## Collection description:

Inspired by the force of the nature, Inclusioni blends the intensity of color and the poetry of shape creating endless creative possibilities. Surfaces are authentically material and refined: porcelain stoneware flakes produced under the skilful control of our laboratory technicians are deposited on the surface and incorporated; the result is a tangible and three-dimensional effect.

Five colours available: Bianco Perla, Ecrù, Tabacco, Cenere and Vulcano ranging from the white to black passing from a heated note of lionate.

There are two versions available of the surface: Inclusioni Soave shows the harmony of the materials fused in tones and shapes, whilst Inclusioni Extrafine is the final amalgam of the chromatic complex.

Inclusioni Soave has two thicknesses 12 and 24mm with three different surfaces: Mat and Soft especially used for indoor installations or partially covered environments. The third surface available is the Bush-Hammered, with the possibility of making the anti-slip, for design solutions for outdoor and uncovered spaces.

The combination of Inclusioni with other materials - such as metal, wood, velvet - creates special accents, expanding the creative possibilities.
