

HySerPen

HySerPen

HySerPen is a simple, reliable and safe concept for the modern dental practice.

A range of versatile diode lasers for the most common dental applications.

No power or foot pedal cables, everything you need will be in your hands.

Swiss & Wegman have designed three versions for the different needs of the dental practice:

- **HySerPen PRO**
- **HySerPen +**
- **HySerPen PDT**

HySerPen PRO

HySerPen PRO is the unit for the advanced hygienist wherever they work. It is practical, light and easy to handle.

TOOTH WHITENING

BIOSTIMULATION

DENTINE
DESENSITISATION

DECONTAMINATION
OF POCKETS

HySerPen +

HySerPen PLUS is the option for the dentist who approach for the first time this technology and need to find a simple solution, but also it is for the expert dentist that needs a second laser equipment and a simple yet effective product.

TOOTH WHITENING

ENDODONTICS

SUPERPULSED INTERNAL
POCKET DECONTAMINATION

SUPERPULSED
PERI-IMPLANTITIS

BIOSTIMULATION

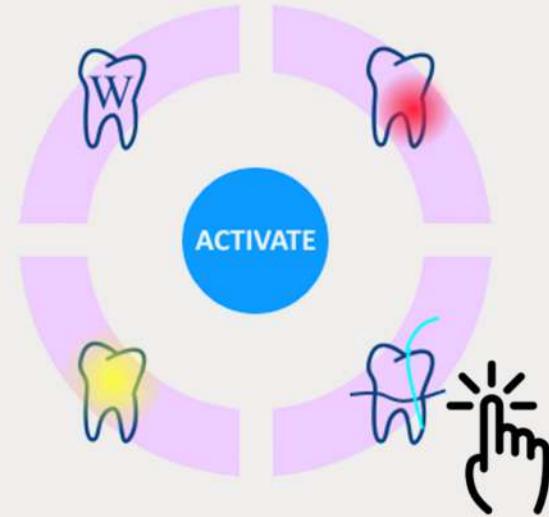

PERI-IMPLANTITIS

Treatments

Pre-set treatments have been developed for various dental indications.

At the touch of a button, the correct parameters for each indication are applied immediately without any margin for error.

Base unit

The HySerPen system is equipped with a base unit for recharging the handpiece and selection of the settings in a simple and intuitive way.

A large number of tips and applicators complete the range of accessories supplied with HySerPen.
