EDMUND HYUMIS

EDMUND HYUMIS was born in America. He works as investigative journalist, and has written a number of books inspired by his work.

This book is the ideal guide for writers and readers of crime fiction: it is not a manual of criminology. The term 'crime fiction' is used to include a number of sub-genres, from the detective story to the hard-boiled: as the books proceeds, the differences will become clear and the terminology differentiated according to the specific subject. Potential writers of crime fiction will find in these pages plenty of historical and scientific information on the theory and practice of criminology. This knowledge should give them a practical grasp on investigative work that will enable them to stick to reality and write convincing, true to life crime fiction. Lovers of the genre are getting tired of the mistakes and unrealistic common-places they often find in crime fiction, most conspicuously in films and television serials. In most cases, reality is more than enough: the human mind can be more cruel and reality more tragic than any story a writer of crime fiction could possibly imagine.
