## GRAB RAIL & LIGHTING SYSTEM

Minimalism and aesthetic elegance characterize the futuristic soul of this project, expressing itself in a unique piece of furniture accessory of its kind; perfect integration of functions and advantages, guarantee of a safety, even ornamental, at the total service to the person.

Designed to illuminate the entire surrounding environment, the grab rail is able to serve home automation systems and adopt capacitive technologies and to satisfy specific requirements, thanks to its ability to create both ambient and directional lighting at the same time, but always avoiding glare.

The totally integrated lighting through this project transforms the bathroom grab rails, conceived up to now with a single limited function and therefore perceived as an element of diversity, into a source of new sensory experience for all people, enhancing balance and harmony between the body, mind and environment, thus favoring a new level of comfort and tranquility, through a new visual function of personal help with total LED energy saving.

Diversity

**FACILITATING THE UNIVERSAL BATHROOMS DESIGN**

Sustainability

**FOCUSING ON PMMA CIRCULAR ECONOMY & LED ENERGY SAVING**

Timelessness

**INNOVATING IN APPLIED PHYSICS**

Adaptability

**CUSTOMIZING SIZE AND FUNCTIONS**

**PATENT PROTECTED**
