www.tecnidecor.com

Stretch ceiling is the best finish for harmonizing ceilings, making settings particularly pleasant, original, animated and different.

Stretch ceilings are self-supporting membranes. Ideal for creating flat or curved surfaces, through different kinds of finish i.e. matt, satin, mirror lacquered translucent backlit, printed, perforated acoustic, textile and metallic ceilings. All available in many colors.

Minimum space between ceiling and stretch ceiling is 3 cm. Assembly is made using hot air generator, without dust or waste materials. Stretch ceiling is a false ceiling so recessed luminaires, loudspeaker etc. can be installed on it, with their appropriate kits.

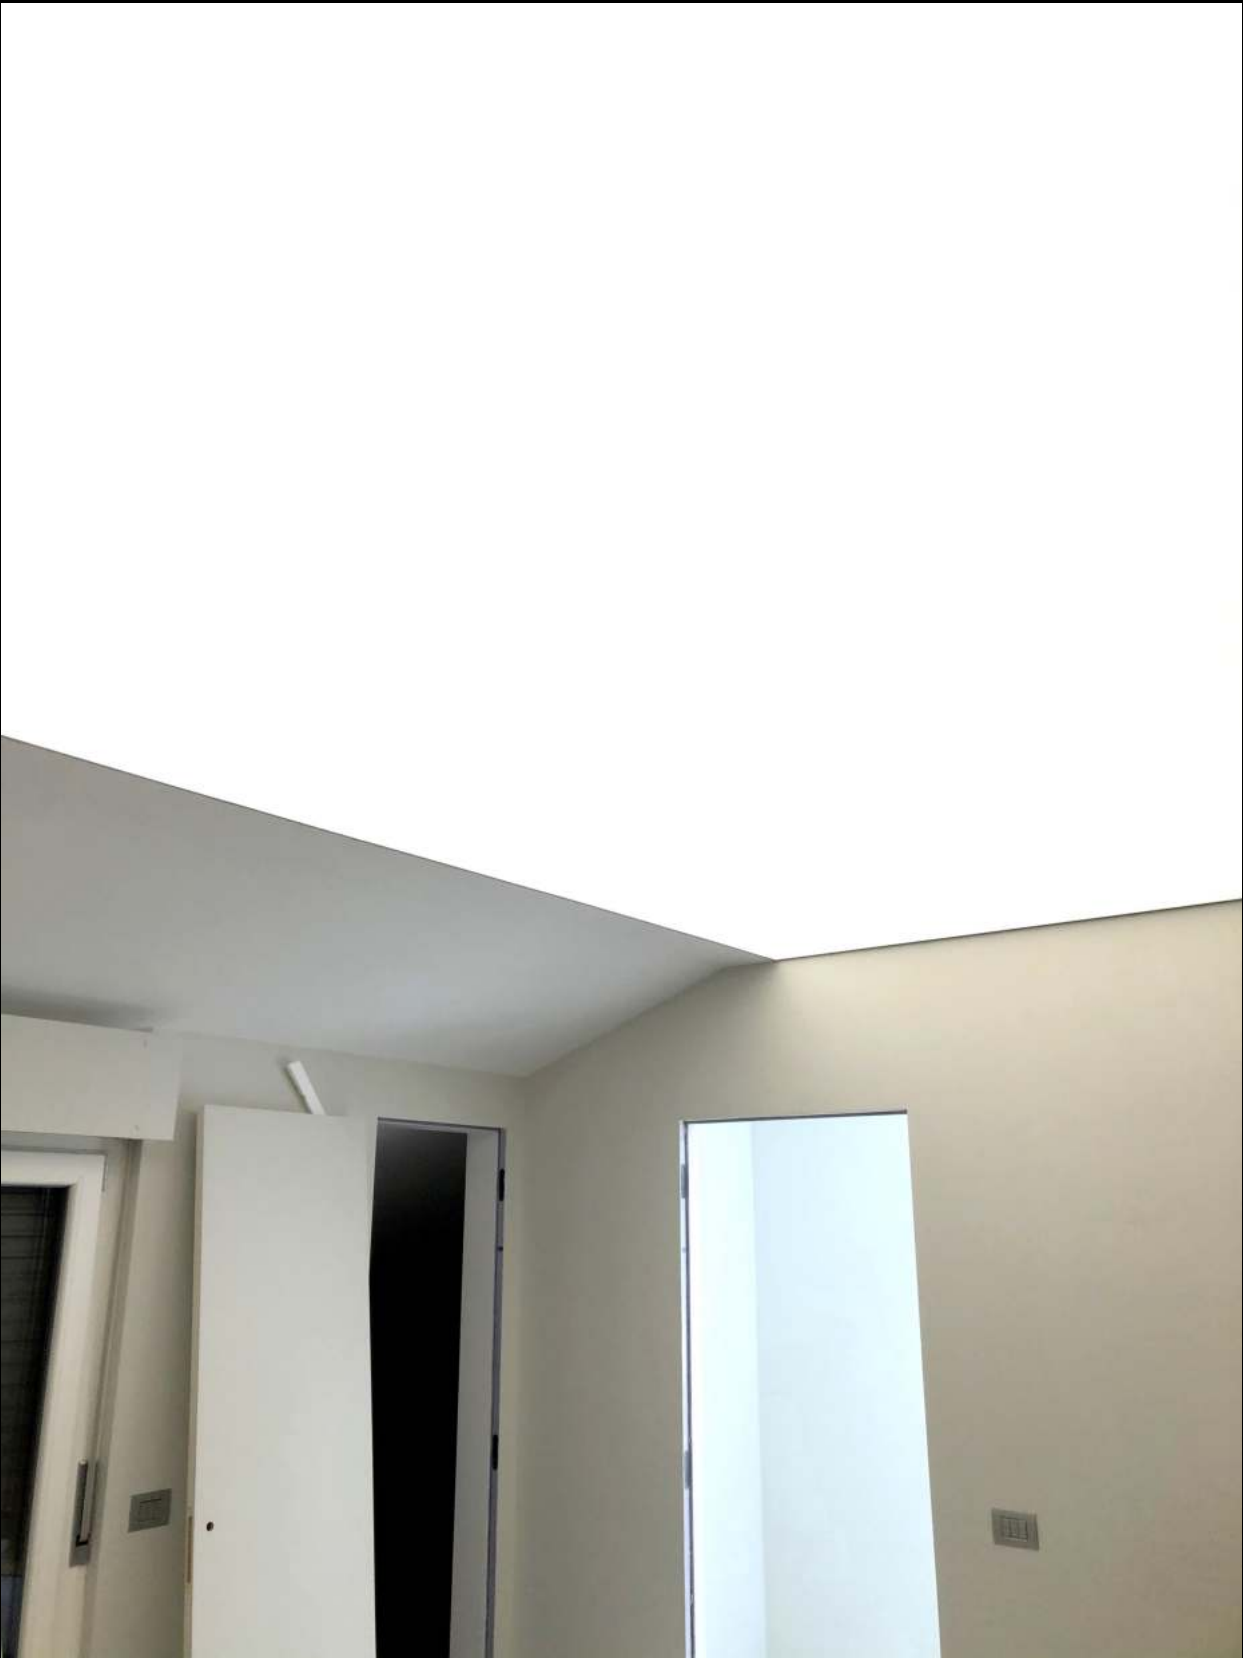

Painting is not required throughout time. Stretch ceiling is the solution to emphasize interior design and setting details.

