

Lemuria®

Andres PhytoDefender

Compound based on extracts of officinal plants useful for promoting the physiological functioning of the upper respiratory tract and the body's natural defenses and to guarantee a supportive, restorative and antioxidant action. It has been specially designed and formulated on the basis of scientific evidence and traditional uses of plants. In fact, echinacea root and uncaria bark favor the body's natural defenses, while rosehip fruits, rich in vitamin C, favors a supporting and restorative action. Black currant leaves promote the well-being of the nose and throat while boswellia has an anti-inflammatory effect, without forgetting that echinacea is also useful for the functioning of the upper respiratory tract.
