Ezio Colombrino, Neapolitan, 1959. He graduated in architecture at the Milan Polytechnic with an address in Industrial Design, he studied with Enzo Mari and Achille Castiglioni. For years he has participated in art and design exhibitions in the world curated by Alessandro Mendini.

Founder and CEO of Arco Arredo and Lune Design, he self-produces furnishing objects made mainly with DuPont™ Corian®, metal, wood and composite materials. Alternate manual artistic experimentation with rigorous design and production phases.

From 2017 he is in the [operating team of the Handmade in Italy Commission-ADI \(Industrial Design Association-Gold Compass\)](#).

Simple, modern and fully functional objects.

"From an encounter with two talented carpenters and two young engineers working on CNC machines, an excellent design collaboration was born with production goals. A self-production activity has developed with a great design and above all productive quality. "We use 3D modeling software that is translated into machine language for 5-axis CNC workbenches, we can produce anything at very competitive costs, we only use the best materials and our carpenters are master cabinetmakers for several generations. In addition to carrying out all the entrepreneurial phases, we participate directly in production, because it gives us joy in creating things done with love ... and with our own hands. "

Ezio Colombrino

Produzione e prototipazione

Complete curriculum

Here's how we make prototypes, small customized productions and furniture productions:

First the objects are designed in 3D modeling with software such as Catia, 3Dstudio and other programs that establish thicknesses as well as crash test checks and more. For thermoformed objects that use materials such as Corian® or composite materials, we personally make the molds.

See example: <https://youtu.be/FUkuni72jHU>

The files are transformed into machine language and therefore the cuts of the parts are made in the workshop with cutting-edge 5-axis CNC machines for wood, Corian® and metal..

The final assembly and finishes are then carried out by master cabinetmakers with experience handed down from various generations.

Description

The "Tzeno" shelf decorates the wall with a decisive and modern design. The tapered profile creates a pleasant dynamic effect. "... The shapes are inspired by the Stealth planes ..." design: Antonio Lieto.

Your guests will be impressed by seeing an object so exclusive !!. Shelves suitable for furnishing large walls. They are made in various finishes. Designed to be used individually or in combination: as an entrance console, with a mirror, a painting, they can complete the large spaces occupied by large wall TVs ...

Here with a few elements you can give spaces a simple style, elegant and very exclusive.

The assembly system

The boxy and tapered shape hides an extremely simple, immediate and effective assembly system.

Materials and variants

The shelves are made of solid wood in matt white lacquered blockboard and white DuPont™ Corian® (G. White).

For the following finishes on order delivery about 20 days:

- DuPont™ Corian® - black (Deep Nocturne), Red (Royal red) e possible all other Corian® colors with a minimum order of two pieces.
- Matt colored lacquered wood (on request all RAL colors).
- India Palissandro wood (Birch plywood with ALPI veneer)
- Ebony Ebony wood (Birch plywood with ALPI veneer)
- Zebrano wood (Birch plywood with ALPI veneer)
- Light Oak Wood (Birch plywood with ALPI veneer)
- Decapé Oak Wood (Birch plywood with ALPI veneer)
- Canaletto walnut wood (Birch plywood with ALPI veneer)
- Gray Oak Wood1 (Birch plywood with ALPI veneer)

Possibility to customize dimensions, material and finish / color, send the request to info@lunedesign.it

CORIAN®
DESIGN

Wall bedside table 'Dino' - in DuPont™ Corian® and wood

Essential and clean shape.

It fits perfectly next to all the modern bed headboards. It takes up minimal space. The wall suspension allows you to clean the floor easily allowing better hygiene. Design Ezio Colombrino.

The curved surface uses the typical thermo-molding properties of DuPont™ Corian® with a matte finish. In one element elegance and practicality.

Possibility to install Wireless (inductive) recharging for mobile phones. It will be enough to place the mobile phone on the bedside table to recharge the phone without the need for wire - (only on request)

The bedside table hooks to the wall with a very simple system giving the possibility to bring back the electrical outlets hidden on the side in order to be more comfortable; even the wires of lamps and mobile phones will be more hidden. Drawer in various wood essences.

