Professional Uv & Led Gel Products

# ULTRA

**Ultra** brand was born with the aim to create a high quality product line guaranteeing the maximum level of satisfaction even to the most demanding customer.

The achievement of this ambitious project led us, over time, to become highly competitive and to acquire a huge market in close contact with important groups of the cosmetic sector with which we plan and develop extraordinary appealing product lines, offering also the Private Label service.

**LABORATORI** S.r.l.

To obtain these results, **C&C Laboratori** relies on a cutting-edge structure: research and development laboratory, quality control, production, packaging and raw materials and final product's storage.

The choice to use only the highest quality raw materials, working exclusively with certified products, the constant investment in cutting-edge machinery, the advice at the service of unique brands and products and the qualified work of a team of professionals, are all elements that make **C&C Laboratori** a leading company in the sector.

## 31 Merchandising

## 32 Distribution Information

## Primer

Acid pre-gel solution

C9 15ml

Liquid solution with acid base; it contains acrylic, it perfectly penetrates natural nails' fibres and it creates an excellent adherence with the gels. It dries to the air and it has a degreasing effect. It contains an antimycotic. Few drops have to be applied.

## Ultra Bond

Non-acid pre-gel solution

C15 15ml

Non-acid pre-gel maximising the adherence of the UV gel and of the nail polish. Apply a thin layer and let it dry at the air for 30 seconds. For all types of nails

## I-Phase

Mediator of adhesion gel without acids

15A 15ml / 15 30ml

Transparent gel containing keratin. Apply as a nail polish. Ideal for perfect nails and for who does not want acids on the nails.

## Extreme

Mediator of adhesion gel with high acidity

05A 15ml / 05 30ml

Transparent gel. It has a keratin base and an acrylic base. Perfect for difficult and complicated nails. Apply a thin layer. The result is the same as if you were using Bonder and Primer together.

## Bonder

Mediator of adhesion gel with low acidity

01A 15ml / 01 30ml

Transparent gel. It has a keratin base and a small amount of acrylic. Apply with a thin layer

# ULTRA

## • Builder Gels

### Steel

Transparent dense builder gel

26A 15ml / 26 30ml

Transparent builder gel, perfect for structures requiring a particular mechanical resistance. It is very useful for extreme elongations and particular shapes. Excellent pincerability and matt topcoat.

### Deep

Builder gel for imperfections

06A 15ml / 06 30ml

Dark pink builder gel, fit for covering natural nail's imperfections. Self-levelling and suitable for being used as camouflage. Apply a double layer. Lucid topcoat.

### Pink French

Transparent pink builder gel

04A 15ml / 04 30ml

Lightly pink builder gel without methacrylic acids, perfect for finishing of the French gel on the cuticles. Recommended in case of allergies. Matt topcoat

### Pedique

Builder gel for toenails

14A 15ml / 14 30ml

Lightly pink builder gel structured and realised for toenails. It has a high adhesion and it contains antimycotic substances in order to prevent skin fungus and mycocites' formation.

### Clear

Transparent builder gel

03A 15ml / 03 30ml

Transparent builder gel, it contains UV filters in order to avoid nail's yellowing. Perfect for nail form's reconstruction. During the summer, it works differently because density is lower. Matt topcoat.

### Pink

Milky pink builder gel

02A 15ml / 02 30ml

Milky pink builder gel, perfect for coverings with porcelain effect. Self-levelling and easy to apply. Lucid topcoat. It becomes milky white after lamp polymerization

## 2-Phase

Builder gel without acids

16A 15ml / 16 30ml

Transparent builder gel with high adhesion. High endurance and resistance for reconstruction with excellent C curves. Perfect gel for curvatures and reconstruction with nail form. It presents a high elasticity and an extreme brilliance. Matt topcoat.

## Camouf 1

Covering beige builder gel

17A 15ml / 17 30ml

Covering beige builder gel with lucid topcoat and self-levelling. Perfect for covering striated and ruined nail's imperfections. Fit for elongation with papers. Apply a double layer. It can be used before and after moulding or directly used as shaping.

