

AGRICOLA CONTE

A COMPANY BORN FROM AN EXPERIENCE IN THE SECTOR, A PHILOSOPHY AND MANY PROJECTS

The reality is found in Veneto in the province of Verona, born in the 90s following an evolution, brought by a passion for the land and mainly following a thirty-year experience of the owner as an agricultural expert specialized in the asparagus sector.

The company is totally certified Global Gap.

The processing of the products is done by computerized calibrating machines that allow to maintain a perfect quality standard avoiding to create problems related to the mixing of different types of asparagus.

Over the years the company has developed and specialized on a single product, L'ASPARAGO. Today, more than 28 years later, the agricultural company Conte has an important production reality with a total area of 50 hectares, becoming one of the largest asparagus production companies in northern Italy.

The owner Claudio Conte, 53, is also the founder and current Director of the Consortium of Valorisation of the Asparagus of Verona founded in 1999 made up of 25 producers and a cooperative of about 50.

Following continuous research over the years, has drastically limited the use of antiparasitic products, the contribution of nutrients has been almost totally replaced by the chemical to

the organic, thus ensuring a healthy product, enhancing its organoleptic and gustatory characteristics, which are fully recognized by consumers.

All the product supplied by the company is totally of its own production and it is not under any circumstances purchased by third parties, in order to have full control over quality.

The reclaimed lands, very fertile and rich in water, are of alluvial origin.

As soon as they are harvested, the asparagus are immediately chilled and, once they arrive at the farm, they are washed with water at a temperature of 0 ° C so that they can maintain the quality and most easily preserved characteristics, then they are processed and selected.

List of products and gauges:

Classification takes into account three different parameters: length, diameter and apex aspect.

For length, asparagus are divided into:

tips: less than 15 cm.

long: 22 cm

Workings and packages can be made for different weight and dimensions, according to customer requests.

The processing mainly consists of:

Bulk for diameter from:

Tips less than 15 cm inside special trays

20 + and 22 + inside 5 kg cardboard boxes with guaranteed weight.

Decks, for diameter from:

<12: with a diameter of less than 12 mm

12-16: with diameter between 12 mm and 16 mm

16-20: with diameter between 16 mm and 22 mm

> 20+: with a diameter exceeding 20 mm.

For the appearance of the apex they are divided into:

white or green: with a tight tip

red and faded: with red tip or with open bracts.

Processing and packaging can be made for different weight and dimensions, according to the customer's requests, both Bianchi and Verdi.

Packaging with classic "handkerchief", 500 gram top-quality decks.

Packaging on cardboard Loose, 5 kg bulk asparagus.

Packaging in classic bunches, from 1 kg.

Following the creation of the company laboratory, we also work the product as transformed into vacuum and pesto asparagus jars.
