The story of Artezen

In 2004, at the request of a leading European oven manufacturer, a special division was set up to develop and manufacture dividers, roll plants and bread plants in the north of Italy, an area renowned for its competence in bakery equipment. During that first decade more than a thousand units were manufactured here and exported all over the world.

In 2015 this technology was acquired in exclusivity by three entrepreneurs with a long history in the bakery equipment business, who created a new company under the name of Artezen. With its Dutch, Swedish and Italian shareholders, a true European company with R&D and manufacturing based in the same premises where it all started more than a decade ago.

At present time Artezen has successfully established continuous distribution in more than 25 countries worldwide with tripled sales numbers as result. We modernized the existing product range and introduced the new Calybra heavy duty divider at IBA 2018, ready for Industry 4.0.
