

Guarantee of Quality and Patent

Mokilu 'jewels are made of AISI 316 steel in the steel color of the pendant. The chain is in rhodium-plated, nickel-free brass material. Each Mokilu jewel is made more precious by imperfections due to a craftsmanship, the enamel cutters are water resistant but could be damaged by corrosive substances. However, the enamel remains a fragile material and sensitive to shocks and scratches. Mokilu 'jewels are guaranteed for two years from the date of purchase exclusively for manufacturing defects. The processes that include gilding, rhodium-plating, and palladium, are excluded from the guarantee as well as the break due to the opening of the two parts that enclose the central shape of the jewel. It is recommended to avoid contact with cosmetics and perfumes that could damage the finish with chemical substances and in particular with chlorine, as well as to take special precautions during the performance of some sporting activities, domestic etc.

Mokilu 'is a registered patent.
