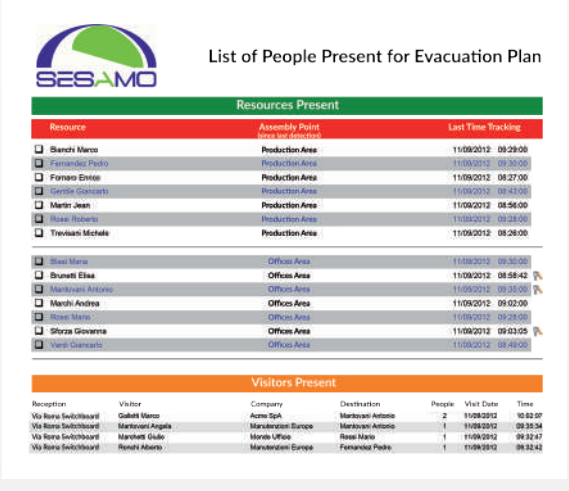
EVAPLAN

SAFE Safety&Security

Automated Evacuation management

EvaPlan is the automatic system that requests confirmation of presence of those on company premises in real time and manages the evacuation by swiping badges at the assembly points.



List of People Present for Evacuation Plan

Resources Present

Resource	Assembly Point (since last detection)	Last Time Tracking
Bianchi Marco	Production Area	11/09/2012 09:29:00
Fernandez Pedro	Production Area	11/09/2012 09:30:00
Fornaro Enrico	Production Area	11/09/2012 08:27:00
Gentile Giancarlo	Production Area	11/09/2012 08:43:00
Martin Jean	Production Area	11/09/2012 08:56:00
Rossi Roberto	Production Area	11/09/2012 09:28:00

Via Roma Switchboard	Marchetti Giulio	Mondo Ufficio	Rossi Mario	1	11/09/2012	09.32.47
Via Roma Switchboard	Renzini Alberto	Manutenzioni Europe	Fernandez Pedro	1	11/09/2012	09.32.43

Why EvaPlan?

- Provides the list of people present updated in real time
- Eliminates the need to stay inside the facility to launch calculations or printouts at the beginning of the emergency
- Speeds up evacuation management compared to paper presence confirmation lists, minimising errors
- Logs all the emergencies and evacuation drills carried out at the Company
- Processes emergency statistics (duration, people present at assembly point, time between start of evacuation and first time tracking at assembly point, etc.)
- Can be combined with Sesamo Reception to monitor visitors

EVAPLAN

Automated evacuation management

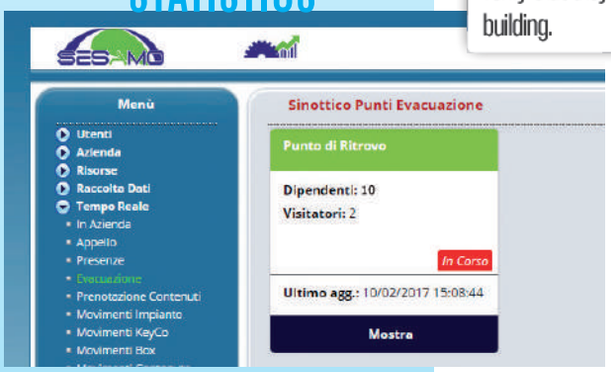
Prints the list of people absent at the evacuation point

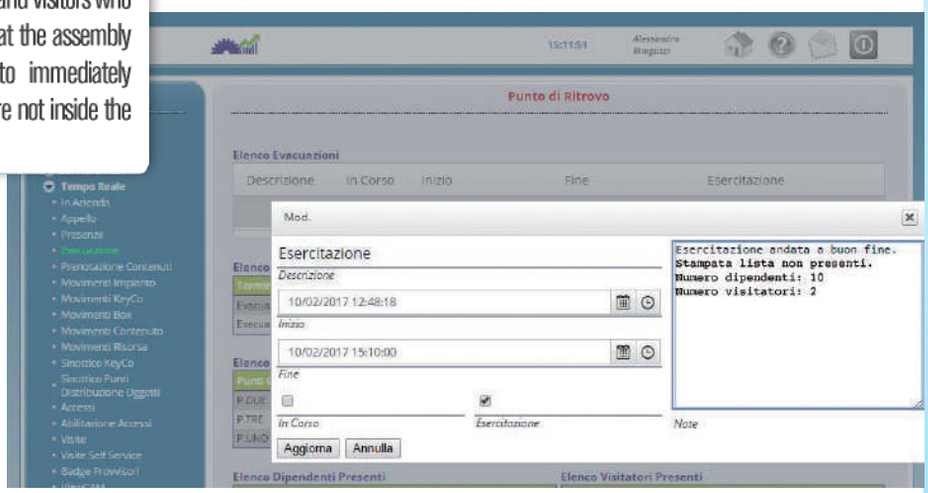
Thanks to the printer installed with the EvaPlan touchscreen terminal, it is possible to print the list of Employees and Visitors who did not show up at the assembly point, in order to immediately verify that they are not inside the building.

EVAPLAN ENABLES TO:

- Provides the total number of people present at the Company in real time
- Show the presence confirmation list divided between employees and visitors
- Manage evacuations directly from the assembly points
- Select the emergency management method through the touchscreen terminal at the evacuation point
- Use any type of badge already in use at the Company
- "Cross off" an employee or visitor, even manually, on the touchscreen
- Report the end of the emergency to the Sesamo software through the terminal
- Indicate, at the end of the presence confirmation request, who is still inside the facility, providing the names printout

EVACUATION LOG AND STATISTICS





On the Sesamo software, the supervisor declares the end of an emergency situation for the entire "Group of Evacuation points". Sesamo EvaPlan saves a log of all Emergencies and Evacuations carried out, with results, notes, list of people present and enables to export reports.

INTEGRATION WITH SESAMO SUITE FOR VISITORS MANAGEMENT AND ACCESS CONTROL

EvaPlan integrates with the Sesamo Access Control Suite, which records and stores all entrances and exits. In the event of an emergency, EvaPlan recognises badges already used by employees, and any badges assigned to visitors for access and presence.
