STUDIO AZZARO NICOLA & NICOLAZZARO SRLS

Founded in 2019 by the designer and inventor Nicola Azzaro, the innovative startup Nicolazzaro Srls specializes, in collaboration with Studio Azzaro Nicola, in the design and in the patenting of furnishing, lighting and fashion accessories, developing a unique and innovative design that also enhances the optical properties of polymethylmethacrylate (PMMA) for a heightened sense of utmost refinement, exploiting LED technology and safeguarding the purity of polymethylmethacrylate, combining the recovery of materials with design and science.

LIGHTING

Impressive energy savings are the basis of LED light creations by NICOLAZZARO ITALIAN DESIGN, conceived for prestigious environments with an unmistakable philosophical style.

Essential design and daring technology.
CLEPSY DESIGN
reinterprets time in a futuristic key.
Slender, sinuous lines draw attention to its
lighting capabilities.

The wireless CLEPSY DESIGN 1,5 size version is suitable for applying the light source both at the bottom and at the top, creating two different types of lighting.

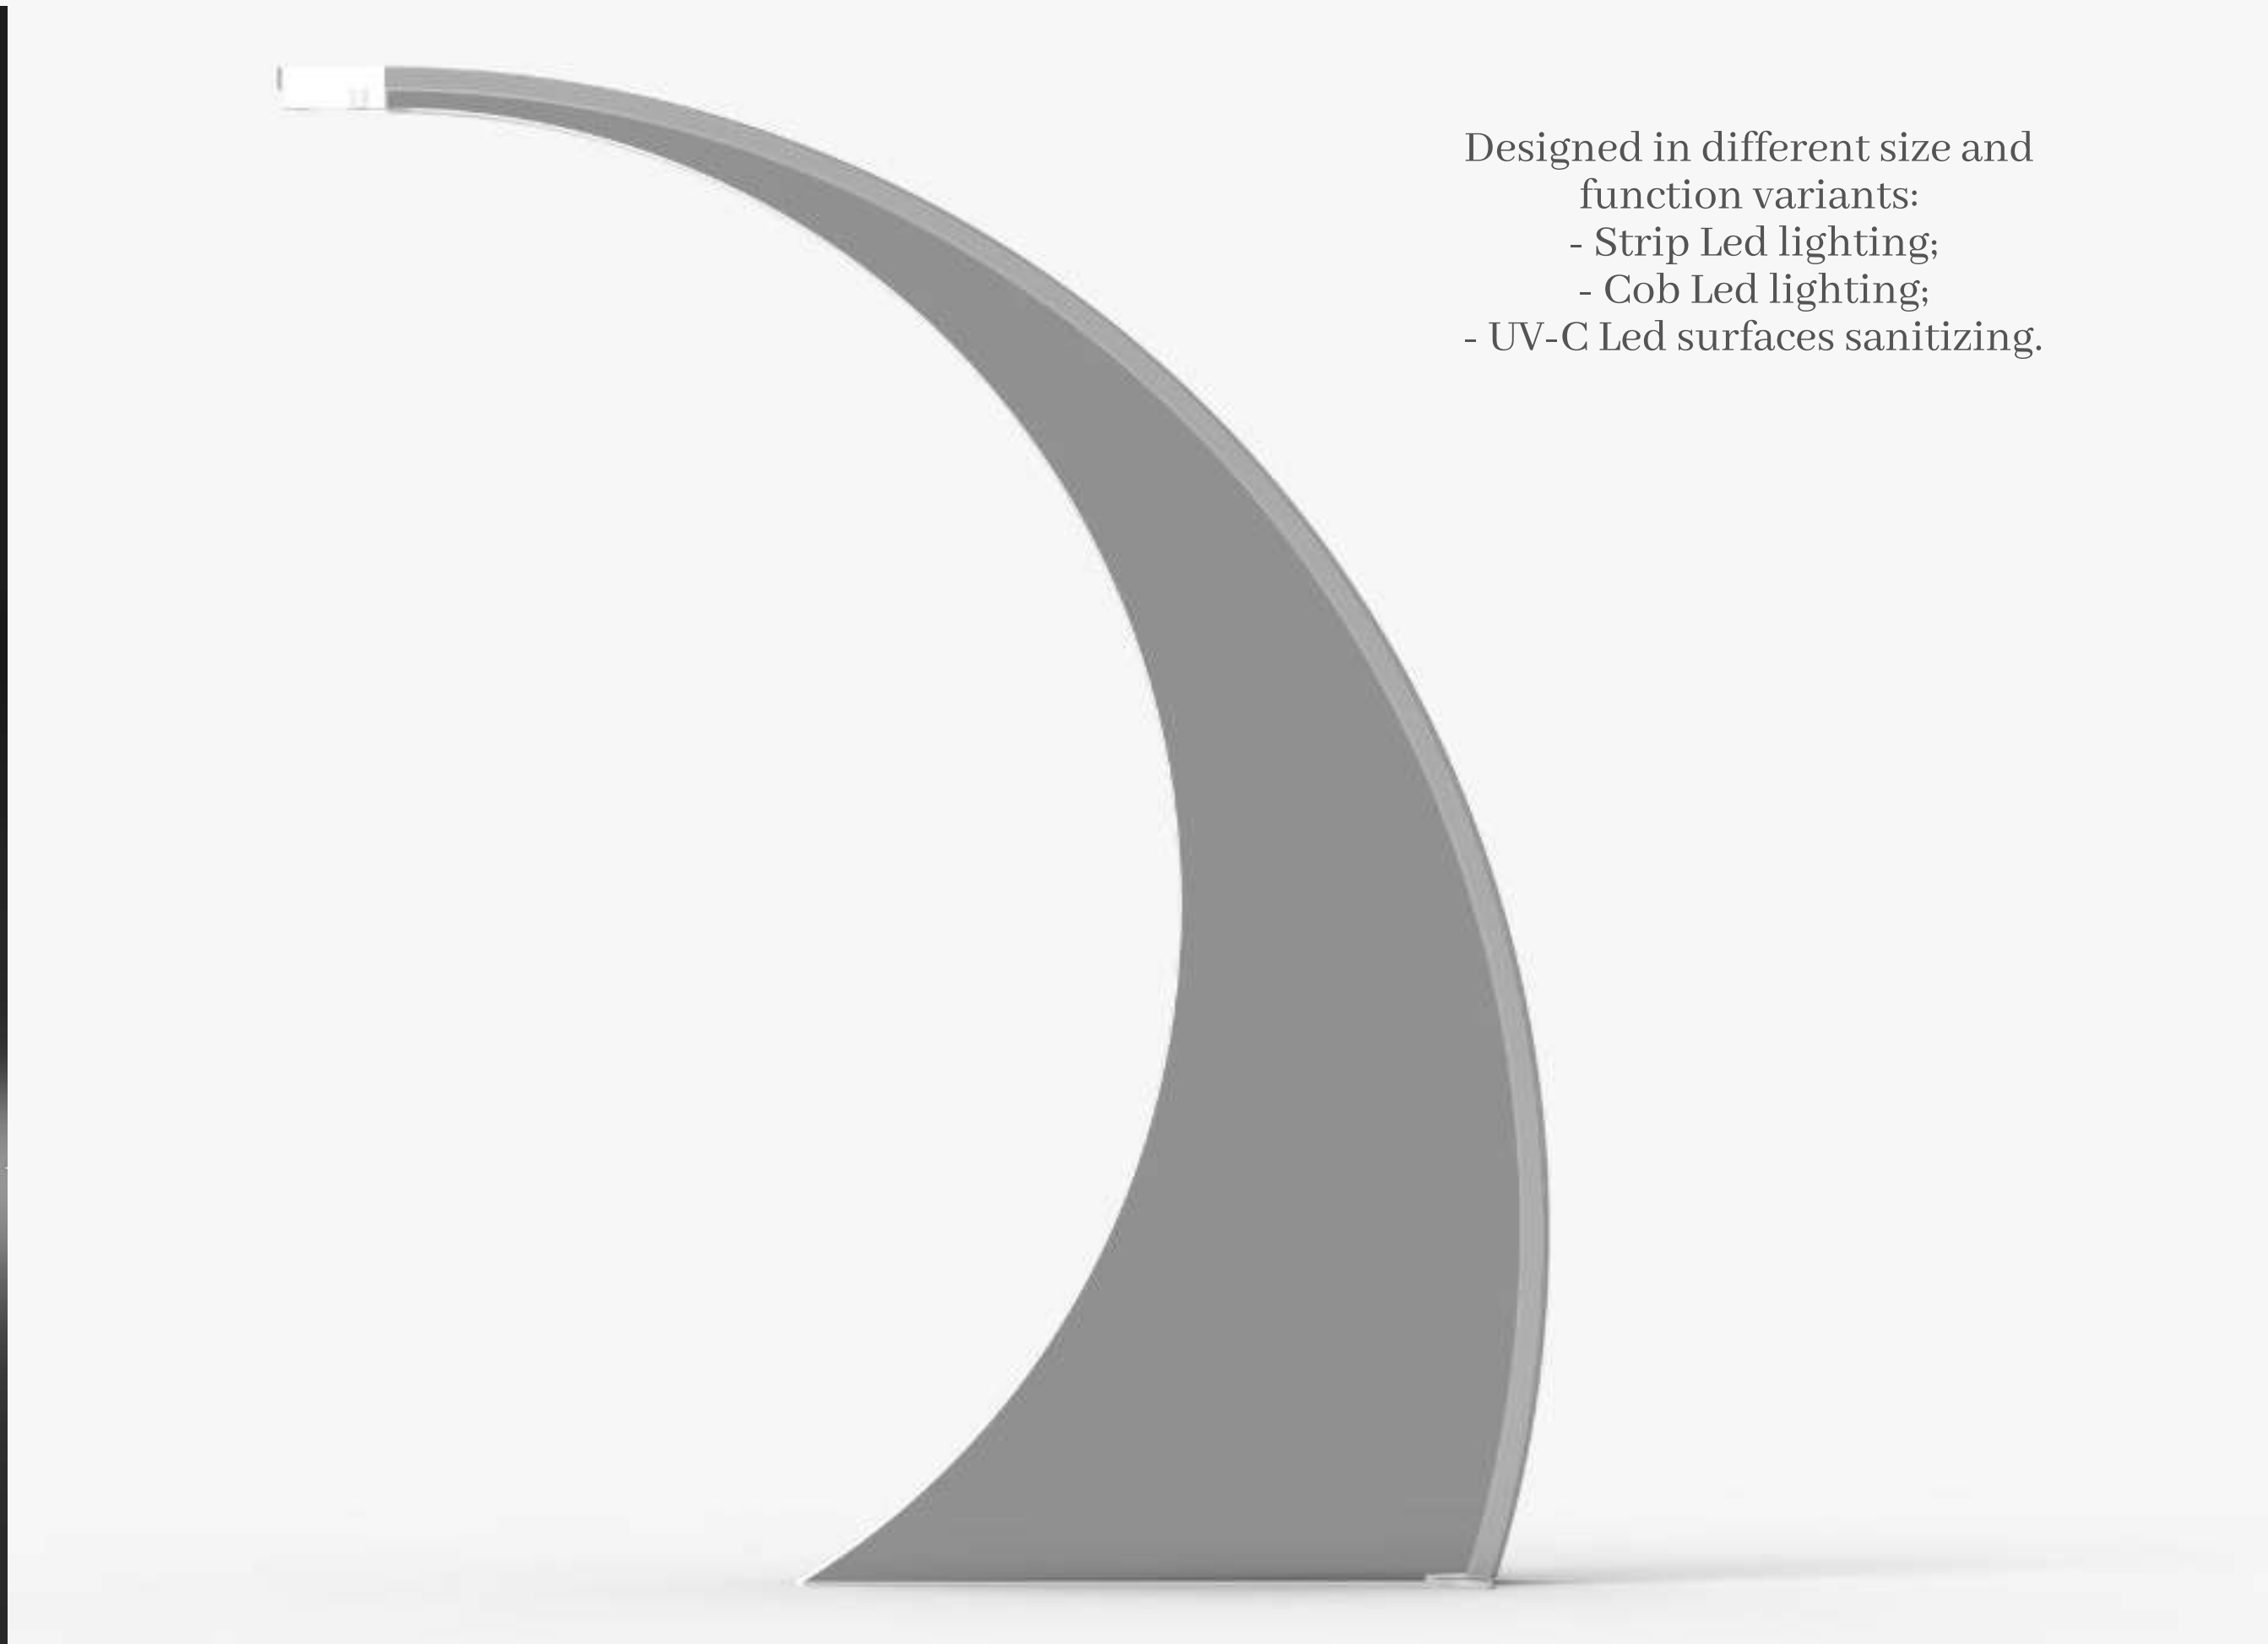

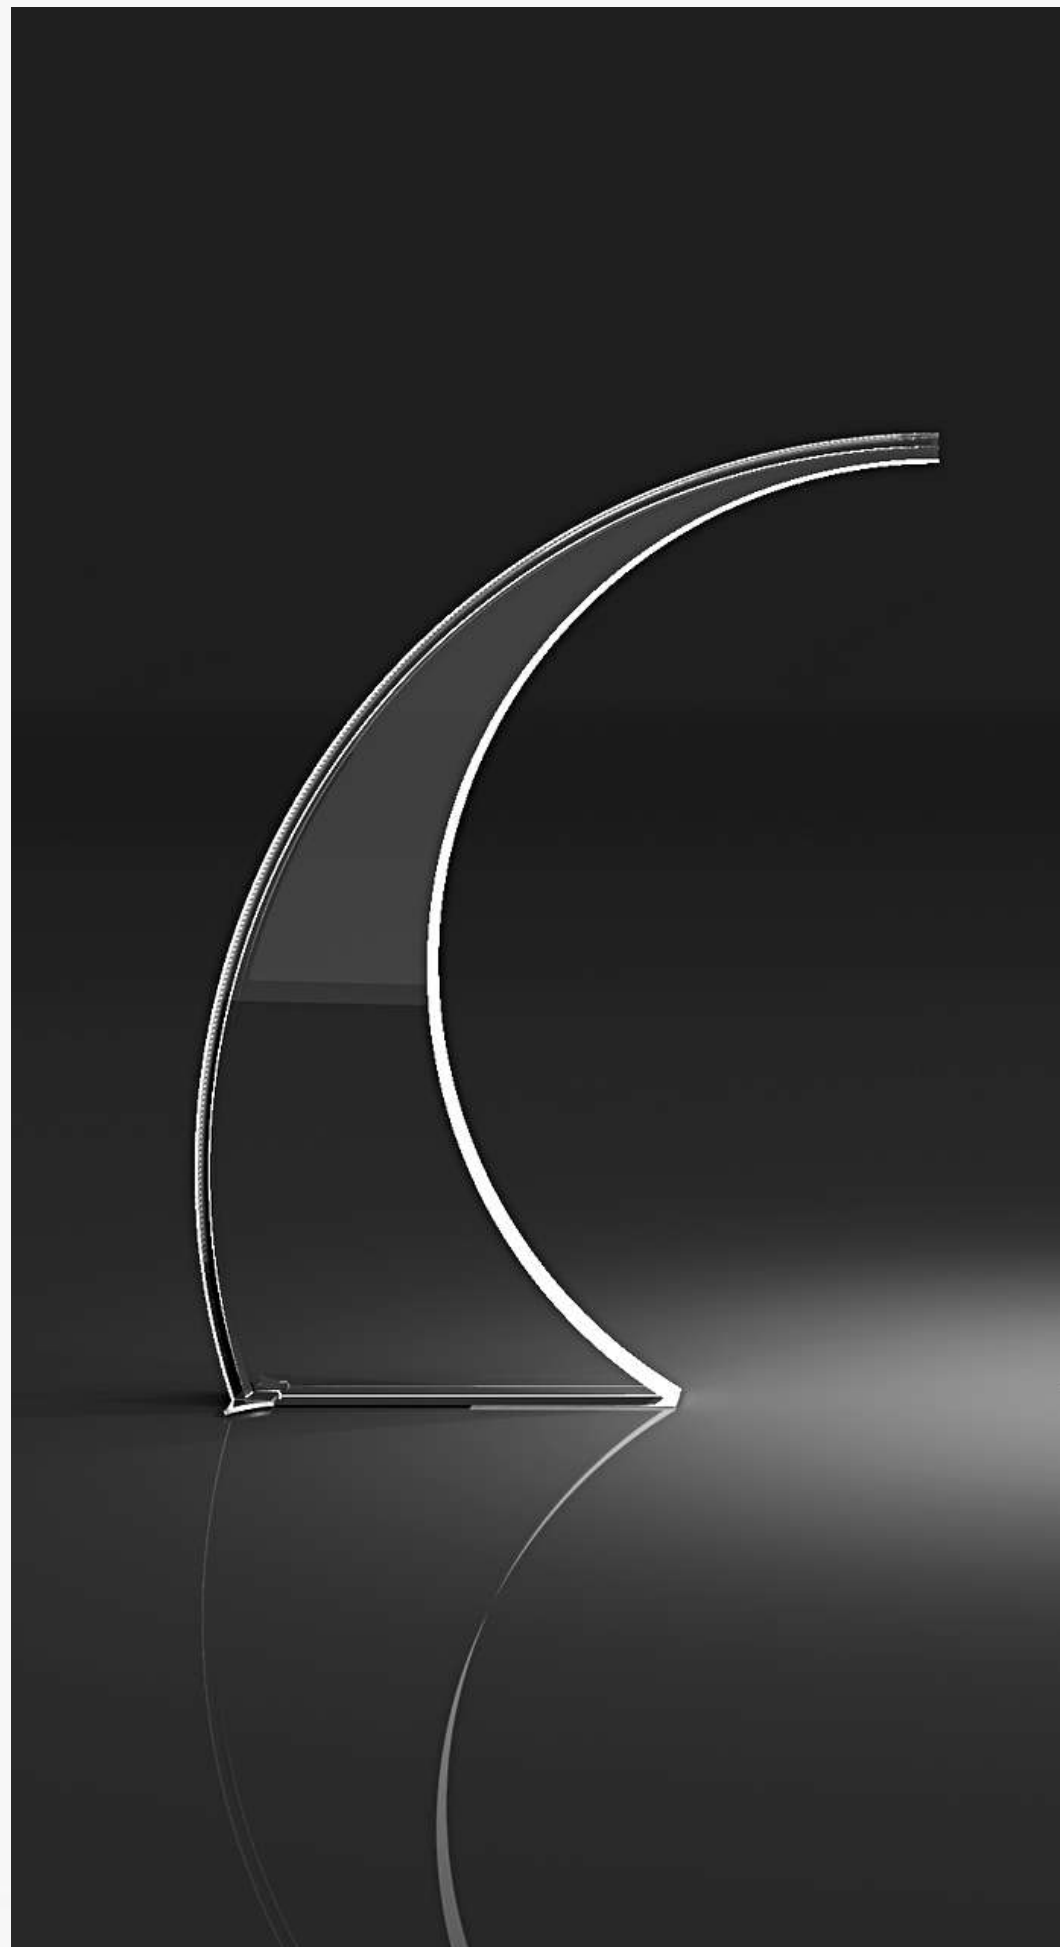

With classic design and cutting-edge technology,
SOUL LIGHT
encompasses a full/empty illusion, providing a
remarkable light refraction capacity for the
material adopted.
Material depth in a soft line.

A magical reminder, both in name and form, of evocatively
expressive moonlight, through the functional physical properties
of transparent polymethylmethacrylate;
SIMOON
enhances a perfect interpretation of technology, creating
complete directional and ambient lighting.

