Who We Are

We are an Italian-based lift company offering comprehensive solutions to overcome architectural barriers, drawing on decades of experience in the field. Specializing in platform stairlifts suitable for both indoor and outdoor use for straight stairs, as well as curved, multi level stairs and stairs with intermediate landings.

Our highly specialized team is dedicated to every aspect of the business process, providing meticulous attention from initial studies through to after-sales service.

Why Choose Us

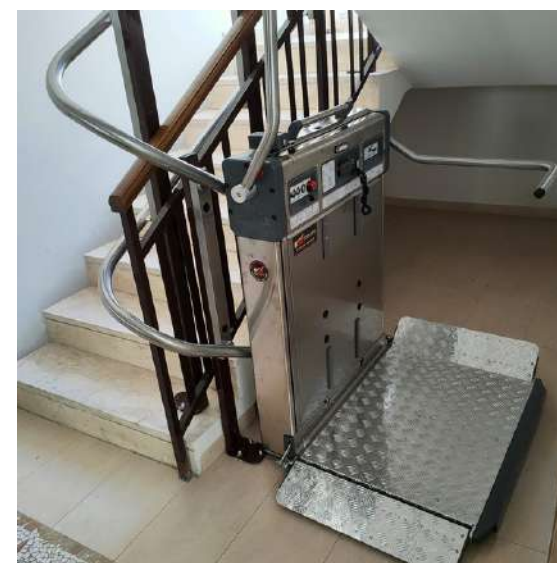

01. Competitive price
02. High Quality products : both rail and platform are stainless steel
03. we speak 4 English
04. excellent customer care and after sales support
05. 2 year warranty

What We Offer

Outside

We offer REBECCA, our platform stairlifts which are designed to transport wheelchairs or individuals seated on folding chairs, as well as carry goods like groceries alongside the user and even heavy materials (load up to 300kg). The platform can fold up when not in use.

Inside

They stand out as the most versatile on the market, capable of installation on long rail runs, narrow staircases, tight turns, and even very steep inclines, enduring fierce outdoor weather conditions thanks to the high-quality materials we employ, such as stainless steel rails.