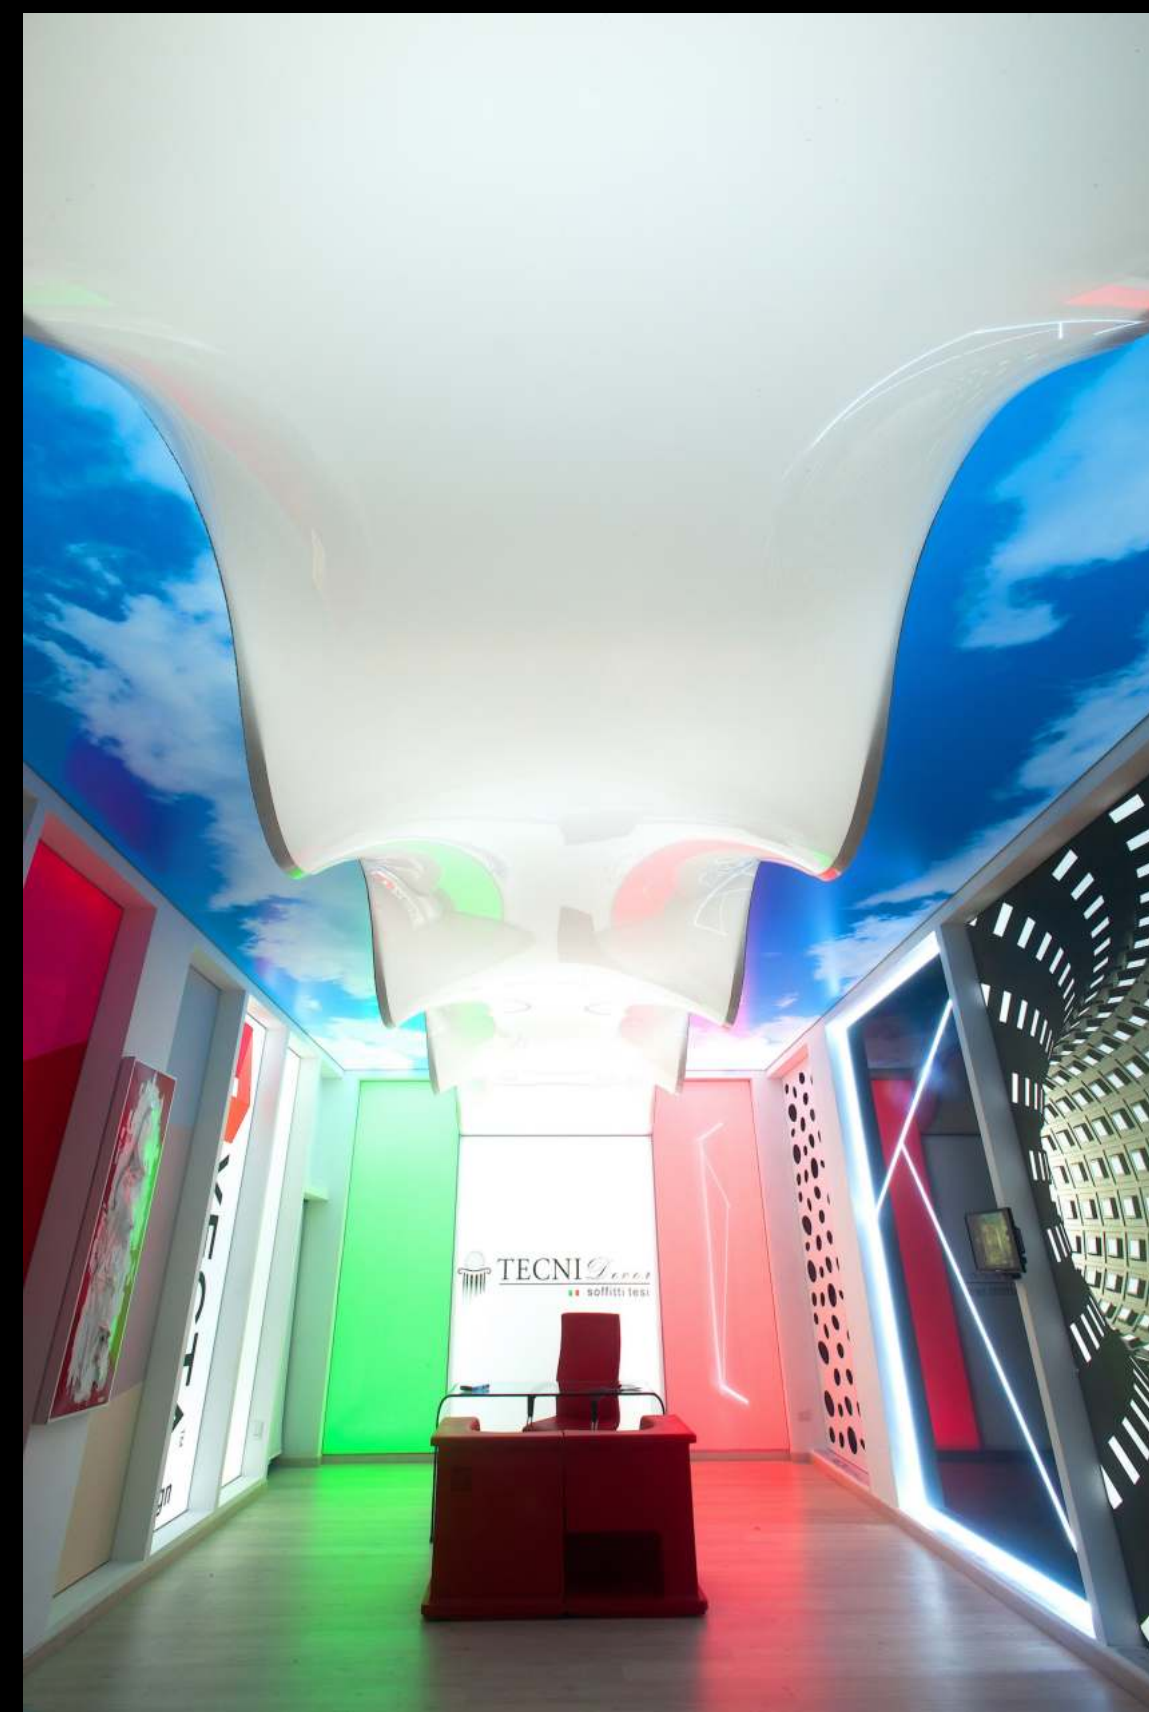

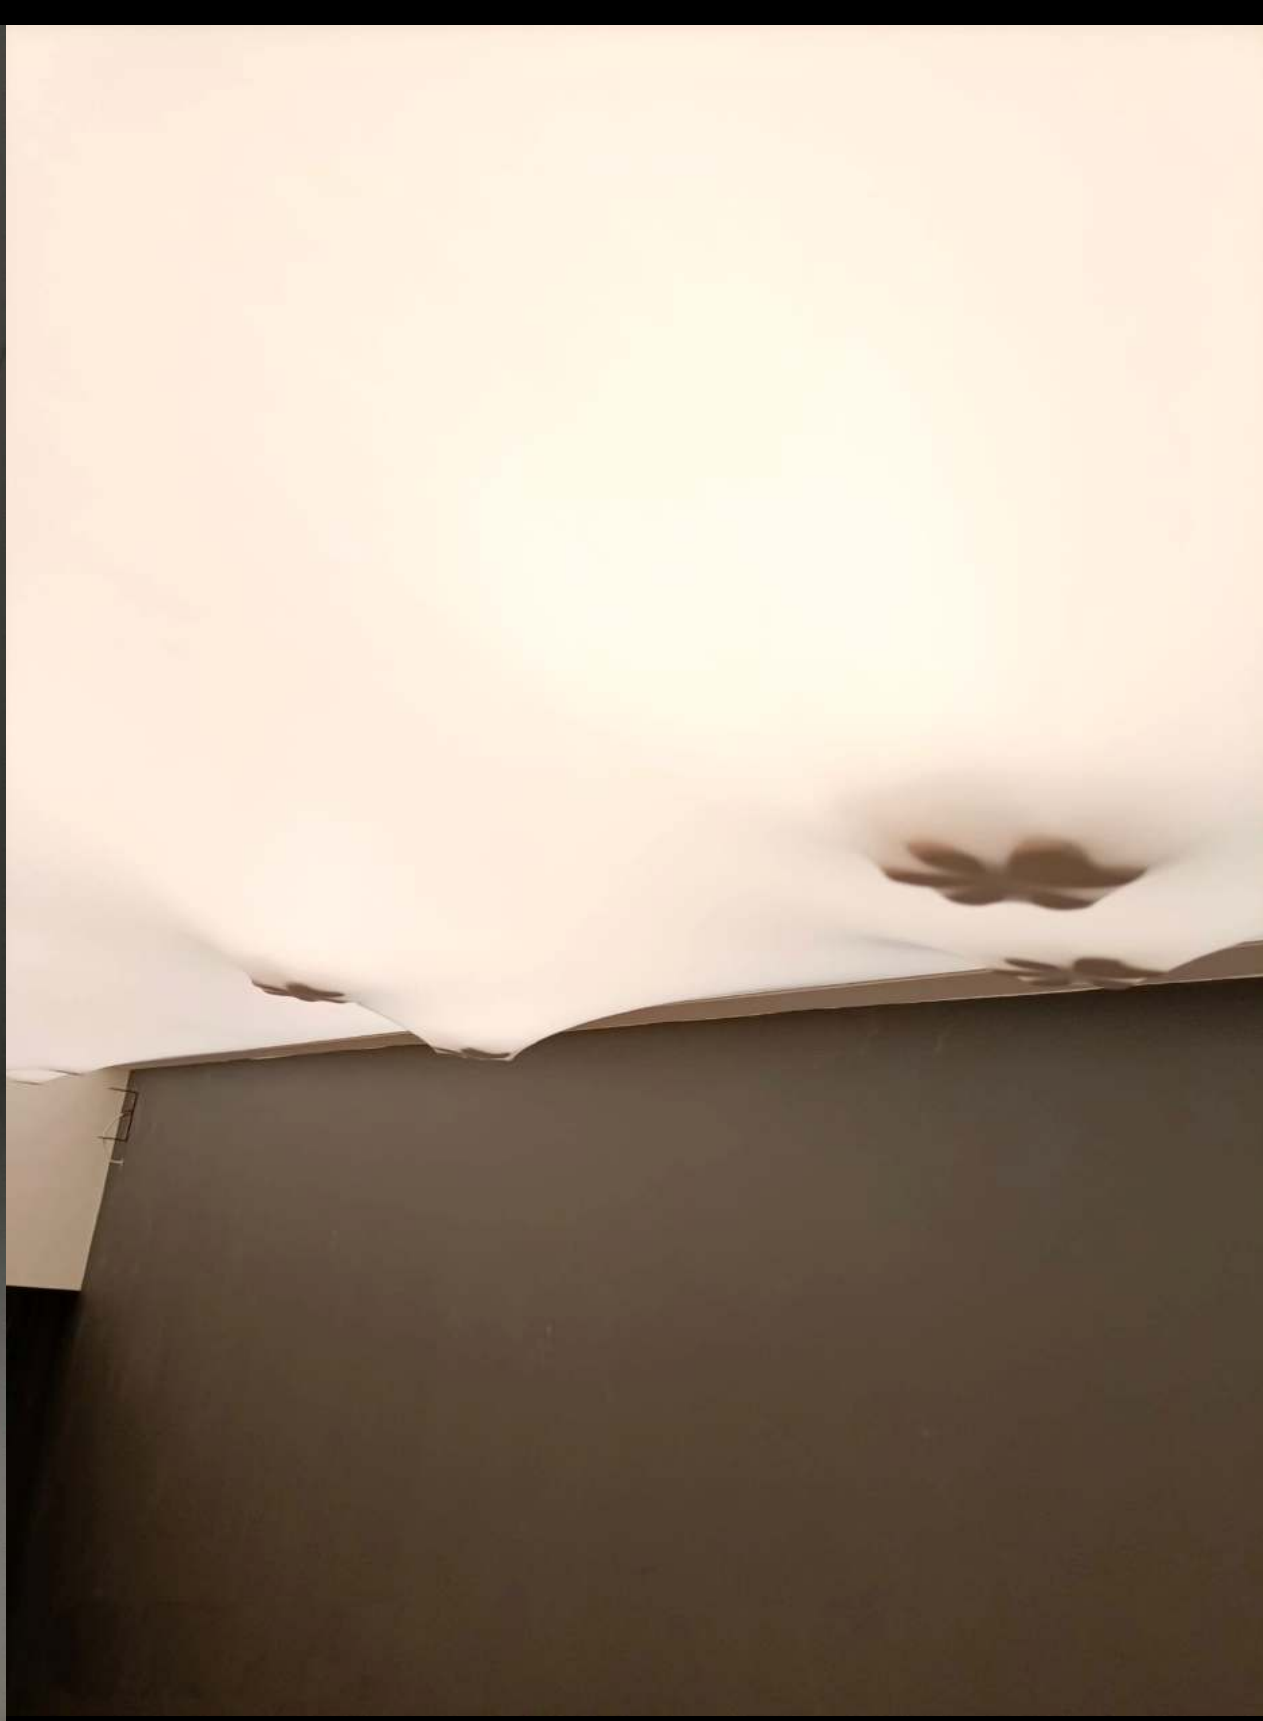

Class B-s1,d0
Class B-s2,d0
EN 14716:2004

 **TECNI Decor**
soffitti tesi

The backlit stretch ceiling is the most attractive finish for the outstanding result you can get from it. When you turn on switch, light is spread by chandeliers, spotlights, ceiling lights or neon lights but backlit stretch ceiling is able to enlighten the entire ceiling, besides its shape or size. It is possible to use led lights to create special play of light and shadow. finish is available in different models.