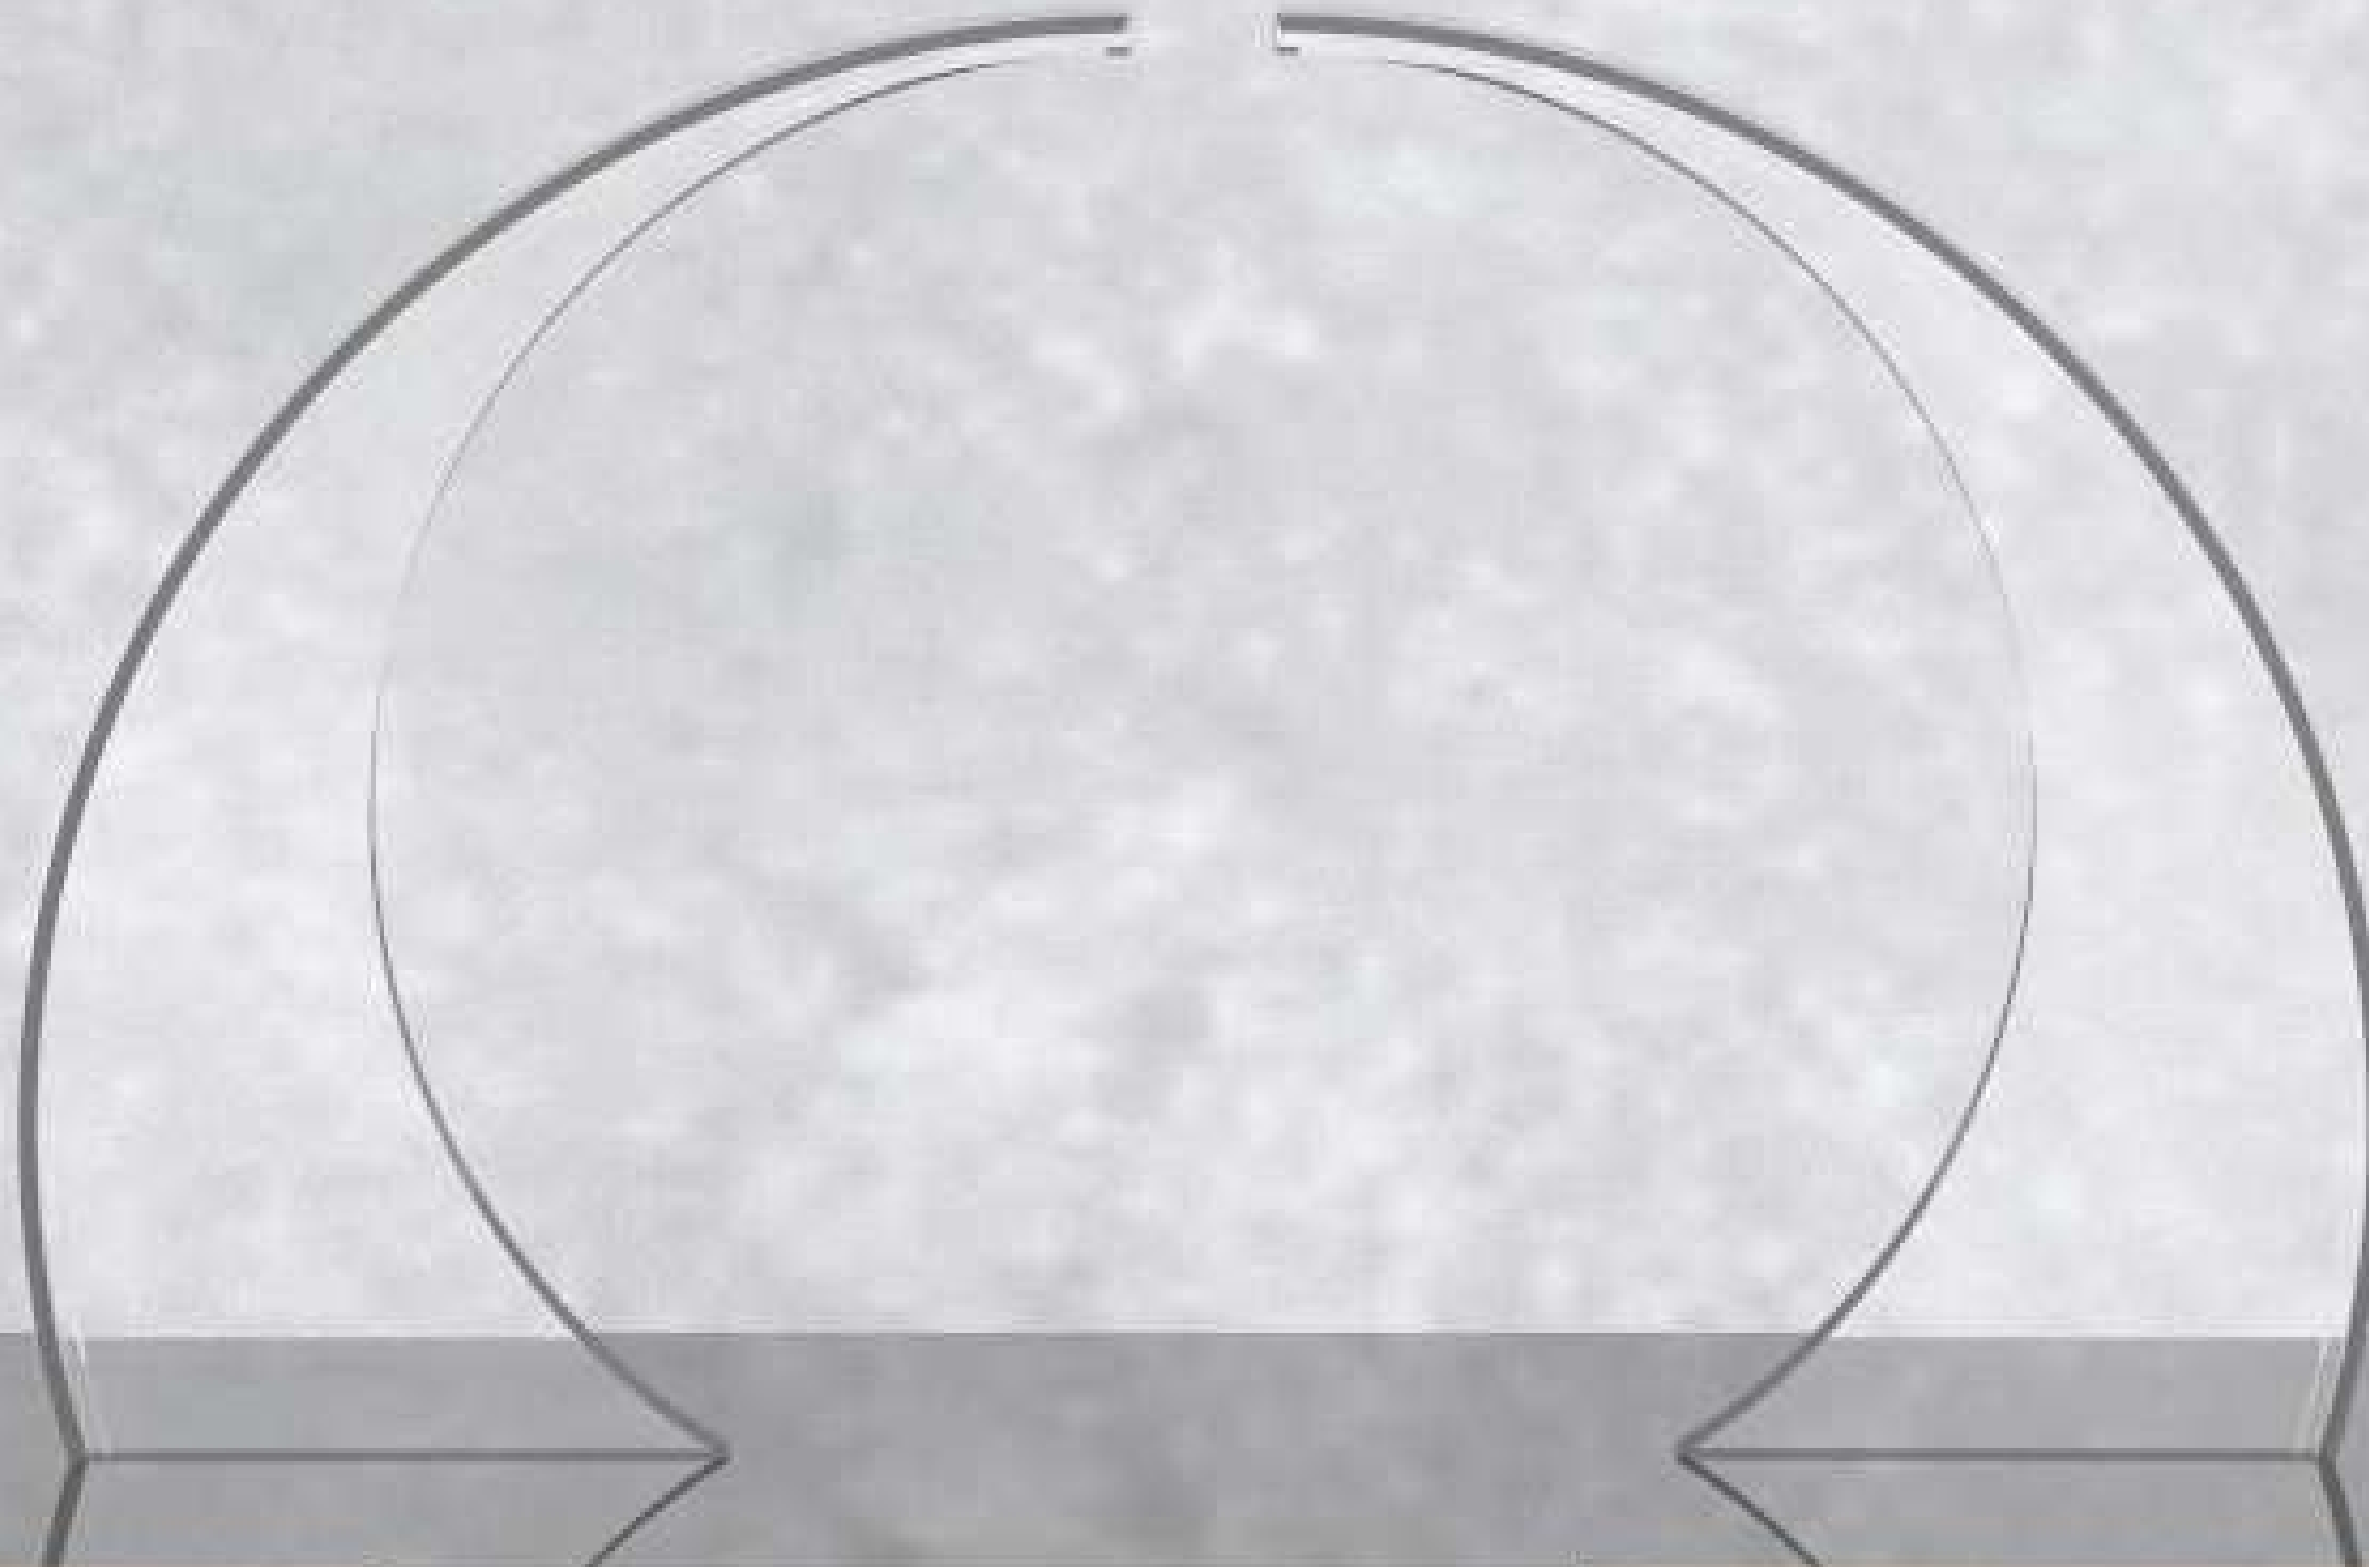

Designed in different size and
function variants:
- Strip Led lighting;
- Cob Led lighting;
- UV-C Led surfaces sanitizing.