## Camouf 2

Covering light pink builder gel

24A 15ml / 24 30ml

Covering light pink builder gel with lucid topcoat and self-levelling. Perfect for covering striated and ruined nail's imperfections. Fit for nail bed's extension. Apply a double layer. It can be pincer after about 60 seconds.

## Camouf 3

Covering dark pink builder gel

25A 15ml / 25 30ml

Covering dark pink builder gel with lucid topcoat and self-levelling. Perfect for covering striated and ruined nail's imperfections. Fit for nail bed's extension. Apply a double layer. It can be pincer after about 60 seconds.

## Camouf 4

Covering mid-pink builder gel

25A 15ml / 25 30ml

Covering mid-pink builder gel with lucid topcoat and self-levelling. Perfect for covering striated and ruined nail's imperfections. Fit for nail bed's extension. Apply a double layer. It can be pincer after about 60 seconds.

## Camouf 5

Covering camouflage pink builder gel

10A 15ml / 10 30ml

Covering pink builder and self-levelling. Perfect for covering striated and ruined nail's imperfections. Fit for elongation with papers. Apply a double layer. It can be used before and after moulding or directly used as shaping. It can be pincer after about 60 seconds.

## Milk

Builder gel with milk effect

18A 15ml / 18 30ml

Perfect for coverings with milky effect. Unique application, self-levelling and easy to apply.

## White

Covering white effect builder gel

08A 15ml / 08 30ml

Perfect for realisation of French wall technique

## Naturelle

Natural white French builder gel

07A 15ml / 07 30ml

White natural and bright builder gel. Perfect for a refined hand with natural effect. Lucid topcoat.

## 3-Phase

Final sealant

13A 15ml / 13 30ml

For a bright and natural topcoat. Apply a unique and dense layer over the whole surface.

## White Extreme

Extreme white French builder gel

09A 15ml / 09 30ml

White extreme builder gel. Perfect for a hand with extreme French effect. Lucid topcoat.

## Top Finish

Final sealant

23A 15ml / 23 30ml

Vitrifying with extreme brightness. Apply abundantly as a nail polish. It should be degreased after the polymerization.

# ULTRA

• Be2Gel

It is a product more elastic than acrylic, more resistant than gel and lighter than gel and acrylic.

## Be2Gel Bonder

Mediator of adhesion  
G01 30ml

## Be2Gel Pink

Covering pink builder  
G10 30ml

## Be2Gel White Extreme

Extreme white French builder  
G09 30ml

# ULTRA

## • Monophasic Gels

### Star Pink

Transparent blue monophasic gel

19A 15ml / 19 30ml

Transparent pink monophasic gel. Fit for coverings and reconstructions with nail form. Self-modelling, due to the presence of many UV filters you can feel a heat source and you have to work in layers. Perfect for summer and high temperatures. Lucid topcoat.

### Star Cover

Beige monophasic gel

27A 15ml / 27 30ml

Excellent endurance, good covering and perfect workability. Since this product has the colour very similar to the nail, it can be used for obtaining coverings with a complete natural effect. Very useful during the step of filing. Lucid topcoat.

### Star Clear

Transparent monophasic gel

20A 15ml / 20 30ml

Transparent monophasic gel. Fit for coverings and reconstructions with nail form. Self-modelling, due to the presence of many UV filters you can feel a heat source. Excellent adherence and filing. Lucid topcoat.

### Star

Transparent blue monophasic gel

11A 15ml / 11 30ml

Transparent blue monophasic gel. UV filter's presence avoids nail's yellowing. Fit for coverings and reconstructions with nail form. Self-modelling, due to the presence of many UV filters you can feel a heat source. Perfect for summer and high temperatures. Excellent adherence and filing. Lucid topcoat.

