

# SEWAGE TREATMENT LINE

## BIOLOGICAL BIOSTARTERS FOR TREATMENT AND MAINTENANCE OF SEPTIC TANKS, SEWAGE SYSTEMS AND DUCTS

### DESCRIPTION

Several formulations in liquid and powder form designed to keep free of clogs and encrustations all kind of sewage systems, syphons, septic tanks or grease traps. They neutralize bad smells created from organic matter deposited over surfaces. Microorganisms contained in our **sewage treatment line** provide broad spectrum of action, quick acclimatization, safety, compatibility, maximum effectiveness and speed of action in all kinds of sewage.

### A few examples of formulations for sewage treatment in several forms

 <b>MasterFosDeo</b> LIQUID PRODUCT	<p>It combines the properties of a biological additive with those of an odour neutralizer. The immediate action of the odour neutralizer controls the bad smells and the long-term action of the good microorganisms destroys the substances that cause them. Particularly effective for the treatment of: <b>toilets, syphons, chemical WC, urinals</b>, manholes, drainage pipes, sewerage systems, sanitary ware.</p>
 <b>FOS<sup>®</sup> degreaser</b> LIQUID PRODUCT	<p>Biological additive for the degradation of fats and organic substances deposited in <b>kitchen drains, grease traps of restaurants and food/meals preparation</b>. It combines the immediate action of the odours neutralizer with the long-term action of the microorganisms to guarantee an effective treatment over time. It reduces the expensive interventions for maintenance and cleaning of tanks and extends the time between the emptying of grease traps. It keeps insects and pests away and it fights the growth of pathogenic bacteria.</p>
 <b>MasterSeptic</b> SOLID PRODUCT: Powder, Capsules, Tablets, Water-soluble pouches	<p>Solid Biological additive for the treatment of <b>sewages, septic and Imhoff tanks</b>. Completely degrades oils, animal and vegetable fats, blood and detergents, has a synergic effect on the majority of waste water, is able to keep pipes and sewage system free from clogs and avoids the formation of bad smelling incrustations in all kind of septic tanks, grease traps, dry wells, soak pits, while improving its functioning. Effective product for shock treatment in case of clogs and encrustations.</p>
 <b>MasterSink</b> SOLID PRODUCT: Slow dissolution soap sticks	<p>Practical biologic formulation made of solid, natural, vegetal soap bar, with slow dissolution, particularly indicated for the long-term treatment of <b>syphons, sinks and shower sewages</b>. It degrades organic remains and grease deposits on internal surfaces of sewages and syphons.</p>
