

### **ANTI-AGE SERUM WITH VERY PURE SNAIL SLIME**

Serum with a light and silky texture thanks to the presence of pure snail mucin in high concentration. It offers an intensive moisturizing, revitalizing, restructuring and anti-aging treatment for face and neck skin. The serum formulation allows deeper hydration and can be used both alone and before applying the face cream. The snail slime used is produced exclusively by Italian snails, bred with natural methods, non-invasive and that do not harm biologically the animal. It naturally contains a high amount of functional active ingredients, such as collagen, elastin, retinol, glycolic acid, allantoin, ascorbic acid, tocopherol, peptides and mucopolysaccharides, which give this serum hydrating, redensifying properties, antioxidants and anti-wrinkles. It promotes cell turnover, improves skin elasticity, reduces wrinkles, helps reduce signs of acne, scars and skin spots. It also keeps the skin younger and more compact, reducing the effects of time and giving a more uniform and glowing skin tone. The presence of aloe vera enriches this serum thanks to its moisturizing and soothing properties, leaving a smooth and velvety face and neck skin. In addition, it contains arginine, one of the amino acids that make up the natural hydration epidermis factor, which adds to the pool of active ingredients that are already in the snail mucin a moisturizing and conditioning action for the skin. Hypoallergenic perfume.

“Balù Cosmetic Line with Very Pure Snail Slime” is produced and distributed by  
DAP SRLS – via Diego Rapolla, 62 – 85029 Venosa (Pz) – P.Iva 02003750763