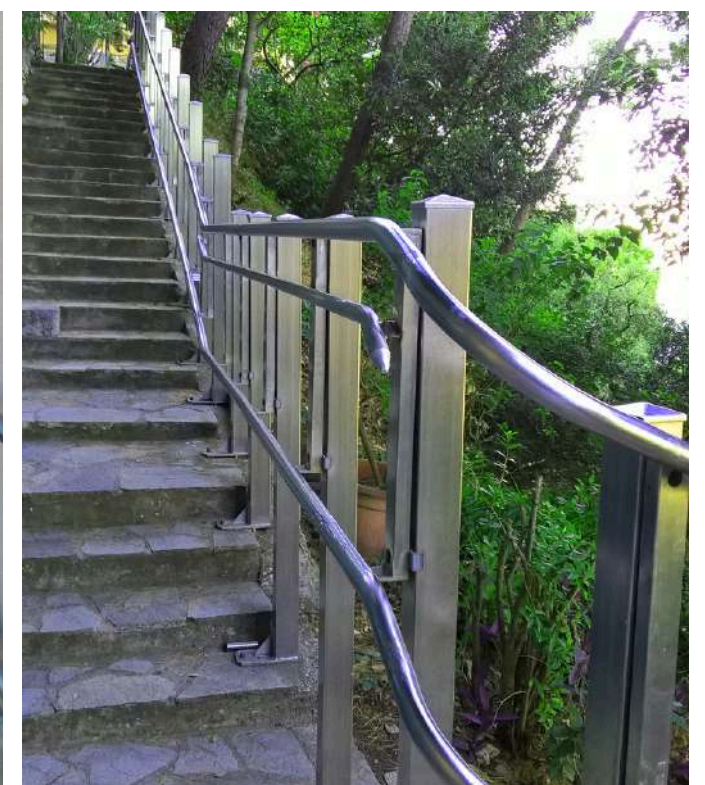

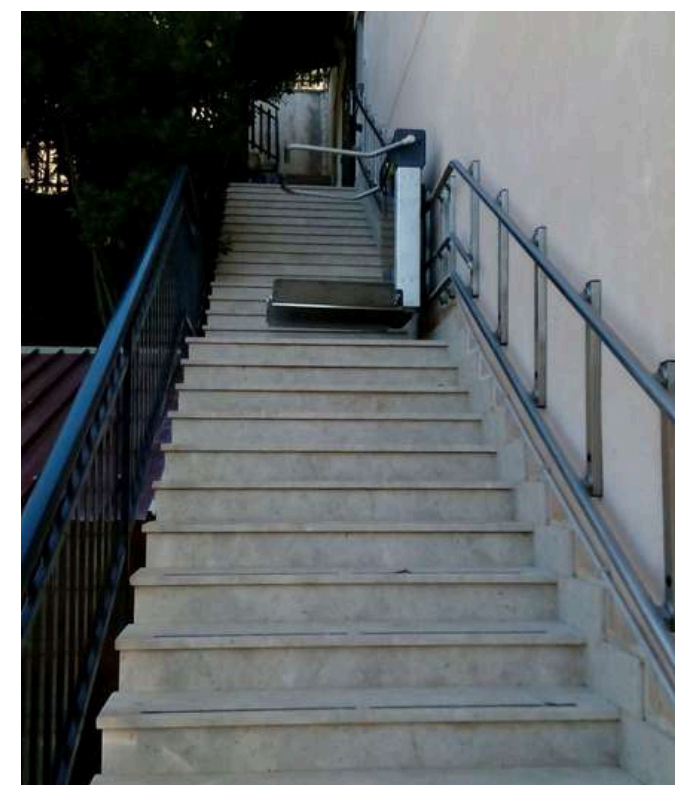

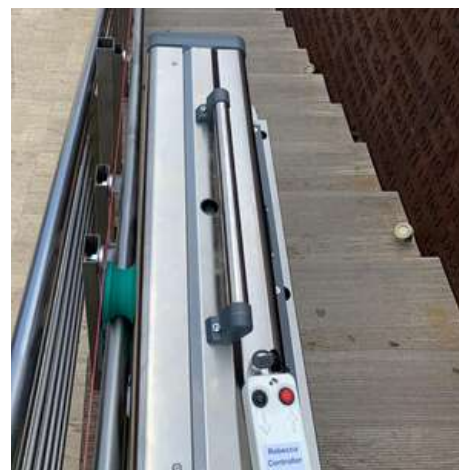

OUR SOLUTIONS FOR ANY DIFFERENT STAIRCASE

Our platform stairlifts have the same design, driving system and the safety features. The main difference is the rail. Additionally, clients can request specific options to adapt to their requirements and staircase.

Rebecca offers a solution suitable for every type of staircase, as it can fold away neatly, preserving accessibility for regular use.

REBECCA STRAIGHT

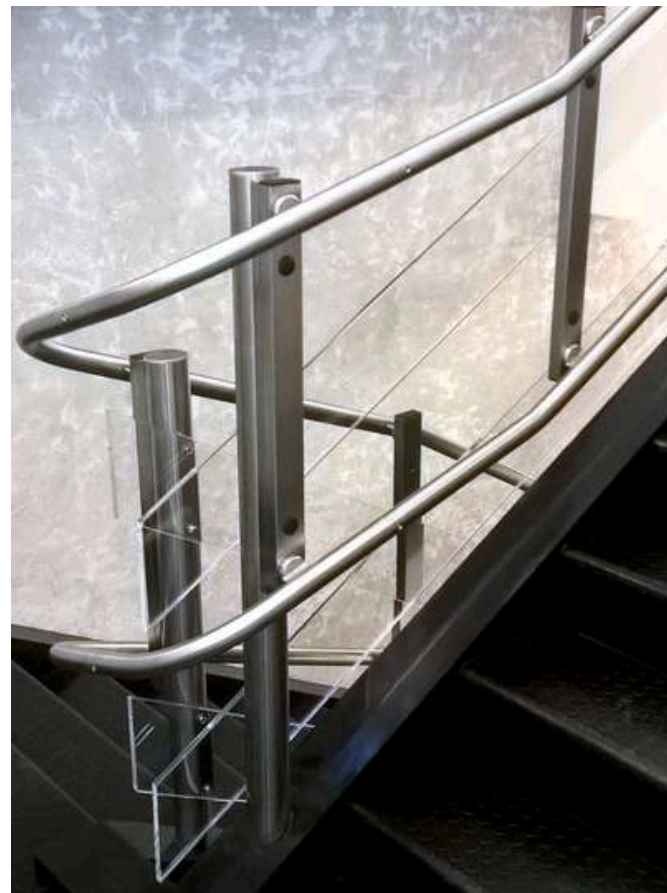

- REBECCA STRAIGHT, Perfect for straight stairs, this solution is suitable for both indoor and outdoor use.
- It exhibits resilience to various weather conditions, moisture, and salt air, ensuring durability and reliability.
- Fast and easy to install with very low maintenance need .
- Until today, we have completed projects with 100 stairs, and our stairlift has demonstrated its perfect fit for this type of staircase without any issues, earning with that the satisfaction of our client.
- Our platform stairlift utilizes a Traction Drive system, which repurposes the rail as a handrail for users, optimizing space and functionality.

