AVAILABLE IN

Bags of 1000g
whole beans

ROASTING AND QUALITY CONTROL

Our products are the result of a careful study combined with a masterly low roasting, carried out in a way that allows us to enhance all the peculiarities and organoleptic characteristics which distinguish each single origin. The roasting level of each production batch is monitored, at the end of each roasting cycle, by measuring with a colorimeter

PACKAGING

The packaging is done only when the beans have reached the ideal stage of development and resting. To preserve the freshness and the flavor of our coffee, our bags are equipped with an "aroma-protection" valve. The ground coffee is vacuum packed. The ESE pods are made of 100% compostable materials, certified OK COMPOST - Industrial by TUV AUSTRIA and individually packed