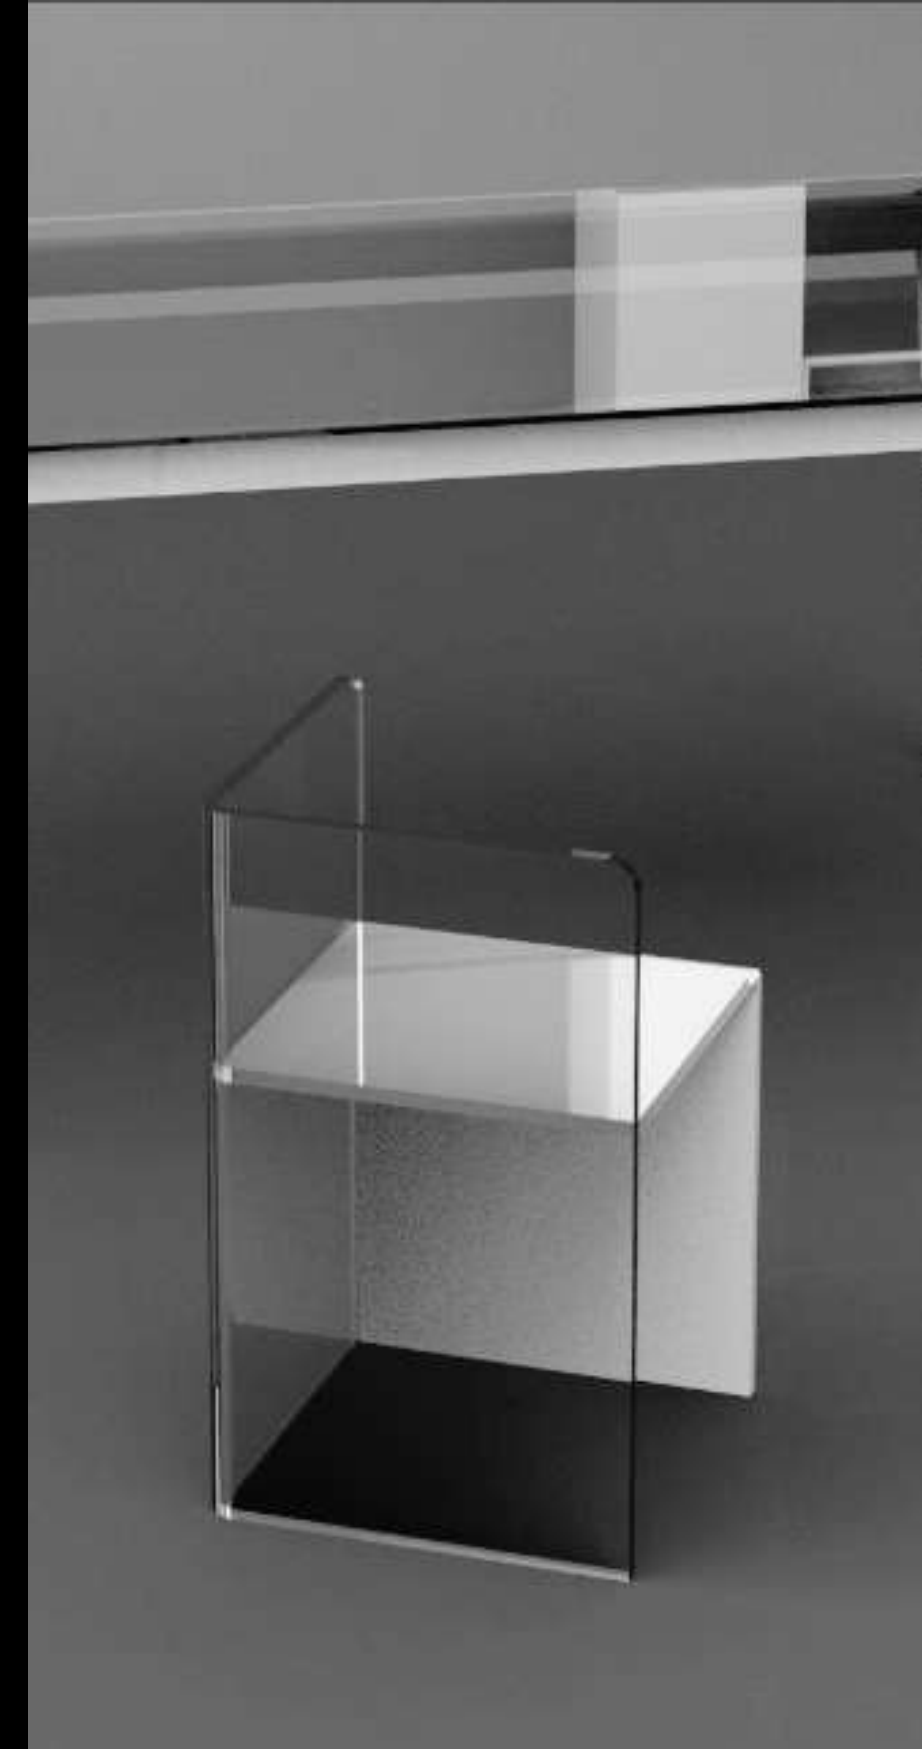

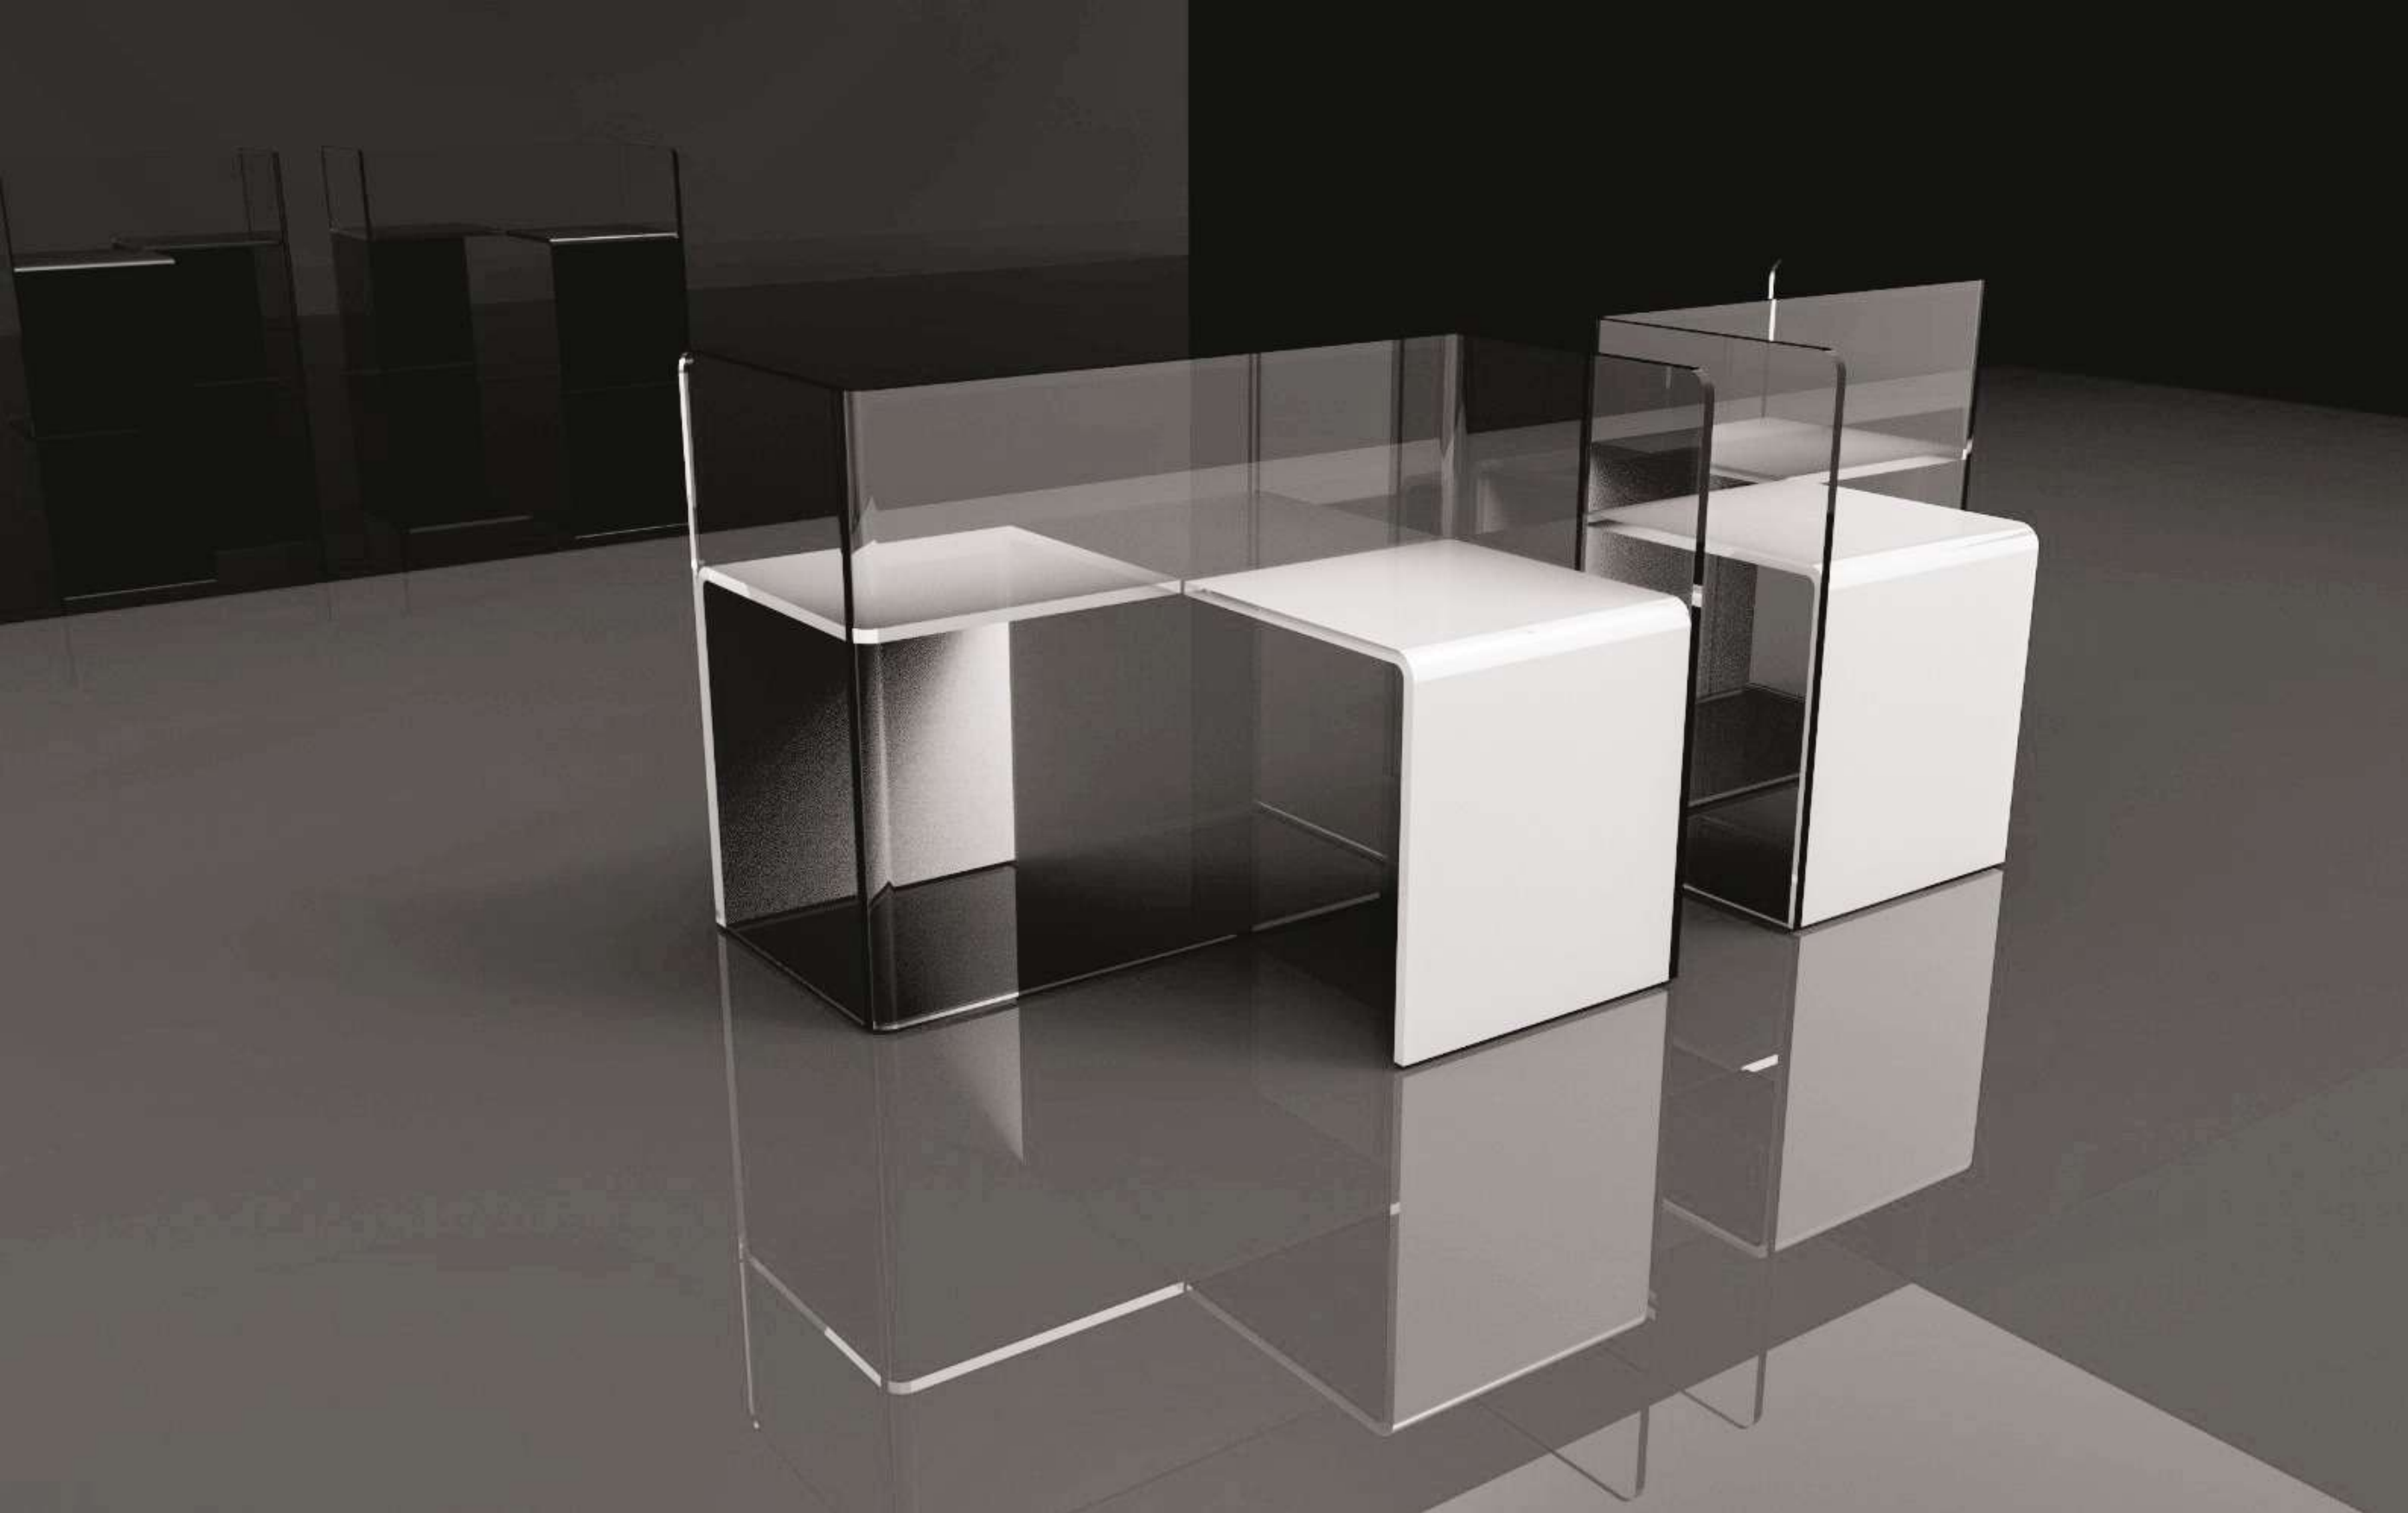

Nicola Azzaro's creations are also available as furnishing
sculptures without light sources.

