DIGITAL PRINTING

**We are able
to print on any
medium of any
size.**

Quality is always guaranteed.

Printing is a constantly evolving world and, as such, it is necessary to always be up to date and to use the latest technologies to guarantee an excellent result.

We have state-of-the-art machinery as a greater guarantee of a product that will increase the value of your communication.

Quality, speed and innovation

Thanks to our technologically advanced printing machines, we are able to create high quality images on a variety of media. Advertising materials, hoardings, canvas prints, backlit advertising media, banners and all the more complex graphics, suitable for communication, can be created.

All the inks are water and light resistant as standard for high quality, long-lasting large format prints. Another fundamental aspect is the printing speed: professional results, even for high runs, in the shortest possible time.

6

DESIGN

An impeccable result starts from the design.

Our design department is made up of a team with considerable experience, which makes use of the most modern IT design tools.

RENDERING

We present the final product even before making it.

We offer a highly professional service that is able to create graphic and architectural proposals through rendering that allow displaying of the final result in the required setting.

PROTOTYPE AND CREATION

Our specialist technicians are able to complete even the most complex orders and to find the best solutions quickly.

TECHNOLOGY

A constantly updated and high performing machine fleet.

Latest-generation and always up-to-date printing machines and cutting machines. The constant maintenance of our machinery allows us to be always ready to satisfy every customer requirement.

PRINT MEDIA

The use of innovative materials, all certified for their intended use, allows the renewal of furnishings, walls, ceilings, glass, floors, façades, lifts and small spaces, creating real spaces for communication with the customer and with the users in general.

Adhesive films of the best brands

Four-colour process prints, hot laminated with short- and long-lasting transparent protective adhesive film.

Translucent films

For the decoration of luminous signs.

Colour adhesive films

For "pre-spaced lettering" use.

Sandblasted or sanded adhesive films

For stained glass decoration.

One way

With its wide applications in the field of decoration of shop windows, stands, vehicles and many other creative solutions.

Semi-rigid repositionable sticker

For the decoration of luminous signs.
To reduce interventions by specialist personnel.

RECOMMENDED USES

Signage, vehicle decoration, shop window decoration, smooth or corrugated indoor and outdoor surfaces. Opaque films for wall or floor decorations, short-lasting adhesive for events or trade fair stand set-ups.

Sheets and fabrics

Four-colour prints.

Single-sided PVC sheet

Full colour prints.

Mesh sheet

Single-sided PVC mesh, four-colour print

Night & day one-sided PVC sheet

With black core on the back to block the passage of light.

Two-sided block out PVC sheet

Single-sided PVC mesh, four-colour print.

Flag fabric

Ideal for flags, banners and curtains.

Back light and pearl PVC sheet

Backlit for luminous signs.

Sheets in polyester and canvas fabric

For promotional material, shop windows, medium-large surface banners.

RECOMMENDED USES

Flags, banners, curtains, shop windows, creation of banners of medium-large surfaces, indoor and outdoor.

Rigid panels

Direct four-colour printing.

Expanded PVC

Forex type, 3; 5; 8; 10; 19 mm to create panels, signage, interior design, exhibitions, trade fairs.

Translucent films

For the decoration of luminous signs.

Kapa line

“Sandwich”, th. 5 in expanded extruded polystyrene and two sheets of cardboard. Ideal for promotional material.

Piuma

Compact extruded polystyrene and 1 mm semi-expanded PVC sheets. Ideal for medium- and long-term promotional material

Polionda

It is a product with a honeycomb structure made of polypropylene that stands out for its low cost and resistance capacity outdoors. Available thicknesses: 3.5-5-10 mm.

Aluminium composite

(Dibond, Alucobond, etc.). Composite sheet consisting of a “Sandwich” of two sheets of aluminium and polyethylene printed directly in four-colour process, light, robust, stable, ideal for indoor and outdoor communication.

Methacrylate (Plexiglass)

Transparent, opal, white or coloured for illuminated plaques and signs and interior furnishings.

RECOMMENDED USES

Panels, signage, interior and exterior set-up, exhibitions, trade fairs, promotional material, luminous plaques and signs and furnishings.

Cardboard

It is a cardboard panel consisting of an internal honeycomb core. Ultra light and versatile, it offers surfaces that are well suited to printing and/or scoring. It also represents a “green” choice in the field of advertising, panels and customised displays.

Available thicknesses: 10-16-20 mm

Available colours: white - black - Havana.

Magnetic

It is a versatile material that is highly suited to temporary decorations on vehicles or metal surfaces. Easily shaped, it is also appropriate for the signage or temporary communication function. It can be used both indoors and outdoors and faithfully reproduces the desired print.
