Collection description:

Inspired by the force of the nature, Inclusioni blends the intensity of color and the poetry of shape creating endless creative possibilities. Surfaces are authentically material and refined: porcelain stoneware flakes produced under the skilful control of our laboratory technicians are deposited on the surface and incorporated; the result is a tangible and three-dimensional effect.

Five colours available: Bianco Perla, Ecrù, Tabacco, Cenere and Vulcano ranging from the white to black passing from a heated note of lionate.

There are two versions available of the surface: Inclusioni Soave shows the harmony of the materials fused in tones and shapes, whilst Inclusioni Extrafine is the final amalgam of the chromatic complex.

Inclusioni Extrafine is a 6mm thickness with two surfaces: Mat and Levigato. The low thickness allows an easy application of Extrafine in coatings or in cases of laying flooring overlapping the existing state, such as in restorations or renovations.

The combination of Inclusioni with other materials - such as metal, wood, velvet - creates special accents, expanding the creative possibilities.