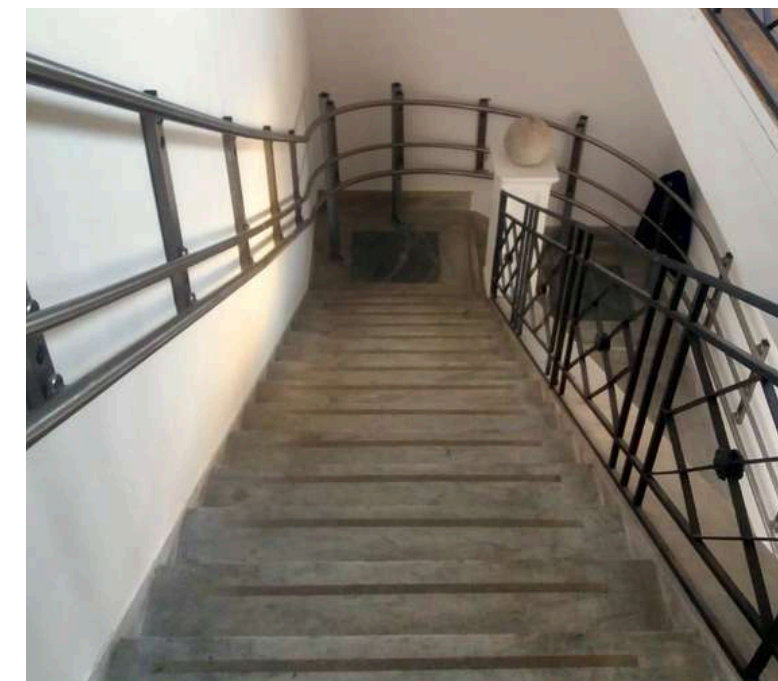

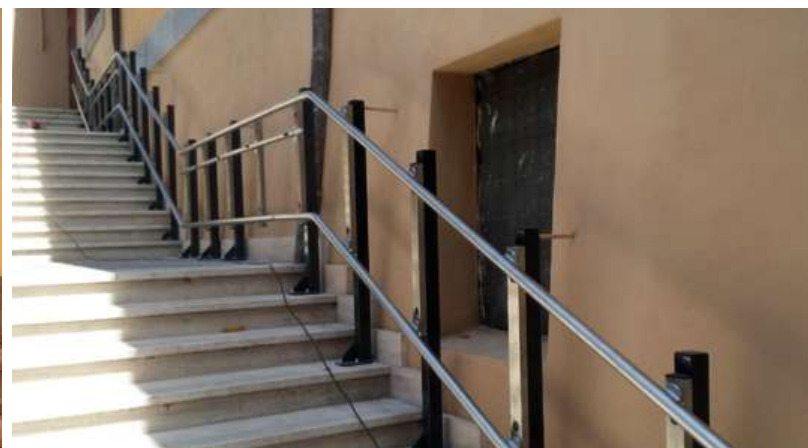

REBECCA CURVED

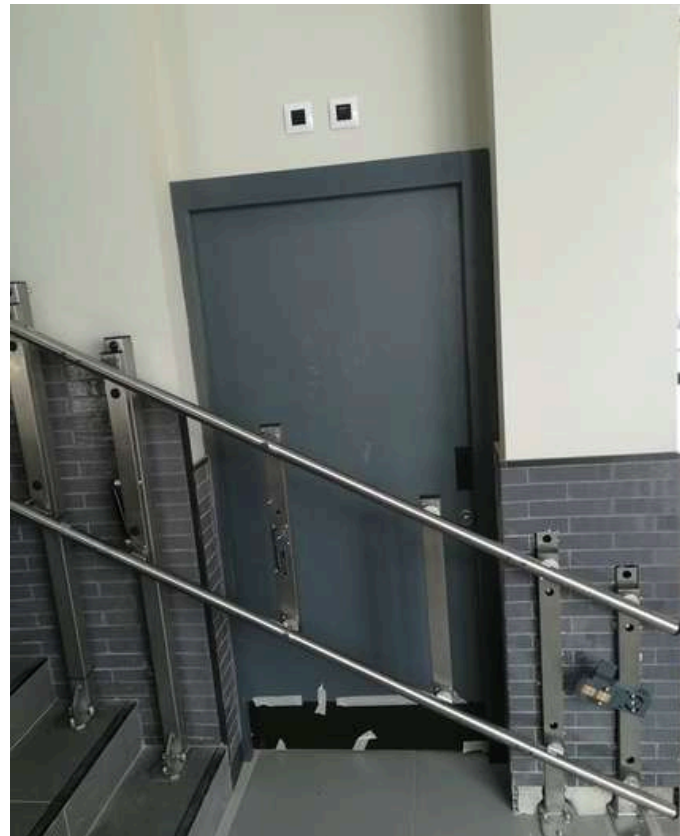

- **REBECCA CURVED**, it fits perfectly in type of curves stairs . narrow , stairs with tight curves, directional changes, spiral(check the next page)
- Can be installed for any number of levels.
- Fast and easy to install with very low maintenance need .
- Flexible for installation indoor and outdoor areas.
- The platform can be conveniently folded away between uses, with the safety arms folded downwards to maintain the unit's compactness.
- The rail serves also as a handrail and, like the straight Rebecca model, utilizes the Traction Drive system.
- Our platform stairlift does not require significant building renovations.

OUR DESIGN RAILS

- Our stairlift rail solution is expertly designed to effortlessly navigate straight, curved, and variable slope and long staircase and can fit perfectly as handrail.
- Rebecca is equipped with a smooth double-tube track made of AISI 304 stainless steel. The track is free from any grooves or holes, eliminating the need for lubrication or special treatments.
- Its design gives it such an appearance that allows it to be installed anywhere. Thanks to its design and low visual impact, we are able to respect every environment in which it is installed: private residences, historic buildings, natural parks.
- It's resistant to corrosion and wear.
- Perfect for indoor and outdoor use.