The total width of the bedside table is 45 cm. Depth 31cm or 34.5 cm depending on the spacer from the wall you choose. Total height 27 cm.

The shelves of DuPont™ Corian®

All shelves are made of 12mm DuPont™ Corian® sheets in white 'Glacier White' or, on request at the same price, light beige 'Bone'. Professional processing exclusively according to DuPont™ Corian® protocol. The finish is a beautiful semi-matte velvety with the following abrasive sanding passages: (number of grit) 120/240/320 / 400. On request also glossy finish with an increase of 15% of the cost

Wooden drawers

You can choose from the following finishes: solid Canaletto walnut, solid light oak, white lacquered.

The drawers are made of solid wood with a transparent velvety opaque finish, absolute resistance and easy maintenance and cleaning. On request also transparent glossy finish.

Lacquered wood

It is expected opaque white, but on request, for all RAL colors in matte finish, there is an increase of 10% while for glossy colors and glossy white the increase will be 25%. N.B. the internal parts of the drawers can not be polished.

It is possible to request other types of wood or colors: info@lunedesign.it

product details

CORIAN®
DESIGN

Description

Umbrella stand designed to accommodate a large amount of umbrellas of all sizes and to impeccably collect all the possible dripping water from the umbrellas avoiding to wet the floor in any way. Design Ezio Colombrino.

The metal rings, in their shape and size, are designed to give stability when you have to accommodate a large number of umbrellas.

The smaller folding umbrellas can be placed directly in the cube so that they can be easily retrieved even when the umbrella stand will be full.

The rings that make up the central part are in brushed stainless steel and give a truly original look to the object.

The umbrella stand is made of water repellent materials ideal for being in contact with water.

Inside, on the bottom, an elegant red support of pyramid 'ashlar' expanded polyurethane, fixed the eventual movement of the umbrella, at the same time, allows to easily eliminate the accumulation of water.

This interesting element stops the tips of the umbrellas and makes sure that these can be inserted freely in each part and not necessarily in the metal circles. The latter are necessary only in an overcrowding of umbrellas, in public offices or waiting rooms.

All formalisms have been excluded: every form of every single part, comes from a precise logic linked to the function and the materials used and their processing.

more containing, in a stable way, over 30 umbrellas allowing the easy finding of the little umbrella!

Materials

Base and container:

DuPont™ Corian® in white or red
(on a minimum order of 8 pieces, there is the possibility to choose one of about 100 DuPont™ Corian® colors).

Alternative version in plastic material

Metallic parts:

Both versions do not have the same element in satin stainless steel.

Dimensions

Base 24 cm

Container cm 22 x 22 x h cm 23

Maximum height 72 cm

CORIAN® DESIGN

Table with Corian top and base in matt white painted steel

CORIAN® DESIGN

Table with Corian top and hand polished stainless steel base

Description:

Table top in DuPont™ Corian® with a thickness of 1.2 cm. Light bevel on the edge. Matt sanding * on all visible sides. - Simplicity with minimal sections; is the archetype of the table. Design Ezio Colombrino.

Its elegance is given by the right proportions and simplicity. Pure and essential form where everything is at a minimum. It is made with the best materials.

Structure in polished or satin stainless steel. Made entirely by hand.

The base being in STAINLESS STEEL tubing will not have any deterioration over time such as chrome or other: pure and simple polished or brushed stainless steel. This table, due to the excellent quality of its two components (DuPont™ Corian® and stainless steel), can be used both inside and outside homes).

Structure:

- mirror polished stainless steel
- brushed stainless steel (satin effect)
- matt white painted steel
- matt black painted steel

Dimensions:

The tables are all 74 cm tall

- cm 180 x 92
- cm 200 x 92
- cm 220 x 92
- cm 240 x 120
- cm 150 x 150

product details

Floor materials:

- DuPont™ Corian® color bianco opaco mod. Glacier White
- DuPont™ Corian® color nero opaco mod. Deep Nocturne

It is possible to realize the plans with all the available colors of DuPont™ Corian® with increased:

10% for the colors of category 1 and 2

20% for the colors of category 3 and 4