FURNITURE

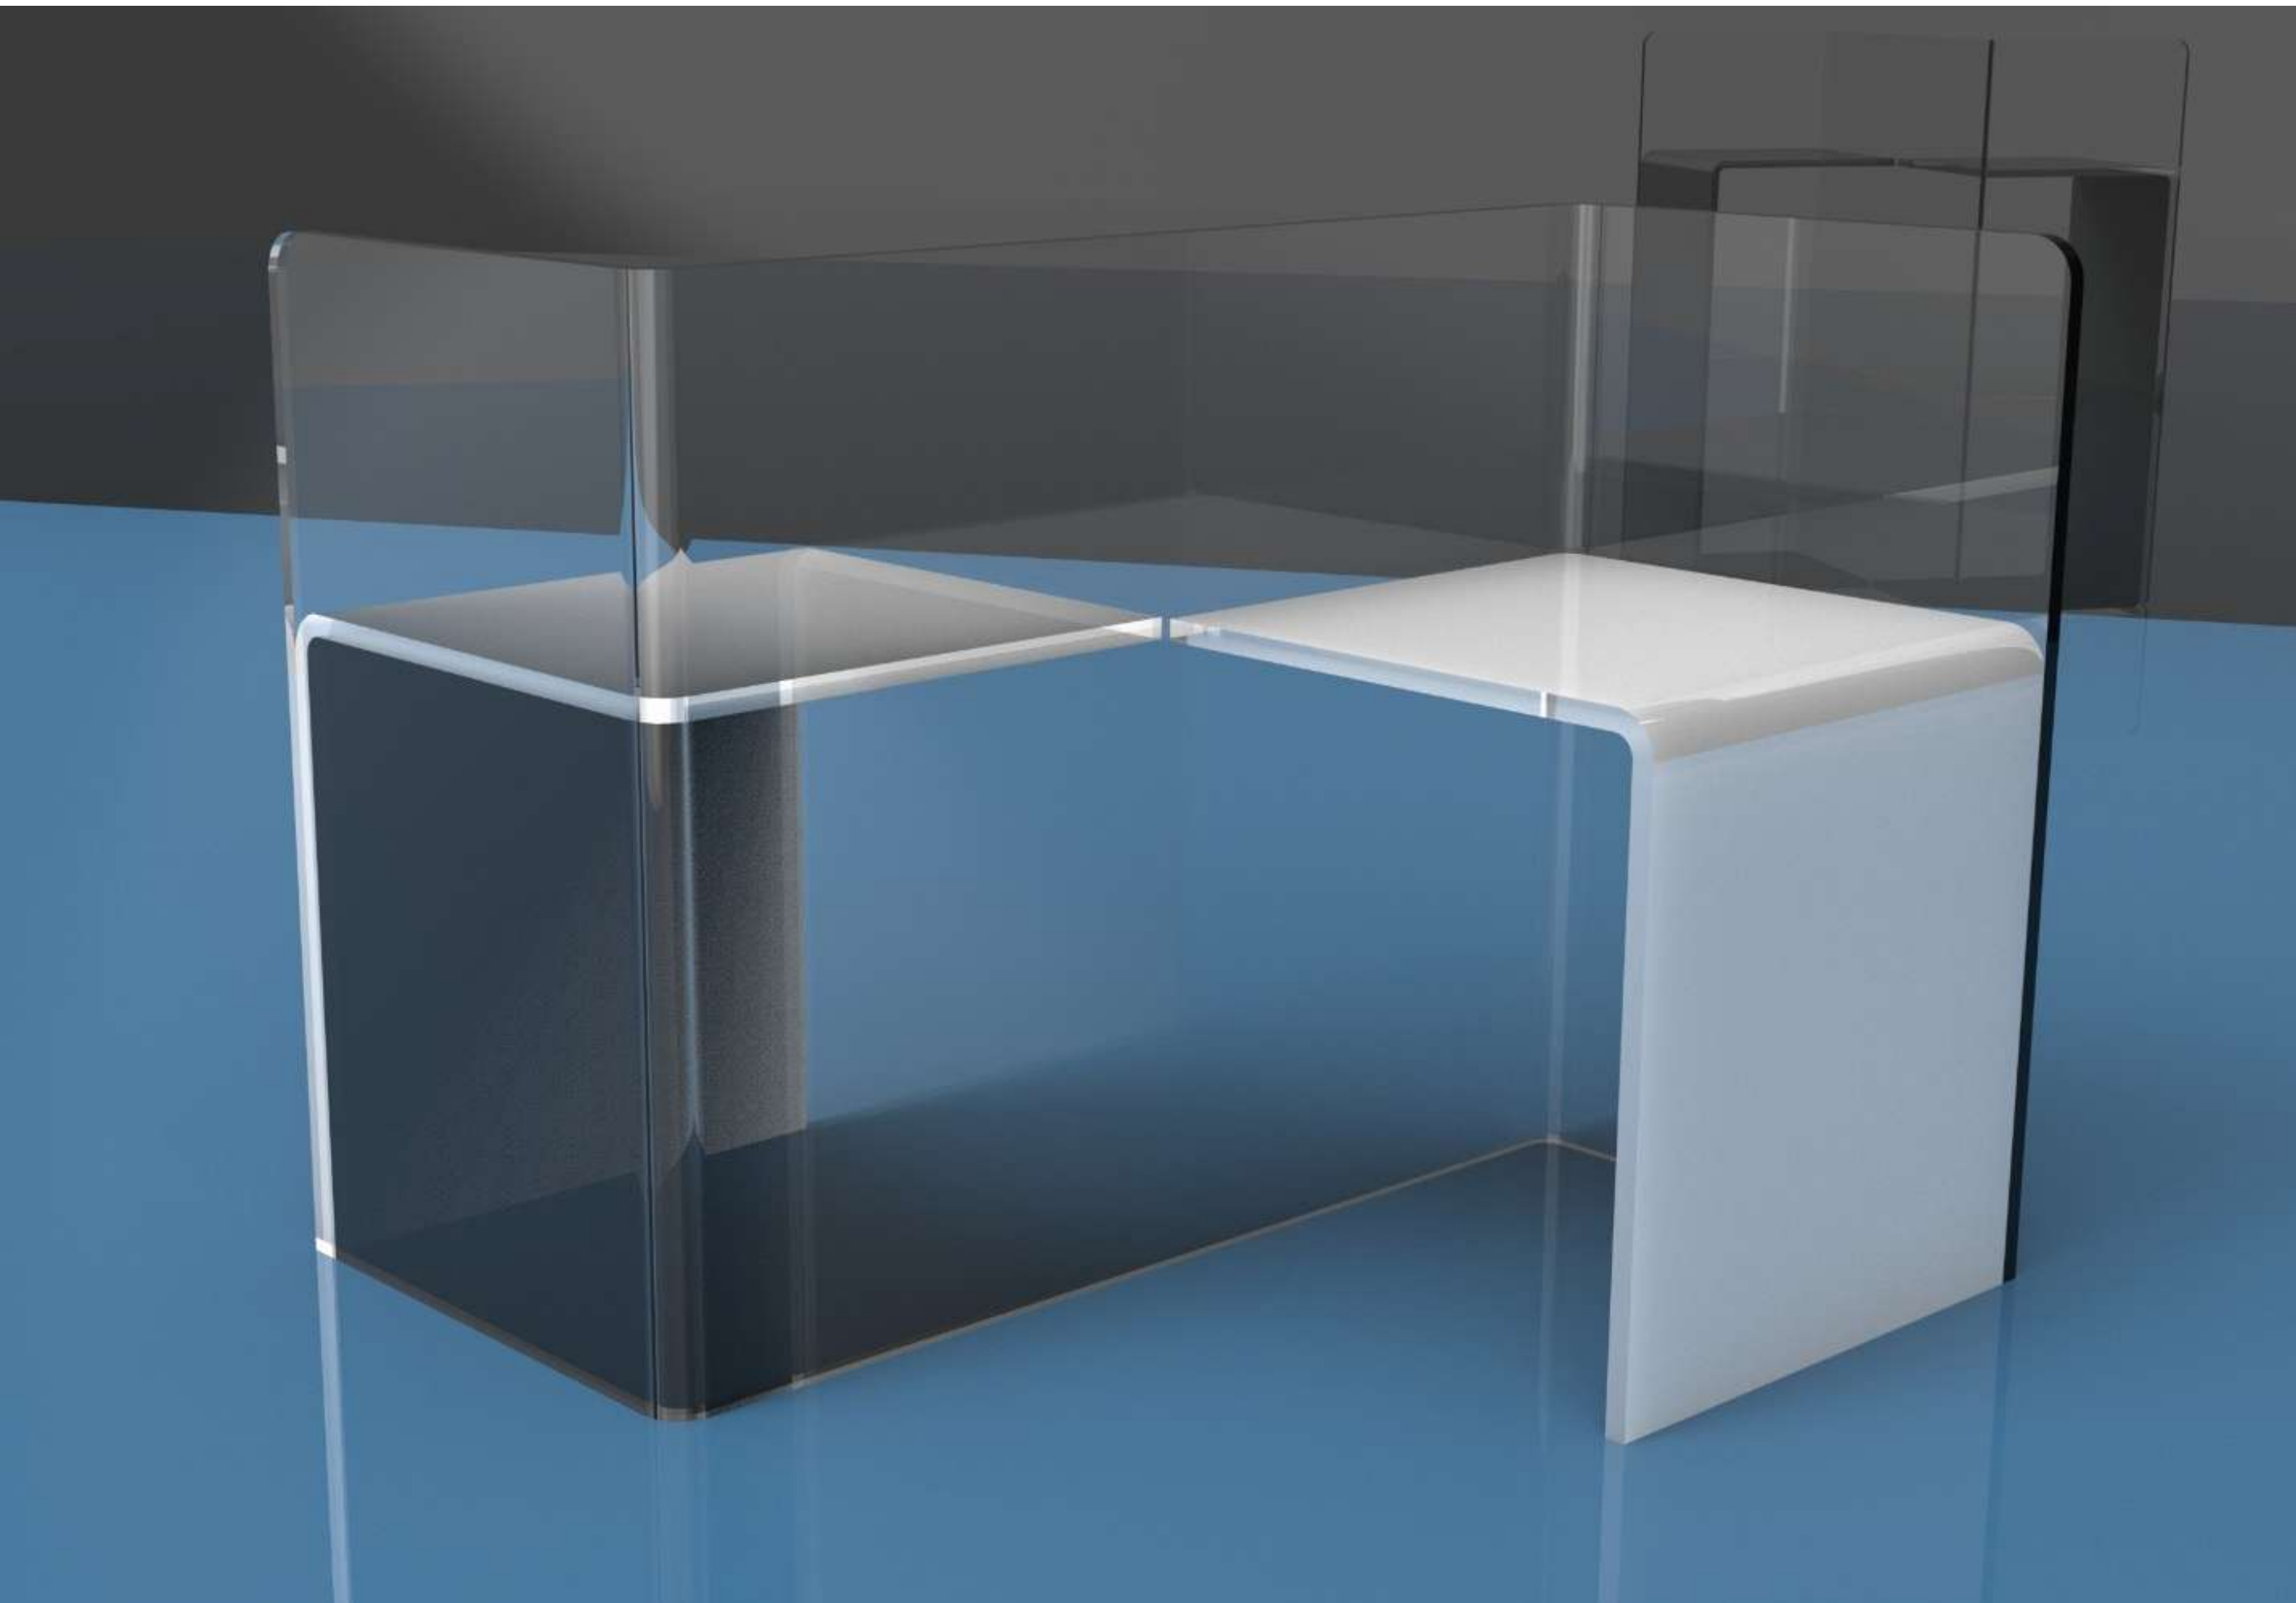

Eco-sustainability and 100% recyclability are the basic guidelines of all furnishing projects by NICOLAZZARO ITALIAN DESIGN, in which exclusive proposals are combined with an elegant vintage flavour.

TO ME chair,
a model made entirely of polymethylmethacrylate,
combines definition, essential geometry and innovative design, introducing contemporary construction technology
that breaks away from tradition.

