40 YEARS OF EXPERIENCE AT THE SERVICE OF THE MOST PRESTIGIOUS BRANDS

In our goldsmith craftsman laboratory, located in Valenza, we have over forty years of jewelry manufacturing experience at the service of the most important international brands.

Our mission, from the outset, is to consistently improve the manufacturing process so the quality of the finished product satisfies our client's needs and garners their loyalty and trust.

Hand-made craftsmanship aligned with continued research in cutting-edge technology allows us to create the most refined jewelry and time-pieces.

We provide a complete rendering of the project starting from the hand-drawn design to a total 3 Dimensional view, inclusive of the entire engineering process, to a completely finished product.

Our unique jewelry pieces have been showcased at the most important trade shows world-wide, including Couture Las Vegas.

Versatile and modern, our jewelry appeals to the most sophisticated clientele and anticipates future trends.

COMMISSIONS FROM THIRD PARTY LUXURY BRAND NAMES

Key aspects of our business include Research and Development, private label manufacturing, exquisite mastery of gold craftsmanship, adherence to strict quality and product control, and commissions from third party luxury brand names.

Our know-how and standardized processes allow us to interface our production with multinational companies and are another key aspect of our business.

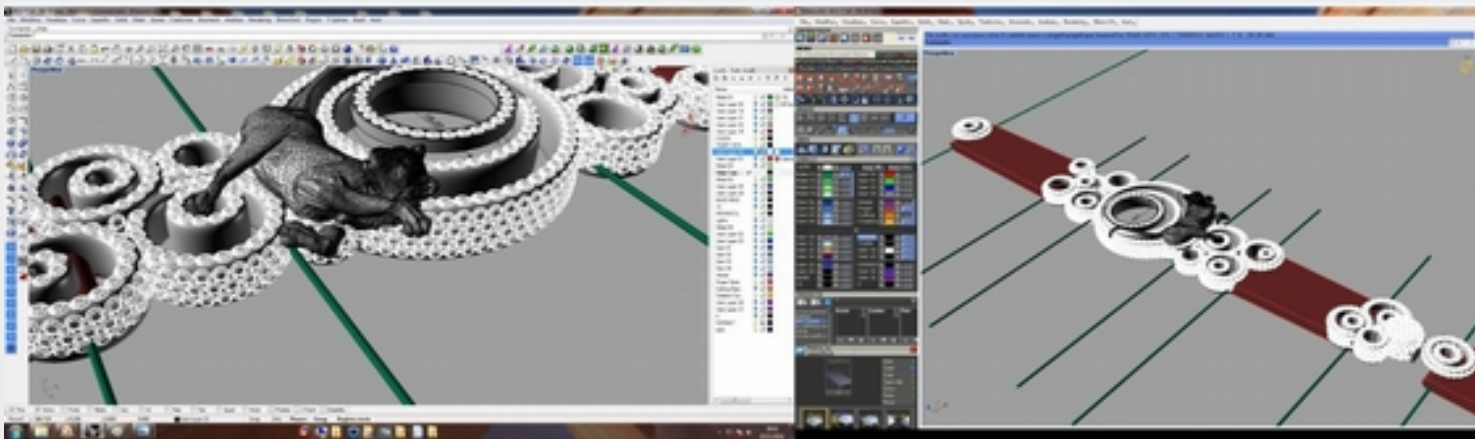

WATCHES AND CLOCKS

With regards to watchmaking, and in particular to the watch regarded as a jewel or piece of art, our collaboration with the renowned Swiss company Swiss Made, has allowed us to perfect the intricate know-how behind table clocks and wrist watches.

All of our creations are made with micro embedding, magnified up to 20 times.

UNIQUE HANDMADE SURPRISES

Ebony, ceramic, hard artistic stone and enamel are a few of the materials used in the collections we designed throughout the years.

The mastery attained working with gold and the ability to interpret sketches and drawings with accuracy and detailed artistry, while still maintaining strict quality control, are geared to the most discriminating needs of our commissioning clients.

PROTOTYPES

We design, produce and engineer prototypes utilizing cutting-edge technology for 3D printers.

Using the most well recognized working platform available in the industry, we design prototypes with a variety of different waxes and resins, such as moldable but not fragile wax, resins for direct casting, rubberized ceramic heated to 180°, or simply an aesthetic casting for approval.

Our latest application is Irix Digital Stone decorative ceramic.

CONFIDENTIALITY

Protecting confidentiality and secrecy are invaluable to us.

We partner with the most well regarded international law firms to safe-keep and register patents on client designs and brand names.

PERSONALIZED PRODUCT DEVELOPMENT

Dedicated towards retailers or franchises with multiple locations who want to develop their own jewelry or watch collections on a smaller scale.

Personalized projects to create value and brand recognition

Personalized projects to create unique pieces for a client's special stone or gem

We are the ideal partner who can design and create exclusively for you, your unique pieces of art and give shape to your dreams