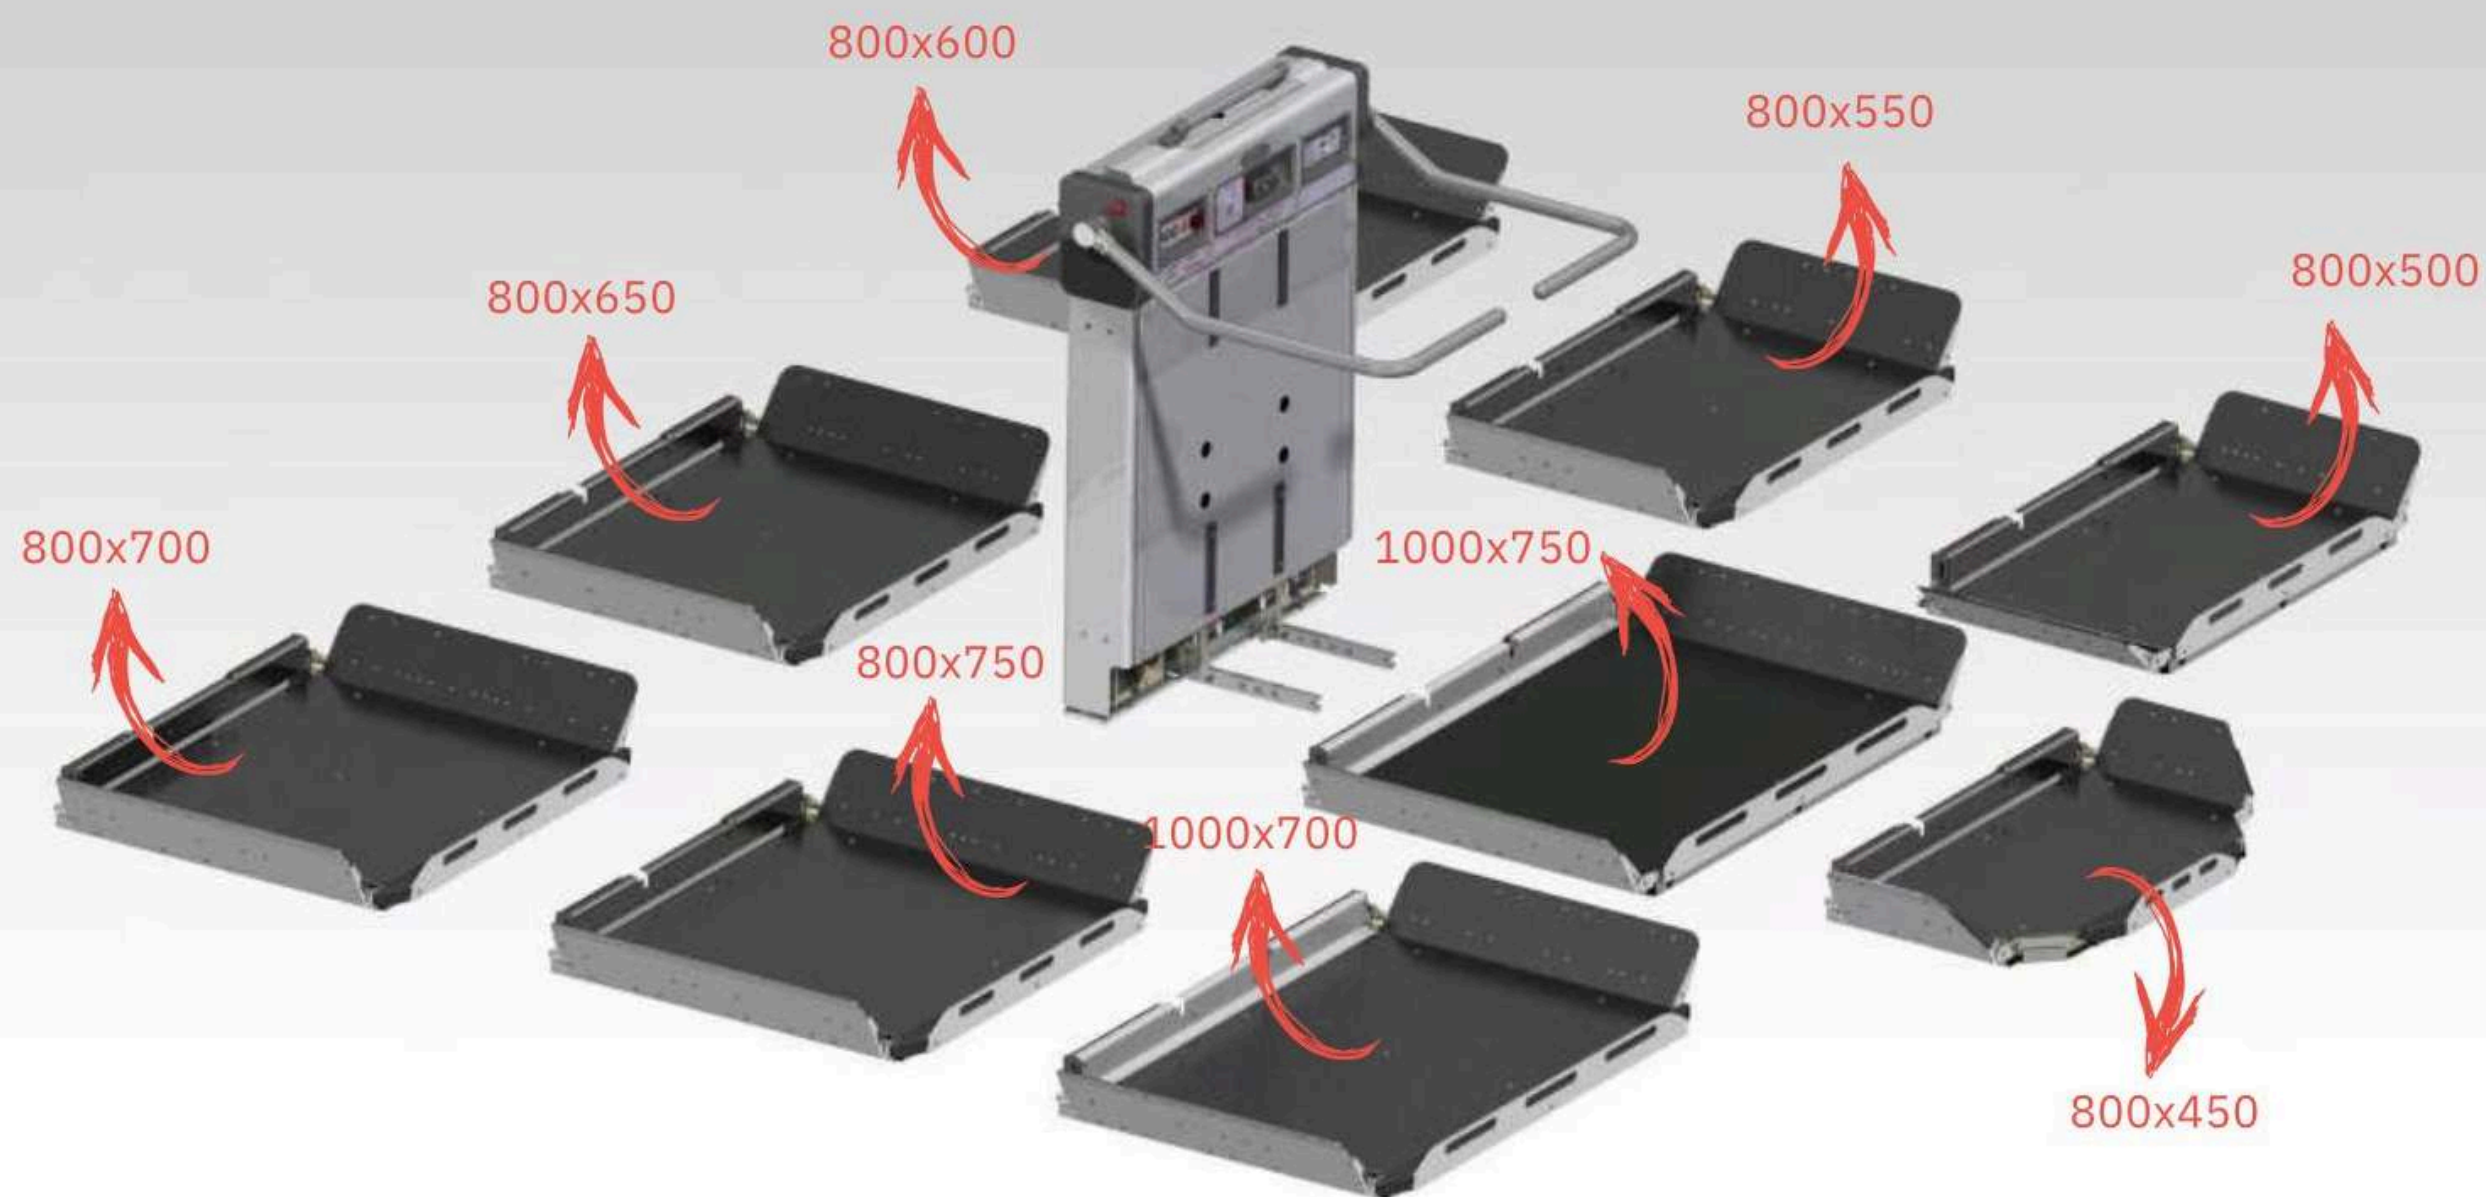

OUR INNOVATIVE RAILS

- Introducing our latest innovation: the Lift Up Rail system. This revolutionary design enables users to overcome obstacles such as doors and windows seamlessly along the staircase.
- With its innovative functionality, navigating through challenging spaces becomes effortless, providing an unparalleled user experience.
- Its innovative design minimizes the need for additional modifications to accommodate obstacles, preserving valuable space and maintaining the aesthetic appeal of the surroundings.
- With the Lift Up Rail, users no longer need to navigate cumbersome detours or make adjustments to their environment, saving time and effort in their daily routines.

We at Enok have thought of everything:

9 different loading platform sizes to adapt to every need, seamlessly fitting into existing designs without requiring any renovations.

SAFETY IN EVERY DETAIL

At ENOK SRL, safety is our top priority. Our stairlifts feature advanced safety mechanisms to ensure a secure and comfortable ride. Before any sale, we conduct thorough tests to quickly identify and address any technical issues, ensuring a safe and reliable user experience.

- **Parachute device and speed limiter**
- **Emergency stop button**
- **Platform stops automatically when sensitive surfaces detect obstructions**
- **Barrier arms surround and protect user,,**
- **Automatic emergency lowering**
- **Safety sensors under the platform and the machine body with anti-shock and anti-crushing function during movement**
- **Double tube guide rail in stainless steel , smooth, without holes or teeth, which makes it safe and usable as a handrail.**

Rebecca is designed according to safety and health requirements compliant with the UNI EN81-40 2021/CE standard.
