**USE CASES**

**CUSTOMER HISTORY**

# USE CASES

## ■ USE CASE: MAINTENANCE

**BRAIND** modules (3D Manual and MR Checklist) allow you to digitize through augmented reality the processes of assembly, maintenance and monitoring, with the ability to display data in real time and get remote support from an operator in augmented reality.

### KEY BENEFITS:

- Reduction of production line downtime
- Increased reliability
- More adherence to procedures
- Increased safety

### MAINTENANCE

**3D MANUAL**

**MR  
CHECKLIST**

### Demo:

[https://youtu.be/\\_HHjQjiOJGU](https://youtu.be/_HHjQjiOJGU)

## ■ USE CASE: PLANNING & SAFETY

**BRAIND** modules (Layout and 3D Model Viewer) allow to use augmented reality to support the set-up and layout operations of line stations, ensuring compliance with the rules of ergonomics, safety and physical space occupied by the various components.

### KEY BENEFITS:

- Increased workspace safety
- Reducing the risk of errors
- Cost reduction
- Reducing the risk associated with all-digital design

### PLANNING & PROTOTYPING

LAYOUT

## ■ USE CASE: TRAINING

**BRAIND** modules (Training and Skills) can be used to training the workforce in order to learn how to use actual/new machinery and digital tools. The Mixed Reality simulation allows individual virtual training and self assessment.

### KEY BENEFITS:

- Reduction in travel costs
- Accidents prevention
- Increased tracking of employee learning activities
- Increased workspace safety
- Increased learning engagement

### TRAINING & SALES

TRAINING

CATALOGUE

**Demo:**

## ■ USE CASE: AUDIT & QUALITY ASSURANCE

**BRAIND** modules (3D Manual, MR Checklist and Remote Assistance) can support and improve audits and quality control tasks remotely, integrating the ability to show checklists, display and collect data in real time, with an expert who at all times can verify that all requirements are met.

### KEY BENEFITS:

- Reduction in travel costs
- More adherence to procedures
- Quality improvement
- Paper cost reduction

### Demo:

[https://youtu.be/s2feG8E\\_cRo](https://youtu.be/s2feG8E_cRo)  
[https://youtu.be/\\_HHjQjiOJGU](https://youtu.be/_HHjQjiOJGU)

### MAINTENANCE

**3D MANUAL**

**MR  
CHECKLIST**

**REMOTE  
ASSISTANCE**

# CUSTOMER HISTORY

## MAINTENANCE ASSISTANCE

**CUSTOMER: IVECO (FCA Group)**

### CHALLENGE:

**Supporting operators during maintenance**, to ensure that operations are carried out in the correct order and in the established manner.

### SOLUTION:

**Augmented reality application that guides the operator step by step in maintenance**, with the indication of safety devices, possibility of accessing manuals and videos, and the possibility of indicating malfunctions or problems that are immediately reported to the head of the shift.

FIAT CHRYSLER AUTOMOBILES

### Demo:

[https://youtu.be/s2feG8E\\_cRo](https://youtu.be/s2feG8E_cRo)

## ■ ADVANCED REMOTE SUPPORT

### CUSTOMER: HUDIPHARMA

### CHALLENGE:

Ensuring business continuity and **providing efficient Remote Assistance** to its clients, especially **during the COVID-19 pandemic**, when traveling costs and times spiked, by allowing a remote expert to be “phygitaly” present near the machine and the local operator.

### SOLUTION:

By using BraIND 4.0 3D Remote Support the client was able to achieve full remote assistance which cut travel cost times and improved its clients satisfaction.

### Demo:

<https://go2.is/3dremotesupport>

# Hudi PharmaX

Passion to perform

## ■ 3D TRUCK VISUALIZER

**CUSTOMER: IVECO**

### **CHALLENGE:**

**the cost of producing a single prototype of a truck door exceeds \$60K.** You want to be able to evaluate different solutions and try them on the existing truck cabin.

### **SOLUTION:**

**visualization of the hologram exported by CATIA,** in real scale, superimposable to the physical model of the truck, with the possibility to manipulate it and change color, and view the entire cabin 3D model.

### **Demo:**

[https://youtu.be/OhZr6mok\\_yA](https://youtu.be/OhZr6mok_yA)  
<https://youtu.be/upAc9UP1WZk>

## CAR COCKPIT VISUALIZER

**CUSTOMER: LAMBORGHINI**

### CHALLENGE:

visualize and simulate new cockpit concepts for future cars, without the need to produce them physical prototypes but only virtual ones that can be tested by operators on the car.

### SOLUTION:

display of new animated cockpits as holograms for a human operator within an existing car and simulation of new functionalities and features

*Lamborghini*

## ■ 3D CAR CONFIGURATOR

**CUSTOMER: FERRARI**

**CHALLENGE:**

the design team of the new car concept would like to see the model in full scale and be able to see different configurations, study its reflections, and understand its proportions

**SOLUTION:**

shared experience for up to 6 people which see the car at the same time in full scale and can make changes on the different external and internal configurations

**Ferrari**

## ■ WORKPLACE DESIGN & SAFETY RISKS ANALISYS

**CUSTOMER: IVECO**

**CHALLENGE:**

**support the design team of a new part of the production line** in configuring the spaces to ensure ergonomics and the safety of workers.

**SOLUTION:**

**possibility of positioning the hologram of machineries to evaluate the overall dimensions** and of a "standard worker" to visualize the parameters/areas of ergonomics and safety

**Demo:**

[https://youtu.be/s2feG8E\\_cRo](https://youtu.be/s2feG8E_cRo)

## REALTIME DATA VISUALIZATION

**CUSTOMER:** HTC (HIGH TECHNOLOGY CABLES & CONNECTORS)

### CHALLENGE:

offer the operator the possibility to receive real-time data from smart cables via IoT solution

### SOLUTION:

display and interaction with real-time data of smart cables (collected from IoT devices/sensor of cables) through augmented reality headset and IoT platform

### Demo:

[https://youtu.be/\\_HHjQjiOJGU](https://youtu.be/_HHjQjiOJGU)

## ■ TOOLS INVENTORY

**CUSTOMER: IVECO**

### **CHALLENGE:**

**audit operation tools**, the work shift cannot begin if all the tools are not present, only the shift leader can proceed with the replacement of missing tools.

### **SOLUTION:**

**IoT system with IP cameras using Machine Learning** for the identification of the instruments and automatic detection of those missing, with a cascading alert system.

## ■ PREDICTIVE MAINTENANCE

**CUSTOMER: IVECO**

### **CHALLENGE:**

evaluate the accumulation of dust in the welding bench and optimize cleaning operations.

### **SOLUTION:**

creation of a dedicated sensor for data sampling and integration with a system for data collection and processing with ML approach to estimate the best time for performing maintenance and cleaning operations.
