance of lighted object : \_\_\_\_\_1,2m

Type of installation :

Recessed  wall  ceiling

suspension  floor

table  track system

pole:

Provided with appliance)

(not provided with appliance – see instruction sheet)

Indoor use:

Able

Unable

Mounted on :

Normally flammable

Isolating ceiling (only recessed)

Non combustible

All wellness diffusers manufactured by NPS srl license are progressively

numbered. They are also accompanied by the name of the product and have the progressive number on the side of the case.

## IDROVISION LUXURY ENERGY CONSUMPTION LIST

- Jacuzzi mod. City spa with 2 kW heater: 17,5 A – 4,0 kW
- Jacuzzi mod. City spa with 1.5 kW heater: 8,0 A – 1,8 kW
- Air conditioner vortex mod. Kryo-onlyone : 4,0 A – 0,93 kW max (cooling)
- Massaging bed WSM: 0,06 kW
- Wellness diffuser: 0,06 kW
- Apple TV + Epson projector: 0,28 kW
- A) total consumption with 1,5 kW pool: 13,6 A – 3,13 kW @ 230 Vac
- B) total Consumption with 2 kW pool: 23,2 A – 5,33 kW @ 230 Vac
