Mod. - 278

- TEACHERS CHAIR WITH 2 DRAWERS

Construction features:

- Structure in round steel tube minimum thickness \varnothing 40x1.5 connected to the perimeter structure in minimum rectangle steel tube mm. 40x20x1.5. Four legs, each welded to the perimeter tubes.
- Painted with epoxy powders baked at 200 ° after degreasing and phosphating treatment.
- Top in chipboard with a thickness of mm. 20 covered both sides in plastic laminate with 9/10 thickness finish. Edges of rounded solid beech wood, natural varnished with non-toxic paints.
- Leg cover panels on 3 sides in melamine-faced chipboard with a thickness of mm. 20.
- Equipped with two suspended drawers. Lock on the first drawer. Double key yale type folding and handles on both. The drawers slide on metal guides equipped with a sliding trolley and limit switch system.
- At the base of the structure there are anti-noise tips in non-slip plastic material which ensure sufficient silence during use and movement and do not scratch the floor
