DESIGN & DEVELOPMENT

We develop four collections each year, in line with the four trade fairs we participate in, including MICAM and Garda. In addition, we create bespoke collections tailored to the specific needs of our clients. Our team includes highly specialized footwear technicians, capable of translating a client's concept into an industrialized product.

We manage the entire product lifecycle, from development through to order shipment.

Flexibility, expertise and creativity define our approach. Launching a new collection is always an exciting journey.
