

MEDENCY

Laser energy for life

PODIATRY

Comfortable Laser Solutions

WHO WE ARE

MEDENCY was born at the intersection of technology and medical vocation.

Our company simplifies clinical complexity with intuitive, reliable, and portable laser solutions. Each device is designed as an extension of the professional's hands—a tool that transforms the benefits of light into precise and respectful care.

It's the meeting point between technology and conscious choice, putting patient wellbeing at the heart of every decision.

Medency is an Italian company working alongside healthcare professionals as a trusted and innovative partner, fully compliant with international standards **ISO 9001** and **ISO 13485**, ensuring quality, safety, and traceability at every stage of production.

To meet the needs of the global medical sector, our laser technologies are certified by numerous regulatory bodies and health ministries worldwide. We comply with the **European MDR** Regulation and hold **FDA** clearance for the US market, guaranteeing access to reliable, effective, and safe solutions.

Our Promise

Medency's RAPIDO PODIA gives podiatrists cutting-edge laser tech that blends top-notch effectiveness, safety, and ease of use. It enhances the patient's treatment experience and equips pros with state-of-the-art tools for their daily work.

PRECISION AND VERSATILITY FOR PODIATRY

RAPIDO PODIA is the laser device designed for podiatry pros who want a versatile, effective, and dead simple solution. With its cutting-edge tech, it delivers precise vaporisation, instant coagulation, and minimal thermal impact on tissues—meaning safe, comfortable treatments even in the foot's trickiest spots.

Podiatry applications

Treating hyperkeratoses and warts

Targeted action that zaps skin lesions effectively without harming surrounding tissues, slashing trauma and easing post-op recovery.

Managing plantar ulcers

Biological stimulation that kickstarts healing and cuts down local inflammation.

Treating nail lesions

Targeted, painless therapy for infections, onychomycosis, and other nail issues like onycholysis and onychodystrophy.

Biostimulation treatments

Supports tissue recovery with the laser light's anti-inflammatory and regenerative effects.

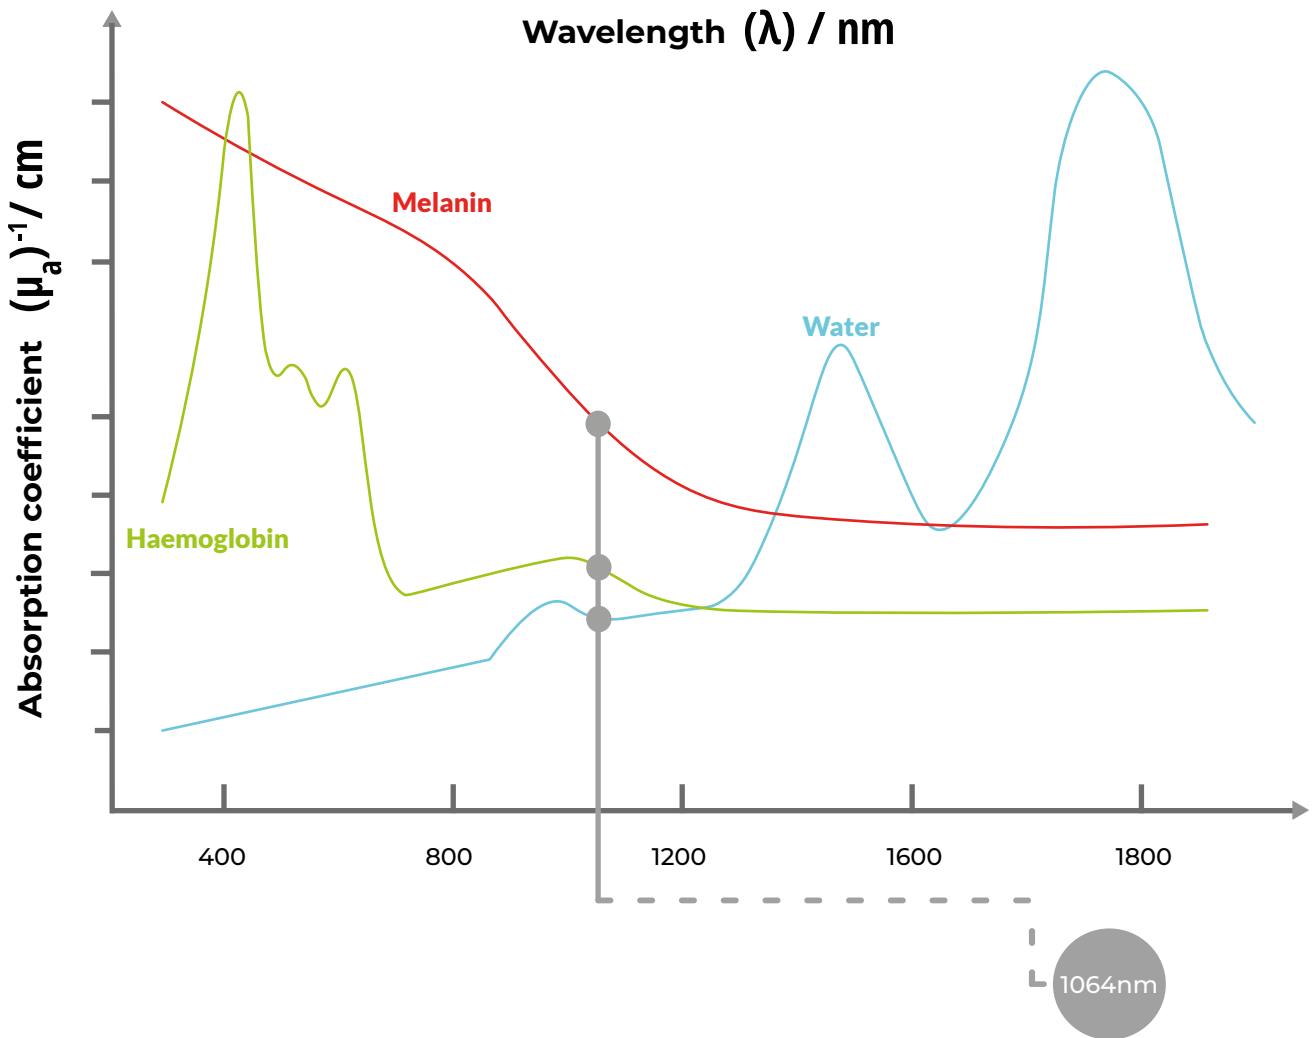

MEDENCY

1064 NM FOR FOOT CARE

The **1064 nm wavelength in podiatry** ensures the best penetration within the therapeutic window available on the market.

Its versatility for antimicrobial, anti-inflammatory, analgesic, and regenerative treatments demonstrates tangible clinical benefits and improved quality of life for patients.

This wavelength lets you fine-tune heat perception in patients with higher eumelanin levels, that dark, insoluble pigment that soaks up 830 nm lasers but handles **1064 nm** much better.

It means longer, more tolerable sessions, better results on darker skin tones, and deeper tissue stimulation.
