NEWS 2023-2024

We have been taking care for years the goal
of environmental sustainability: since 2020
a line of paper pinwheels with wooden stick
all FSC certified is available.

And to empower our eco friendly behavior
also the plastic, the raw material we use to
make our pinwheels is over 85% recycled and
recyclable. We have reduced waste from
production for example reusing cutting waste
for the production of the assembly
components of our pinwheels.

Our balloons are also ecofriendly: they are
made of 100% of latex natural rubber colored
with pigments 100% organic based: natural
and environmentally friendly!

And for this year we have decided not to
take part to the International Toy Fair
in Nurnberg: the situation is still so delicate
and precarious that we have decided to
invest in stock and in technical improvements
for our products and our customers.
If you want to see our products please
contact us and we will send you catalogs
and samples by e-mail or by speed courier
according to your needs.
And if you like to visit us: we are here!
