

Lemuria®

Mucilem

A powerful natural help for functionality of digestive system and intestinal transit

MUCILEM by Lemuria is a natural food supplement based on plant extracts useful for restoring the physiological functionality of the digestive system and improving intestinal transit.

Its composition, particularly rich in Mallow and Altea mucilage, makes it extremely effective against irritative and mechanical damage of the gastric and intestinal mucosa membranes, preventing or attenuating local inflammatory processes.

The entire intestinal mucosa, from the duodenum to the rectum, produces secretions that contain mucus, electrolytes and water. The mucus component of the secretions serves to protect the mucosa from irritation and inflammatory damage.

The mucilages are in turn natural organic substances with a high molecular weight and as such endowed with the characteristic of forming a viscous liquid (gel) with water that is able to cover the mucous walls of the organism, assisting the physiological resolution of any irritative phenomenon.

The combination with the aqueous macerates of Nettle, Licorice and Mint then helps the product to protect against mechanical damage, forming a film that avoids direct contact of the mucosa with aggressive external agents and which at the same time helps the regeneration of any damaged tissue.

Finally, the presence of the gemstone derivatives of Blackcurrant and Ficus Carica provides the product with the anti-inflammatory and pain-relieving properties necessary to complete the physiological re-establishment of digestive and intestinal function.

MUCILEM of Lemuria is therefore helpful in cases of:

Gastroesophageal reflux

Gastric hyperacidity

Protection of the gastric mucosa from the use of NSAIDs and external agents

Irritative phenomena affecting the gastric and / or intestinal mucous membranes

Ingredients:

Water, Mallow mucilage (*Malva sylvestris* L.) deriving from dried leaves 30%, Altea mucilage (*Althea officinalis* L.) deriving from dried roots 30%, Aqueous macerated nettle (*Urtica dioica* L.) deriving from dried roots 10%, Macerated licorice aqueous (*Glycyrrhiza glabra* L.) deriving from dried roots 10%, Mint macerated aqueous (Peppermint L.) deriving from dried leaves 5% Ficus (*Ficus carica* L.) deriving from buds 5%, Ribes (*Ribes nigrum* L.) deriving from buds 5%, fructose 5%. Acidifier: citric acid. Preservative: potassium sorbate.

Directions:

For proper product optimization, it is recommended to take 10 ml (see measuring cup) divided over the day (two / three intakes). In children, it is recommended to take 5 ml throughout the day.

Packaging:

200 ml bottle with dispenser.