# ULTRA

## • Technical Products

### Brilliance

Final polishing without dispersion  
C1 15ml

Applied as a nail polish it results to be very bright. It has not to be degreased after polymerization and it can be used even with the gel polish

### Finish Matt

Sealant with matt effect  
C17 15ml

It has to be applied abundantly as a nail polish for a velvety effect on the nails. It has not to be degreased after polymerization. It should be used also with gel polish **STIR BEFORE USE**

### Diamond

Sigillante con effetto diamante  
C18 15ml

Grande eleganza ed effetto 3D ultra lucido. Applicato con un leggero strato, sottile, prima della sigillatura. Può essere usato anche come unico sigillante. Deve essere mescolato a causa delle microparticelle presenti. Si applica come uno smalto e non va utilizzato per le bombature

### Shimmerize Blu

Sealing with blue effect  
C19 15ml

It has an incredible resistance and duration. Thanks to UV filter's presence, it avoid nail's yellowing. It has to be applied with a thin layer, before the sealing. It could be used as unique sealing and it has to be mixed due to the micro-particles' presence. It has to be applied as a nail polish but it should not be used for cambers

### Cuticle Remover

For cuticles' removal  
C3 15ml

Solution that quickly and efficiently removes cuticles; apply a few quantity of the product on the cuticles and let it act for 120 seconds. Remove excess skin with orange stick

### UV Protector

Protective nail polish from UV rays  
C4 15ml

High coverage nail polish, UV rays protector; it avoids the nail's yellowing. Perfect for protecting the reconstruction on natural and artificial nails.

### Base Coat

Protective base of the nail  
C6 15ml

Apply as base coat, especially for reconstruction of damaged, soft and fragile nails

### Calcium Hardener

Restructuring and strengthening solution  
C7 15ml

Restructuring that hardens, fortifies and treats fragile and thin nails. It has to be used for at least 2 weeks

## Tip Blender

Solution for rung

C8 15ml

Solution for dissolving and lowering the rung of the tips

## Top Gloss

Extra lucid nail polish

C12 15ml

Polish with glass effect for nail polish and natural nails. It dries to the air after few seconds

## Anti Mycotic

Technical fungicidal solution

C10 15ml

Solution suited for infections' treatment caused by microscopic skin fungus. Use this solution if the problem involves at most two nails

## Dehydrator

Highly dehydrating solution

C16 15ml

It has a degreasing and dehydrating function, it is applied with few drops, it dries and degreases the nail. If applied after opacification it highlights untreated areas. It does not contain acids.

## Tangerine Hi-oil

Moisturizing oil for cuticles

C2B 15ml

Nourishing oil for moisturizing nails and cuticles; it deeply penetrates the nail bed by reinforcing and promoting the growth; perfect after the reconstruction

## Argan Hi-oil

Moisturizing oil for cuticles

C2A 15ml

Nourishing oil for moisturizing nails and cuticles; it deeply penetrates the nail bed by reinforcing and promoting the growth; perfect after the reconstruction

## Almond Hi-oil

Moisturizing oil for cuticles

C2C 15ml

Nourishing oil for moisturizing nails and cuticles; it deeply penetrates the nail bed by reinforcing and promoting the growth; perfect after the reconstruction

# ULTRA

## • Solvents

### Cleanser

Degreasing solution remove the layer dispersion

5628B-001 250ml

5628B-001A 500ml

5628B-001B 1000ml

5628B-001C 5000ml

Product suitable in all reconstruction systems to eliminate the dispersion layer that is created on the nail after curing in lamp. Its gentle formula allows to be used even after the file phase. Excellent glossy and brilliant effect

### Slip Solution

Liquid for the processing of Polygel

56287B-007 250ml

56287B-007A 500ml

56287B-007B 1000ml

56287B-007C 5000ml

Special liquid, odorless, necessary to facilitate the modeling the Polygel Haidu without sagging; it allows to handle the product until polymerization in the lamp

### Antysept

Sanitizer solution

5629B-002 250ml

5629B-002A 500ml

5629B-002B 1000ml

5629B-002C 5000ml