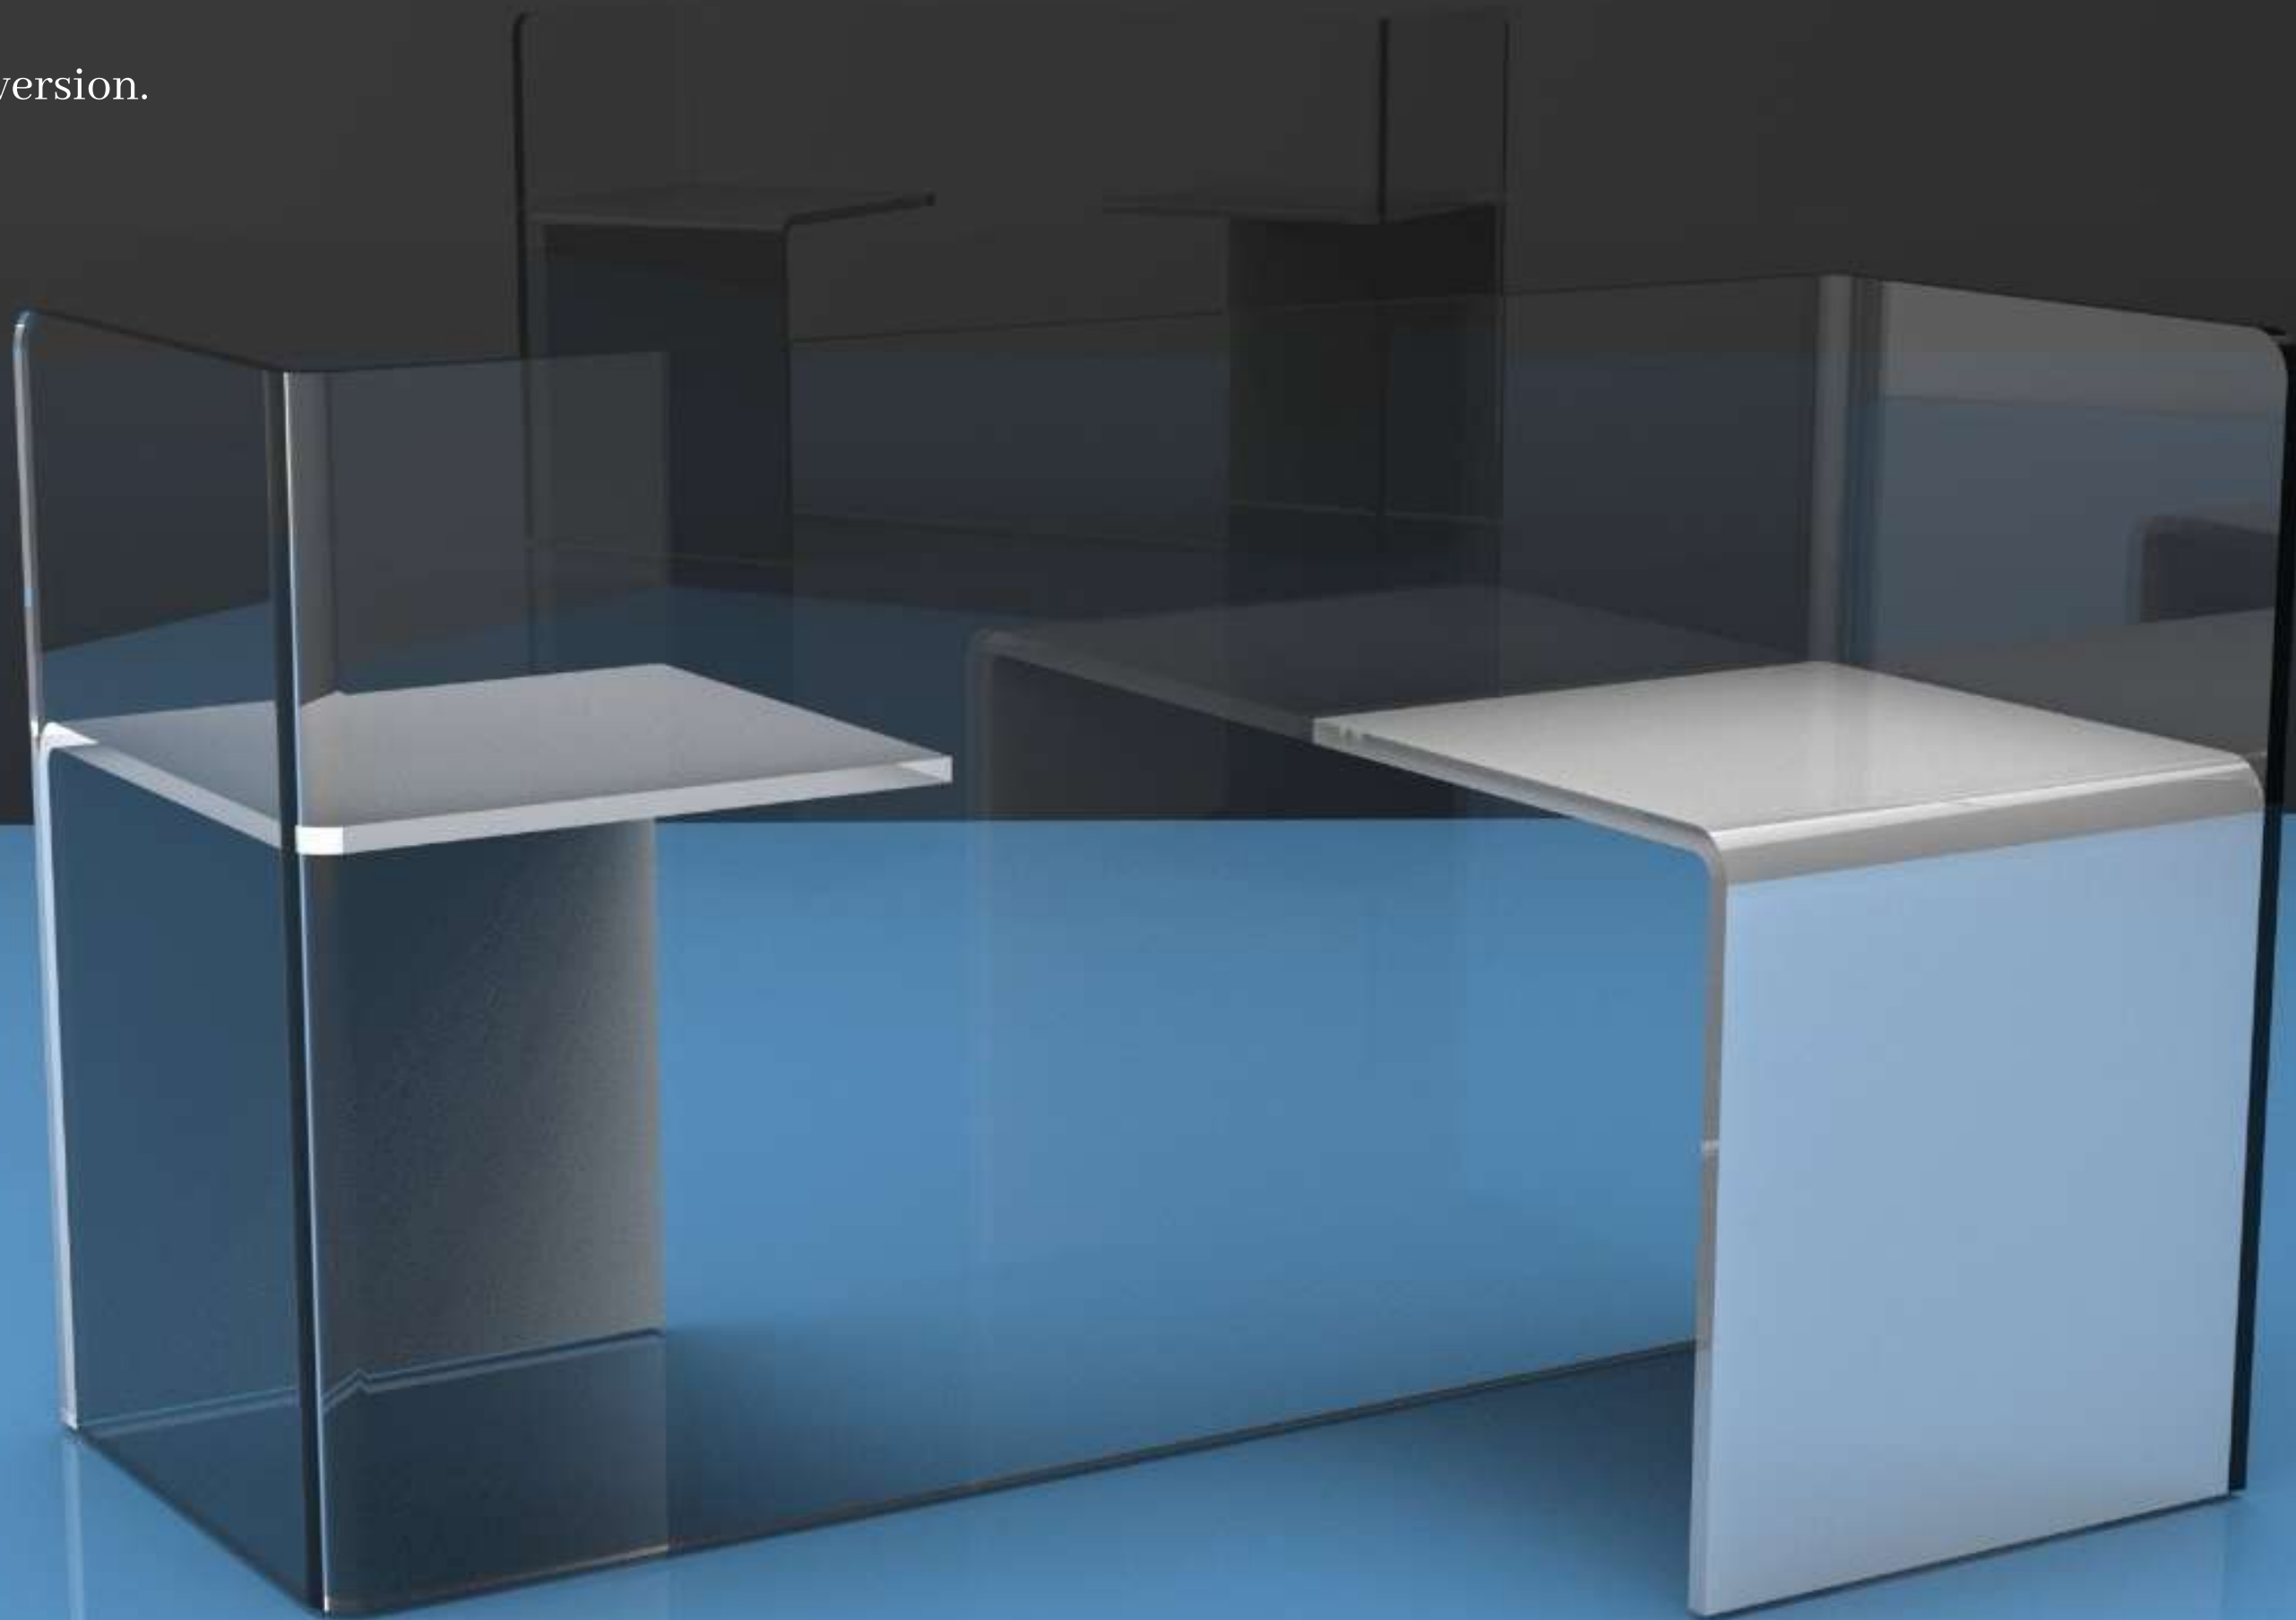

The exemplary and inimitable evolution of the TO ME chair is expressed in the eclectic design of the TO ME TOO vis-a-vis bench, an absolute protagonist of refined personality, but at the same time sober and essential.

Elongated bench version.
